

CMMC-CCP Training Materials & CMMC-CCP Exam Torrent & CMMC-CCP Study Guide

2026 Latest Fast2test CMMC-CCP PDF Dumps and CMMC-CCP Exam Engine Free Share: https://drive.google.com/open?id=1zi5QoD6XsBMxTvOHbz6iBGRLkai_y158

The pass rate is 98.75% for CMMC-CCP learning materials, and we will help you pass the exam just one time if you choose us. In order to build up your confidence for CMMC-CCP training materials, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund. In addition, you can receive the download link and password within ten minutes for CMMC-CCP Training Materials, if you don't receive, you can contact with us, and we will solve this problem for you immediately. We offer you free update for 365 days for you, and the update version for CMMC-CCP exam materials will be sent to your email automatically.

Our CMMC-CCP dumps pdf vce is absolutely the right and valid study material for candidates who desired to pass the CMMC-CCP actual test. Now, please go and free download our CMMC-CCP practice demo first. The questions & answers of CMMC-CCP free demo are parts of the complete exam dumps, which can give you some reference to assess the valuable of the CMMC-CCP Training Material. In addition, there is one year time for the access of the updated CMMC-CCP practice dumps after purchase. You will get CMMC-CCP latest study pdf all the time for preparation.

Exam CMMC-CCP Simulator Fee, Updated CMMC-CCP Demo

The web-based Cyber AB CMMC-CCP practice exam is compatible with all browsers like Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, Opera, and more. Unlike the desktop version, it requires an internet connection. The Certified CMMC Professional (CCP) Exam (CMMC-CCP) practice exam will ask real Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam questions.

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> CMMC-AB Code of Professional Conduct (Ethics): This section of the exam measures the integrity of cybersecurity professionals by evaluating their understanding of the CMMC-AB Code of Professional Conduct. It emphasizes ethical responsibilities, including confidentiality, objectivity, professionalism, conflict-of-interest avoidance, and respect for intellectual property, ensuring candidates can uphold ethical standards throughout their CMMC-related duties.

Topic 2	<ul style="list-style-type: none"> • Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments
Topic 3	<ul style="list-style-type: none"> • CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
Topic 4	<ul style="list-style-type: none"> • CMMC Model Construct and Implementation Evaluation: This section of the exam measures the evaluative skills of cybersecurity assessors, focusing on the application and assessment of the CMMC model. It includes understanding its levels, domains, practices, and implementation criteria, and how to assess whether organizations meet the required cybersecurity practices using evidence-based evaluation.
Topic 5	<ul style="list-style-type: none"> • CMMC Governance and Source Documents: This section of the exam measures the capabilities of legal or compliance advisors, covering key regulatory frameworks that govern cybersecurity compliance. Topics include Federal Contract Information, Controlled Unclassified Information, the role of NIST SP 800-171, DFARS, FAR, and the structure and requirements of CMMC v2.0, including self-assessments and certification levels.

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q161-Q166):

NEW QUESTION # 161

A dedicated local printer is used to print out documents with FCI in an organization. This is considered an FCI Asset Which function BEST describes what the printer does with the FCI?

- A. Manage
- B. Distribute
- C. Process
- D. Encrypt

Answer: C

Explanation:

Understanding the Role of an FCI Asset in CMMC A dedicated local printer used to print Federal Contract Information (FCI) is considered an FCI Asset. Under CMMC Level 1, FCI assets are required to meet basic cybersecurity controls to ensure that FCI is properly protected from unauthorized access.

Step-by-Step Breakdown: #1. Why "Process" is the Best Answer

* The printer receives digital FCI, converts it into a physical format (paper), and outputs the document.

* This aligns with the definition of "processing" in CMMC, which includes:

* Transforming or modifying data

* Generating output (e.g., printed documents)

* Using systems to interpret or manipulate information

#2. Why the Other Answer Choices Are Incorrect:

* (A) Encrypt#

* A printer does not encrypt FCI-it simply prints it. Encryption applies to digital storage and transmission, not printing.

* (B) Manage#

* Managing FCI typically refers to governance, access control, and oversight, which is not the function of a printer.

* (D) Distribute#

* While a printed document could be distributed, the printer itself is not responsible for distributing FCI-it only processes the data for output.

* CMMC Assessment Guide (Level 1) confirms that processing FCI includes using systems that convert or transform information, such as printers.

* NIST SP 800-171 defines processing as an action that changes or manipulates information, which applies to printing.

Final Validation from CMMC Documentation:

NEW QUESTION # 162

Prior to initiating an OSC's CMMC Assessment, the Lead Assessor briefed the team on the most important requirements of the assessment. The assessor also insisted that the same results of the findings summary, practice ratings, and Level recommendations must be submitted to the C3PAO for initial processes and review. After several weeks of assessment, the C3PAO completes the internal review, the recommended results are then submitted through the C3PAO for final quality review and rating approval. Which document stipulates these reporting requirements?

- A. DFARS clause 252.204-7012 assessment reporting requirements
- B. DFARS 52.204-21 assessment reporting requirements
- C. CMMC Assessment reporting requirements
- D. NISTSP 800-171 Revision 2 assessment reporting requirements

Answer: C

Explanation:

The correct answer is A. CMMC Assessment Reporting Requirements because this document specifically outlines the structured process that Certified Third-Party Assessment Organizations (C3PAOs) must follow when conducting and reporting CMMC assessments.

Understanding the CMMC Assessment Process

The Lead Assessor briefs the team on the assessment requirements and the evaluation criteria before the assessment begins.

Throughout the assessment, findings summaries, practice ratings, and level recommendations are documented and reported.

These findings are internally reviewed by the C3PAO before they are formally submitted for quality review and final rating approval.

Key Document Stipulating Reporting Requirements: CMMC Assessment Reporting Requirements This document specifically details how assessments must be reported within the CMMC ecosystem.

It describes the structured process for assessment submission, internal C3PAO reviews, and quality checks by the CMMC-AB before an organization can receive a final certification decision.

It ensures that results are consistent, transparent, and aligned with DoD cybersecurity compliance expectations.

Why Other Options Are Incorrect:

B). DFARS 52.204-21 Assessment Reporting Requirements

This clause only specifies basic safeguarding of Federal Contract Information (FCI) but does not dictate the reporting process for CMMC assessments.

C). NIST SP 800-171 Revision 2 Assessment Reporting Requirements

While NIST SP 800-171 Rev. 2 outlines security controls, it does not define how CMMC assessments must be conducted and reported.

D). DFARS Clause 252.204-7012 Assessment Reporting Requirements

This DFARS clause focuses on incident reporting and cyber incident response requirements but does not detail the CMMC assessment reporting process.

CMMC Assessment Reporting Requirements, issued by The Cyber AB and DoD, governs how C3PAOs must report assessment results.

CMMC Assessment Process (CAP) also outlines reporting workflows for certification.

Step-by-Step Breakdown: Official Reference: Thus, the CMMC Assessment Reporting Requirements document is the authoritative source that dictates the reporting procedures for CMMC assessments.

NEW QUESTION # 163

A company is working with a CCP from a contracted CMMC consulting company. The CCP is asked where the Host Unit is required to document FCI and CUI for a CMMC Assessment. How should the CCP respond?

- A. "In the network diagram, in the SSP, within the base inventory, and in the proposal response"
- B. "Within the asset inventory, in the proposal response, and in the network diagram"
- C. "Within the hardware inventory, data (low diagram, and in the network diagram"
- D. "In the SSP, within the asset inventory, and in the network diagram"

Answer: D

NEW QUESTION # 164

What is the LAST step when developing an assessment plan for an OSC?

- A. Verify the readiness to conduct the assessment.
- **B. Obtain and record commitment to the assessment plan.**
- C. Update the assessment plan and schedule as needed
- D. Perform certification assessment readiness review.

Answer: B

Explanation:

Last Step in Developing an Assessment Plan for an OSC

Developing an assessment plan involves:

Defining the assessment scope (e.g., systems, networks, locations).

Planning test activities (e.g., interviews, evidence review, technical testing).

Verifying the OSC's readiness (e.g., ensuring required documents are available).

Updating the assessment plan and schedule as needed.

Final Step: Obtaining and recording the OSC's commitment to the assessment plan.

Why is obtaining commitment the last step?

#The assessment cannot proceed unless the OSC agrees to the finalized plan.

#This ensures OSC leadership understands the scope, timeline, and responsibilities.

#The C3PAO must document this commitment to formalize the agreement.

Why is the Correct Answer "D. Obtain and record commitment to the assessment plan"?

A). Verify the readiness to conduct the assessment # Incorrect

Readiness verification happens earlier in the planning process, not as the last step.

B). Perform certification assessment readiness review # Incorrect

A readiness review is conducted before finalizing the plan, not at the very end.

C). Update the assessment plan and schedule as needed # Incorrect

Updating the plan happens before commitment is obtained; it is not the final step.

D). Obtain and record commitment to the assessment plan # Correct

This is the final step before conducting the assessment. The OSC must formally agree to the plan.

CMMC 2.0 References Supporting This Answer:

CMMC Assessment Process (CAP) Document

States that the OSC must confirm agreement to the assessment plan before execution.

CMMC-AB Guidelines for C3PAOs

Specifies that finalizing the assessment plan requires documented commitment from the OSC.

CMMC Assessment Guide

Outlines that assessments cannot begin without formal approval of the plan.

Final Answer:

#D. Obtain and record commitment to the assessment plan.

NEW QUESTION # 165

An OSC needs to be assessed on RA.L2-3.11.1: Periodically assess the risk to organizational operations (including mission, functions, image, or reputation), organizational assets, and individuals, resulting from the operation of organizational systems and the associated processing, storage, or transmission of CUI. What is in scope for a Level 2 assessment of RA.L2-3.11.1?

- A. CUI Marking processes
- B. Enterprise systems
- **C. Processes, people, physical entities, and IT systems in which CUI processed, stored, or transmitted**
- D. IT systems

Answer: C

Explanation:

Understanding RA.L2-3.11.1 Risk Assessment Scope in CMMC Level 2 The CMMC Level 2 control RA.L2-

3.11.1 aligns with NIST SP 800-171, Requirement 3.11.1, which mandates that organizations periodically assess risks to operations, assets, and individuals arising from the processing, storage, or transmission of CUI.

What is Required for Compliance?

The organization must perform risk assessments on all assets and entities involved in handling CUI.

Risk assessments must evaluate potential threats, vulnerabilities, and impacts on CUI security.

The scope must include people, processes, physical locations, and IT systems to ensure comprehensive risk management.

Why the Correct Answer is "Processes, people, physical entities, and IT systems in which CUI is processed, stored, or transmitted": CUI can be exposed to risk in multiple ways-not just IT systems but also human error, physical security gaps, and process weaknesses.

Risk assessments must evaluate all areas that could impact CUI security, including:

Personnel security risks(e.g., insider threats, phishing attacks).

Process vulnerabilities(e.g., mishandling of CUI, policy weaknesses).

Physical security risks(e.g., unauthorized access to servers, storage rooms).

IT systems(e.g., networks, servers, cloud environments processing CUI).

A). "IT systems" Too narrow. Risk assessment must cover more than just IT systems, including people, physical assets, and processes affecting CUI.

B). "Enterprise systems" Too broad. While enterprise systems might be assessed, the focus is specifically on areas handling CUI, not all enterprise operations.

C). "CUI Marking processes" Incorrect focus. While marking CUI correctly is important, RA.L2-3.11.1 pertains to risk assessments, not data classification.

References: NIST SP 800-171 Rev. 2 - Requirement 3.11.1 (NIST Official Site) CMMC 2.0 Level 2 Assessment Guide - Risk Assessment Domain (Cyber AB)

Final Answer D. Processes, people, physical entities, and IT systems in which CUI is processed, stored, or transmitted.

NEW QUESTION # 166

.....

Fast2test's experts have simplified the complex concepts and have added examples, simulations and graphs to explain whatever could be difficult for you to understand. Therefore even the average CMMC-CCP exam candidates can grasp all study questions without any difficulty. Additionally, the CMMC-CCP Exam takers can benefit themselves by using our testing engine and get numerous real CMMC-CCP exam like practice questions and answers. They will help them revising the entire syllabus within no time.
