C-BCBAI-2502인증덤프공부자료, C-BCBAI-2502높은 통과율 시험덤프공부

최근 SAP인증 C-BCBAI-2502시험이 IT업계에서 제일 높은 인지도를 가지고 있습니다.바라만 보지 마시고SAP인증 C-BCBAI-2502시험에 도전해보세요. Pass4Test 의 SAP인증 C-BCBAI-2502덤프로 시험준비공부를 하시면 한방에 시험패스 가능합니다. SAP인증 C-BCBAI-2502덤프로 자격증취득에 가까워지고 나아가서는 IT업계에서 인정을 받는 열쇠를 소유한것과 같다고 할수 있습니다.

최신 SAP Certified Associate C-BCBAI-2502 무료샘플문제 (Q15-Q20):

질문 # 15

Which SAP module focuses on workplace safety and environmental compliance? Please choose the correct answer.

- A. SAP Environment, Health, and Safety (EHS)
- B. SAP Financial Closing Cockpit
- C. SAP Business Network
- D. SAP Predictive Analytics

정답: A

설명:

SAP Environment, Health, and Safety (EHS) is the dedicated module for managing workplace safety and environmental compliance, ensuring organizations meet regulatory and sustainability standards. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing workplace safety, environmental compliance, and sustainability initiatives. It helps organizations comply with global regulations, ensure safe working conditions, and track environmental performance." SAP EHS enables companies to "monitor workplace incidents, manage safety

protocols, and report on environmental compliance," such as emissions and waste management, to meet regulatory requirements. For example, it supports "tracking and reporting environmental data" to ensure adherence to standards, aligning with SAP's sustainability-focused solutions.

The incorrect options are unrelated to workplace safety and environmental compliance. SAP Business Network focuses on supplier collaboration and procurement, not safety or compliance. SAP Financial Closing Cockpit is used for financial reporting, not environmental or safety management. SAP Predictive Analytics supports forecasting and trend analysis, not compliance. SAP EHS is the clear choice for this purpose, as confirmed by its role in SAP's sustainability portfolio.

질문 # 16

How does SAP AI improve financial forecasting and reporting?

There are 3 correct answers to this question.

Response:

- A. Automated financial risk assessment
- B. Conversational AI for customer service automation
- C. SAP Blockchain for invoice validation
- D. AI-powered predictive analytics for financial trends
- E. AI-based anomaly detection in financial transactions

정답: A,D,E

질문 # 17

A manufacturing firm wants to use AI to predict machine failures and optimize maintenance schedules. Which SAP solutions should they implement?

There are 3 correct answers to this question.

Response:

SAP Predictive Maintenance

- A. SAP Blockchain for Business
- B. SAP Conversational AI
- C. SAP AI Business Services
- D. SAP Digital Manufacturing Cloud

정답: B,C,D

질문 # 18

How does SAP Ariba contribute to supply chain sustainability? Please choose the correct answer.

- A. By providing sales forecasting insights
- B. By tracking HR compliance
- C. By managing workforce training
- D. By monitoring supplier risks and compliance

정답: D

설명:

SAP Ariba contributes to supply chain sustainability by enabling organizations to manage supplier relationships and ensure compliance with sustainability standards. The correct answer is "By monitoring supplier risks and compliance," as this is the primary way SAP Ariba supports sustainable supply chain practices.

SAP documentation explains: "SAP Ariba helps organizations build sustainable supply chains by monitoring supplier risks and ensuring compliance with environmental, social, and governance (ESG) standards." It provides tools to "assess supplier performance, track compliance with sustainability regulations, and mitigate risks related to unethical practices or environmental violations." For example, SAP Ariba's supplier risk management capabilities allow companies to evaluate suppliers based on sustainability criteria, ensuring responsible sourcing and reducing environmental impact. This aligns with SAP's broader sustainability goals, as seen in solutions like SAP Sustainability Control Tower.

The incorrect options are unrelated to SAP Ariba's role in supply chain sustainability. Managing workforce training is an HR function, typically handled by SAP SuccessFactors. Providing sales forecasting insights is a marketing function, not specific to SAP

Ariba. Tracking HR compliance is also an HR task, not a supply chain function. SAP Ariba's focus on supplier management and compliance makes it the clear choice for this purpose.

질문 # 19

How does SAP AI improve financial forecasting and reporting? Note: There are 3 correct answers to this question.

- A. Automated financial risk assessment
- B. Conversational AI for customer service automation
- C. SAP Blockchain for invoice validation
- D. AI-powered predictive analytics for financial trends
- E. AI-based anomaly detection in financial transactions

정답: A,D,E

설명:

SAP AI enhances financial forecasting and reporting by leveraging advanced analytics, automation, and anomaly detection to improve accuracy and mitigate risks. The correct answers are AI-powered predictive analytics for financial trends, automated financial risk assessment, and AI-based anomaly detection in financial transactions, as these are core functionalities documented in SAP's financial AI solutions.

SAP documentation states: "SAP AI in finance, embedded in solutions like SAP S/4HANA, improves financial forecasting and reporting through predictive analytics, automated risk assessment, and anomaly detection." AI-powered predictive analytics enables "forecasting expected incoming payments and financial trends" by analyzing historical and real-time data, as seen in SAP Collections Management. Automated financial risk assessment uses AI to "evaluate financial risks automatically," such as identifying high-risk accounts or potential cash flow issues, enhancing decision-making. AI-based anomaly detection supports "identifying unusual patterns in financial transactions," such as potential fraud, through solutions like SAP Cash Application, which mitigates financial losses.

The incorrect options-conversational AI for customer service automation and SAP Blockchain for invoice validation-are not relevant to financial forecasting and reporting. Conversational AI, powered by Joule, is designed for customer interactions, not financial processes. SAP Blockchain for invoice validation focuses on secure transactions, not forecasting or reporting. SAP's emphasis on AI-driven financial solutions, as seen in case studies like SAP S/4HANA Finance, confirms the selected functionalities.

질문 # 20
