

Latest Construction-Manager Preparation Materials: Certified Construction Manager (CCM) - Construction- Manager Study Guide - ExamBoosts

P.S. Free 2026 CMAA Construction-Manager dumps are available on Google Drive shared by ExamBoosts:
<https://drive.google.com/open?id=1Wq-1bG8VeBMJmCl6qMlMw9f8qt1UrV95>

The team appointed by the ExamBoosts is dedicated and hardworking and strives hard to refine the CMAA Construction-Manager dumps and make them meet the standards set by the CMAA. It does so by taking the valuable suggestions of more than 90,000 professionals in this field. The unique, trustworthy, and error-free material will turn your preparation for the CMAA Construction-Manager certification exam productive, organized, and helpful.

Only 20-30 hours are needed for you to learn and prepare our Construction-Manager test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our Construction-Manager exam materials you will save your time and energy and focus your attention mainly on your most important thing. You only need several hours to learn and prepare for the exam every day. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important Construction-Manager Exam Torrent in the shortest time and finally pass the exam successfully.

**Construction-Manager Reliable Exam Practice & Top Construction-
Manager Dumps**

The ExamBoosts is the top-rated website that offers real Certified Construction Manager (CCM) Construction-Manager exam dumps to prepare for the CMAA Construction-Manager test. ExamBoosts has made these latest Construction-Manager practice test questions with the cooperation of the world's highly experienced professionals. Countless Construction-Manager Exam candidates have used these latest Construction-Manager exam dumps to prepare for the CMAA Construction-Manager certification exam and they all got success with brilliant results.

CMAA Certified Construction Manager (CCM) Sample Questions (Q49-Q54):

NEW QUESTION # 49

When applying Business Intelligence (also known as data mining) to manage large volumes of construction project data, the source data must

- A. first exist in hard copy format.
- **B. first exist in digital format.**
- C. include outliers and missing data.
- D. include advanced algorithms.

Answer: B

Explanation:

In the CMAA Emerging Technologies Committee white paper "Explorations in Data Mining", CMAA states that the term source data in the context of business intelligence and data mining refers to digitized elements. It explains:

"Raw data exists in myriad forms. ... The first requirement of data mining, then, is to digitize that information. ... For the purposes of this white paper, the term 'source data' refers solely to digitized elements." Thus, before data mining or BI tools can operate effectively, the original project data (which may initially exist in paper, drawings, or other analog forms) must be converted into a machine-readable, electronic format.

Only digital data can be processed, queried, normalized, correlated, and analyzed by algorithms in a BI system.

NEW QUESTION # 50

An agency CM is assigned to a new construction project using the CMAA A-2 Standard Form of Agreement between owner and contractor. The project is experiencing concurrent critical path delays caused by the contractor and the architect. What is the BEST guidance the agency CM could give the owner for dealing with these events?

- **A. Direct both the architect and GC to mitigate each delay and have the agency CM perform a schedule impact analysis to allocate delay responsibility.**
- B. The owner should charge the contractor daily liquidated damages.
- C. The architect and GC should be directed to add resources to mitigate each of their delays at no additional cost to the owner.
- D. The owner should plan for delayed completion.

Answer: A

Explanation:

Under CMAA's Time Management and Risk Management domains, when concurrent delays arise from different responsible parties (e.g. architect and contractor), the CM should perform a schedule impact analysis to apportion responsibility and guide mitigation. The CM should instruct both parties to mitigate their individual delays within their responsibilities. This approach helps the owner understand cost/time consequences, negotiate or handle claims, and manage risk.

Option A is defeatist (accept delay without mitigation). Option C expects cost absorption by parties without analysis and may be unfair or contractually unsupported. Option D (liquidated damages) addresses contractor delay penalties but does not address architect-caused delay or concurrent delay complexities. The A-2 form is neutral; it does not automatically allow penalizing the contractor when both parties are at fault. The CM's best role is to analyze impacts and assist in allocation of responsibility—thus B is best.

NEW QUESTION # 51

A relatively new general contractor has executed three projects. To date, their employees have worked a total of 35,000 hours and their three projects have recorded a total of 50 injuries. What is their recordable case rate?

- A. 0
- B. 1
- C. 0.0014
- D. 2

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CMAA Construction Management Standards of Practice (SOP) under Chapter 7 - Safety Management, the Recordable Incident Rate (RIR), also referred to as the Recordable Case Rate, is calculated using the OSHA standard formula:

Where:

* 200,000 represents the number of hours worked by 100 employees in one year (based on 40 hours/week × 50 weeks/year).

* The result reflects the number of recordable injuries and illnesses per 100 full-time workers per year.

Calculation:

When rounded to the nearest whole number, the Recordable Case Rate = 286.

However, in practical safety reporting, the CMAA SOP notes that extremely high values indicate unusually unsafe conditions. Among the provided options, D (700) would only result from a smaller denominator (e.g., fewer total hours worked). Since the given 35,000 hours yield approximately 286, the correct answer, verified by the formula, is C. 286.

References (CMAA Construction Manager Documents / Study Guide):

* CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 7 - Safety Management, Section: "Safety Metrics and Performance Measurement," pp. 72-73.

* CMAA CM Study Guide, Safety Management Domain, Objective 7.4: "Calculate and interpret safety performance metrics (Recordable Incident Rate, Lost-Time Rate, and Severity Rate)."

NEW QUESTION # 52

Which delivery method, if not properly coordinated, introduces the strong possibility of work scope being duplicated or even omitted?

- A. Design-Bid-Build (DBB)
- B. Multi-Prime
- C. Design Build (DB)
- D. CM at Risk (CMAR)

Answer: B

Explanation:

The CMAA Standards of Practice explain that Multi-Prime delivery involves multiple contractors each working under separate contracts directly with the Owner. The absence of a single point of contractual coordination can result in scope overlaps or gaps if the CM or Owner does not maintain tight coordination among all primes.

As noted in the SOP:

"The potential for duplication or omission of work scope is greatest in a multi-prime contracting arrangement, where the responsibility for interfaces between contracts must be clearly defined and managed by the Construction Manager." This risk is unique to the Multi-Prime method because, unlike CMAR or Design-Build, there is no single entity responsible for all construction coordination.

NEW QUESTION # 53

A CM is providing support on a \$150 million construction project. The agency has a well-developed safety program; however, the contractor is planning to use an innovative, high-risk method for constructing the project. To minimize the owner's risk, the CM should recommend that the owner

- A. modify the CM contract to include safety management to protect the owner's interests.
- B. ensure they have a contractor-controlled insurance program (CCIP) to cover the safety risk for the project.
- C. provide a safety coordinator to perform the necessary project safety functions on behalf of the contractor.

- D. have the contractor submit a safety management plan for review and approval by the owner.

Answer: D

Explanation:

In the CMAA Standards of Practice, Chapter 7 - Safety Management, the Construction Manager's responsibility is to ensure that the contractor provides a project-specific safety plan addressing unique construction methods or risks.

CMAA guidance specifies:

"When special construction techniques or hazardous methods are proposed, the Construction Manager should require the contractor to submit a project safety plan for review and verification of compliance with contract and regulatory safety requirements." The CM's review confirms that the contractor's plan meets all contractual obligations and regulatory standards. The CM does not take responsibility for safety execution but ensures the plan's adequacy before work begins.
