## PL-600 Test Result & PL-600 Certification Cost

Life is beset with all different obstacles that are not easily overcome. For instance, PL-600 exams may be insurmountable barriers for the majority of population. However, with the help of our PL-600 exam questions, exams are no longer problems for you. The reason why our PL-600 Training Materials outweigh other PL-600 study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

### Microsoft Power Platform Solution Architect Sample Questions (Q12-Q17):

#### NEW QUESTION # 12

You need to recommend the field type to use for configuring meal selections during reservation. Which field type should you recommend?

- A. Option Set
- B. Global Option Set
- C. Two Options
- D. Lookup

**Answer: A**

Explanation:

Explanation

Scenario:

Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.

In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage - once you define its text values you can centrally manage it.

Example:

#### NEW QUESTION # 13

You are working with a customer to plan a go-live deployment to their production environment. The solution includes several apps and environment variables. The superuser team manages the production environment that is secured by using a specific environment Azure AD security group.

The following issues have been identified:

- \* The super user team cannot access make.powerapps.com to open and set the environment variables.
- \* Users are added to the environment Azure AD security group and are not able to access the model-driven app.
- \* Users are added to the environment Azure AD security group and are not able to access the canvas app.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' with three issues and their resolution options:

Issue	Resolution
The superuser team cannot set the environment variables.	<input type="checkbox"/> Assign the System Customizer role. <input checked="" type="checkbox"/> Assign the System Customizer role. <input type="checkbox"/> Assign the Basic User role. <input type="checkbox"/> Assign the Service Reader role. <input type="checkbox"/> Assign the Office Collaborator role.
Users cannot access the model-driven app.	<input type="checkbox"/> Assign the Basic User role. <input checked="" type="checkbox"/> Assign the Basic User role. <input type="checkbox"/> Assign the Service Reader role. <input type="checkbox"/> Assign the Office Collaborator role. <input type="checkbox"/> Add the Azure AD Security Group.
Users cannot access the canvas app.	<input checked="" type="checkbox"/> Add users to an Azure AD Security Group. <input type="checkbox"/> Assign the System Customizer role. <input type="checkbox"/> Assign the Service Reader role. <input type="checkbox"/> Add users to the superuser team. <input type="checkbox"/> Add users to an Azure AD Security Group.

Answer:

Explanation:

Answer Area

The screenshot shows the 'Answer Area' with green checkmarks indicating the correct resolution options for each issue:

Issue	Resolution
The superuser team cannot set the environment variables.	<input type="checkbox"/> Assign the System Customizer role. <input checked="" type="checkbox"/> Assign the System Customizer role. <input type="checkbox"/> Assign the Basic User role. <input type="checkbox"/> Assign the Service Reader role. <input type="checkbox"/> Assign the Office Collaborator role.
Users cannot access the model-driven app.	<input type="checkbox"/> Assign the Basic User role. <input checked="" type="checkbox"/> Assign the Basic User role. <input type="checkbox"/> Assign the Service Reader role. <input type="checkbox"/> Assign the Office Collaborator role. <input type="checkbox"/> Add the Azure AD Security Group.
Users cannot access the canvas app.	<input checked="" type="checkbox"/> Add users to an Azure AD Security Group. <input type="checkbox"/> Assign the System Customizer role. <input type="checkbox"/> Assign the Service Reader role. <input type="checkbox"/> Add users to the superuser team. <input type="checkbox"/> Add users to an Azure AD Security Group.

Explanation

The screenshot shows the 'Answer Area' with a red box highlighting the correct resolution options for each issue:

Issue	Resolution
The superuser team cannot set the environment variables.	<input type="checkbox"/> Assign the System Customizer role.
Users cannot access the model-driven app.	<input type="checkbox"/> Assign the Basic User role.
Users cannot access the canvas app.	<input type="checkbox"/> Add users to an Azure AD Security Group.

#### NEW QUESTION # 14

A medical device company invites you as a Solution Architect to help with their new Power Platform internal applications. You know a little about medical devices and need to discover information about the business and its processes.

What three steps should you take during a discovery process?

- A. Research and assess the company's stock performance for the last five years

- B. Job shadowing different users
- C. Ask for a list of the closest competitors
- D. Organize workshops with the targeted groups of people involved in a project
- E. Ask for the demo of their current solution

**Answer: B,D,E**

Explanation:

When an organization seeks your help as Power Platform Solution Architect, you need to spend some time discovering the business, processes, needs, and customers. During discovery, you learn about the company, their current solutions, their vision for the new applications, needs, processes, and their customers or solution users.

You can learn about their business from open information sources. Also, you can ask for demos of their current applications. The best way to collect information about the project and the company's needs is to organize workshops with the targeted group of people involved in the project. Your main tool should be the question "Why?" - Why do you need this new solution? Or Why do you think the Power Platform is the best choice for your solution? These types of open-ended questions should help you to understand the company's needs and expectations. To have a firsthand view of the company's operations, ask to shadow the users of the systems. Job shadowing helps the better understanding of the user's needs and expectations.

### NEW QUESTION # 15

Drag and Drop Question

A company plans to integrate a model-driven app with external data sources.

The company has the following requirements:

- Consume data in its data warehouse from Microsoft Dataverse.
- Use a plug-in to retrieve information from an external service.

You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements. Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Azure components

- Azure Event Hub
- Azure Service Bus
- Azure Data Factory
- Azure Synapse Link

#### Answer Area

##### Requirement

Consume data in a data warehouse.

Consume data from an external source.

##### Azure component

- 
- 

**Answer:**

Explanation:

#### Azure components

- Azure Event Hub
- Azure Data Factory

#### Answer Area

##### Requirement

Consume data in a data warehouse.

Consume data from an external source.

##### Azure component

Azure Synapse Link

Azure Service Bus

### NEW QUESTION # 16

You are designing a Microsoft Power Platform solution for a company.  
Which components should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	<ul style="list-style-type: none"><li>Business rule</li><li>Power Automate flow</li><li>Asynchronous plug-in</li><li>Background workflow</li></ul>
Prompt users to update each opportunity product record when an opportunity is won or lost.	<ul style="list-style-type: none"><li>JavaScript code</li><li>Real-time workflow</li><li>Power Automate flow</li><li>Asynchronous plug-in</li></ul>

Answer:

Explanation:

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	<ul style="list-style-type: none"><li><b>Business rule</b></li><li>Power Automate flow</li><li>Asynchronous plug-in</li><li>Background workflow</li></ul>
Prompt users to update each opportunity product record when an opportunity is won or lost.	<ul style="list-style-type: none"><li>JavaScript code</li><li>Real-time workflow</li><li><b>Power Automate flow</b></li><li>Asynchronous plug-in</li></ul>
