Free Cisco 350-501 Exam Questions Updates for 1 year Continue Throughout

Our 350-501 exam materials have free demos for candidates who want to pass the exam, you are not required to pay any amount or getting registered with us that you can download our dumps. If you want to check the quality of our 350-501 exam materials, you can download the demo from our website free of charge. Our 350-501 exam materials demo will fully show you the characteristics of the actual exam question, therefore, you can judge whether you need it or not. We believe that the unique questions and answers of our 350-501 Exam Materials will certainly impress you. It will help you make decisions what benefit you and help you pass the exam easily. In addition, our expert of ExamsTorrent will provide candidates with specially designed materials in order to access

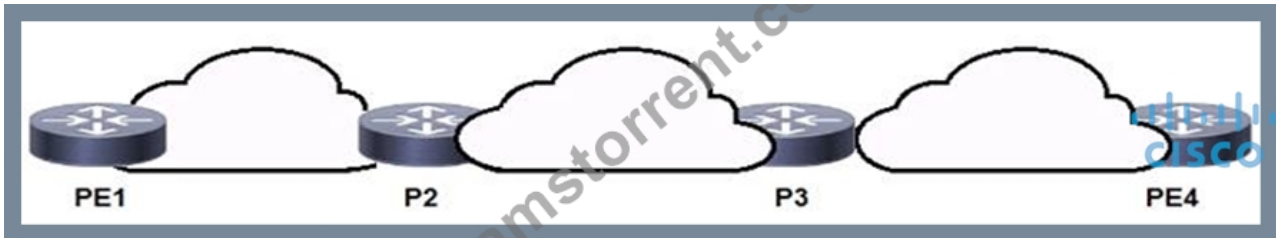

your understanding of various questions. Choosing our 350-501 exam materials will definitely give you an unexpected results and surprise.

Cisco 350-501 certification exam is designed for professionals who want to demonstrate their knowledge and skills in implementing and operating Cisco service provider network core technologies. 350-501 exam is part of the CCNP Service Provider certification and is a requirement for obtaining the certification. 350-501 Exam Tests the candidate's knowledge of networking concepts, protocols, and technologies used in service provider environments.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q23-Q28):

NEW QUESTION # 23

Refer to the exhibit:

P3 and PE4 are at the edge of the service provider core and serve as ABR routers. Aggregation areas are on either side of the core. Which statement about the architecture is true?

- A. To support seamless MPLS, TDP must be used as the label protocol
- **B. If each area is running its own IGP, BGP must provide an end-to-end MPLS LSP**
- C. To support seamless MPLS, the BGP route reflector feature must be disabled
- D. If each area is running its own IGP, the ABR routers must redistribute the IGP routing table into BGP

Answer: B

NEW QUESTION # 24

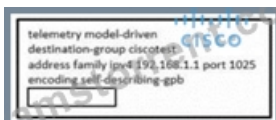

What are the two uses of the YANG data modeling language? (Choose two.)

- A. It is used to replace RESTCONF as a mechanism to install and manipulate configuration.
- **B. It is used to model the configuration used by NETCONF operations.**
- **C. It is used to shape state data of network elements.**
- D. It is used to replace the OSI model for troubleshooting.
- E. It is used to access a device by HTTP.

Answer: B,C

NEW QUESTION # 25

Refer to the exhibit.

A Cisco engineer is implementing gRPC dial-out on an ASR. Receiver 192.168.1.1 will be assigned one of the subscriptions, and it will manage the ASR. Which command is needed to complete the router configuration?

- **A. protocol tcp**
- B. protocol all
- C. protocol any
- D. protocol grpc

Answer: A

Explanation:

- Transmission Control Protocol (TCP): used for only dial-out mode.
- User Datagram Protocol (UDP): used for only dial-out mode.

NEW QUESTION # 26

An engineer working for telecommunication company with an employee id: 3715 15 021 needs to secure the LAN network using a prefix list. Which best practice should the engineer follow when he implements a prefix list?

- A. The final entry in a prefix list must be /32
- B. An engineer must include only the prefixes for which he needs to log activity.
- C. An engineer must identify the prefix list with a number only
- D. An engineer must use non sequential sequence numbers in the prefix list so that he can insert additional entries later.

Answer: D

NEW QUESTION # 27

Refer to the exhibit.

```
Router(config)# ip access-list standard Suppressed
Router(config-std-nacl)# permit 10.16.6.0 0.0.0.255
Router(config)# route-map SuppressMap
Router(config-route-map)# match ip address Suppressed
```

An engineer is implementing BGP selective prefix suppression. The router must advertise only 10.16.4.0/24, 10.16.5.0/24, and summarized route 10.16.0.0/21, and suppress 10.16.6.0/24. Which configuration must the engineer apply to the router?

- A.

```
Router (config)# router bgp 300
Router(config-router)# aggregate-address 10.16.0.0 255.255.248.0 as-set suppress-map SuppressMap
```
- B.

```
Router (config)# router bgp 300
Router(config-router)# aggregate-address 10.16.6.0 255.255.255.0 as-set suppress-map SuppressMap
```
- C.

```
Router (config)# router bgp 300
Router(config-router)# aggregate-address 10.16.6.0 255.255.252.0 as-set suppress-map SuppressMap
```
- D.

```
Router (config)# router bgp 300
Router(config-router)# aggregate-address 10.16.0.0 255.255.255.0 as-set suppress-map unSuppressMap
```

Answer: D

Explanation:

The configuration in Option D is correct for implementing BGP selective prefix suppression according to the requirements. The "aggregate-address" command is used to configure the advertisement of the summarized route 10.16.0.0/21, and the "suppress-map" option allows for selective suppression of specific prefixes, in this case, 10.16.6.0/24.
