#### NEW QUESTION # 118

Which three are project gate statuses? (Choose three.)

- A. Draft
- B. Approve
- C. Open
- D. Closed
- E. In Review

Answer: C,D,E

Explanation:

Project gate statuses are values that indicate the progress or completion of a project gate. A project gate is a checkpoint that marks the end of a phase or stage in a project lifecycle. Three of the project gate statuses are:

\* Open: This status indicates that the project gate is not yet ready for review or approval.

\* In Review: This status indicates that the project gate is under review or approval by the gate reviewers or approvers.

\* Closed: This status indicates that the project gate has been reviewed or approved and the project can move to the next phase or stage. Approve and Draft are not project gate statuses, but actions that can be performed on a project gate. Approve is an action that allows a gate approver to approve a project gate and change its status to Closed. Draft is an action that allows a gate owner to create or edit a project gate and change its status to Open. Project Labor Demand: How It's Calculated

Project executives want to track the labor demand in projects in their organization. The Project Hierarchy Viewer provides project executives a hierarchical view of the enterprise project structure (EPS) along with the labor demand in terms of full-time equivalent (FTE).

Settings That Affect Project Labor Demand

Project application administrators must do the following to set up how project labor demand is calculated:

- \* Organize projects into hierarchical groups on the Manage Enterprise Project Structure page.
- \* Change the quarterly FTE hours for the organization on the Define Project Management Implementation Options page, if different from 520 hours.

Note: You can choose to view labor demand annually instead of quarterly. The Project Hierarchy Viewer uses the current date to determine which year or quarter to display.

How Project Labor Demand Is Calculated

The Project Hierarchy Viewer calculates project labor demand in the following manner:

- \* Spreads the allocation hours from the Manage Project Resources page evenly over the days that the resources are allocated to the project.
- \* Divides the quarterly project allocation hours by the quarterly FTE hours to get the labor demand.
- \* Rolls up the quarterly and annual labor demand up the hierarchy.
