Test JN0-1103 Questions Pdf | JN0-1103 Online Version

As we know, information disclosure is illegal and annoying. Of course, we will strictly protect your information. That's our society rule that everybody should obey. So if you are looking for a trusting partner with right JN0-1103 guide torrent you just need, please choose us. I believe you will feel wonderful when you contact us. We have different JN0-1103 prep guide buyers from all over the world, so we pay more attention to the customer privacy. Because we are in the same boat in the market, our benefit is linked together. If your privacy let out from us, we believe you won't believe us at all. That's uneconomical for us. In the website security, we are doing well not only in the purchase environment but also the JN0-1103 Exam Torrent customers' privacy protection. We are seeking the long development for JN0-1103 prep guide.

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Center Network Design: This section of the exam measures skills of Data Center Network Engineers and covers considerations for general data center network design. Topics include data center design best practices, understanding traffic patterns, virtual chassis implementation, and environmental considerations. The section also delves into data center fabric architectures, benefits of IP fabric over traditional architectures, spine-and-leaf device placement, underlay and overlay design, routing protocol selection, and best practices for IP fabric scaling.
Topic 2	<ul style="list-style-type: none">• Securing the Network: This section of the exam measures the skills of Security Architects and covers essential security design principles. It encompasses general security considerations, strategies for securing data centers and campus WANs, and the implementation of zero-trust security models. Additionally, it delves into Secure Access Service Edge (SASE) frameworks to enhance network security posture.

Topic 3	<ul style="list-style-type: none"> • Customer Network Design Requirements: This section of the exam measures skills of Network Design Engineers and covers the foundational aspects of network design. It includes understanding Juniper's life-cycle service approach, defining proposal boundaries, and considerations for both greenfield and brownfield deployments. The section also addresses top-down network design methodologies and capacity planning to ensure scalable and efficient network infrastructures.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q231-Q236):

NEW QUESTION # 231

You are asked to examine the infrastructure requirements needed to provision a new network build in support of a customer who wants to take advantage of their service provider's MPLS/VPN offering.

Which three considerations would be relevant to this work? (Choose three.)

- A. backdoor connectivity requirements
- B. supplicant roles in the current network layout
- C. IGP protocols deployed in the customer environment
- D. server hypervisor and host OS selection
- E. site-to-site versus site-to-hub communications

Answer: A,C,E

NEW QUESTION # 232

Which data-interchange format is used to automate JUNOS?

- A. C++
- B. Fortran
- C. JSON
- D. Java

Answer: C

NEW QUESTION # 233

Multiple customer sites are connected through your service provider network using a Layer 3 VPN. You must design the Layer 3 VPN so that the traffic sent between sites is encrypted.

Which technology would you use to accomplish this task?

- A. Use OSPF with IPsec authentication.
- B. Use IPsec with AH.
- C. Use IPsec with ESP.
- D. Use GRE with a key sequence number.

Answer: C

Explanation:

To ensure encryption of traffic between customer sites over a Layer 3 VPN, the most effective solution is IPsec with ESP (Encapsulating Security Payload). ESP provides both encryption and authentication, ensuring data confidentiality and integrity across the service provider network.

NEW QUESTION # 234

Your customer is a growing enterprise with limited capital to invest in network expansions.

They have noticed performance problems in their campus LAN, which have been traced back to a high oversubscription ratio between the aggregation and core layers. The customer's aggregation and core switches are connected using a single 1GbE connection.

Which solution improves network performance?

- A. Add additional 1GbE connections between the aggregation and core layers with MACsec.
- B. Add additional 1GbE connections between the aggregation and core layers with PNAC.
- C. Add additional 1GbE connections between the aggregation and core layers with LACP.
- D. Add additional 1GbE connections between the aggregation and core layers with LLDP.

Answer: C

NEW QUESTION # 235

What is the maximum number of chassis supported in an SRX Series chassis cluster?

- A. twenty
- B. ten
- C. two
- D. four

Answer: C

NEW QUESTION # 236

.....

For candidates who are going to buy the JN0-1103 questions and answers online, they pay more attention to the prospect of personal information. We respect the privacy of our customers. If you buy the JN0-1103 exam dumps from us, your personal information such as your email address or name will be protected well. Once the order finishes, the information about you will be concealed. In addition, JN0-1103 Questions and answers are revised by professional specialists, therefore they are high-quality, and you can pass the exam by using them.
