Latest FCSS_SDW_AR-7.6 Test Online | High-quality FCSS_SDW_AR-7.6 Dumps Guide: FCSS - SD-WAN 7.6 Architect 100% Pass

Under the situation of intensifying competition in all walks of life, will you choose to remain the same and never change or choose to obtain a FCSS_SDW_AR-7.6 certification which can increase your competitiveness? I think most of people will choose the latter, because most of the time certificate is a kind of threshold, with FCSS_SDW_AR-7.6 Certification, you may have the opportunity to enter the door of an industry. And our FCSS_SDW_AR-7.6 exam questions will be your best choice to gain the certification.

Fortinet FCSS - SD-WAN 7.6 Architect Sample Questions (Q40-Q45):

NEW QUESTION # 40

An SD-WAN member is no longer used to steer SD-WAN traffic. The administrator updated the SD-WAN configuration and deleted the unused member. After the configuration update, users report that some destinations are unreachable. You confirm that the affected flow does not match an SD-WAN rule.

What could be a possible cause of the traffic interruption?

- A. FortiGate can remove some static routes associated with an interface when the member is removed from SD-WAN.
- B. FortiGate, with SD-WAN enabled, cannot route traffic through interfaces that are not SD-WAN members.
- C. FortiGate administratively brings down interfaces when they are removed from the SD-WAN configuration.
- D. FortiGate removes the layer 3 settings for interfaces that are removed from the SD-WAN configuration.

Answer: A

Explanation:

When an SD-WAN member is deleted, FortiGate can also remove static routes that were tied to that interface. If those routes are needed for destinations not covered by SD-WAN rules, traffic to those networks becomes unreachable. This explains why flows not matching SD-WAN rules are interrupted after the member was removed.

NEW QUESTION # 41

(Refer to the exhibit.

Based on the output shown in the exhibit, what can you conclude about the device role and how it handles health checks? Choose one answer.)

- A. The device is a hub and it receives health-check measures for the tunnels of a spoke.
- **B. The device is a spoke and it provides embedded health-check measures for each tunnel to the hub.**
- C. The device is a hub and it receives embedded health-check measures for each tunnel from the spoke.
- D. The device is a spoke and it receives health-check measures for the tunnels of another spoke.

Answer: B

NEW QUESTION # 42

Refer to the exhibit. An administrator configures SD-WAN rules for a DIA setup using the FortiGate GUI. The page to configure the source and destination part of the rule looks as shown in the exhibit. The GUI page shows no option to configure an application as the destination of the SD-WAN rule Why?

- A. FortiGate allows the configuration of applications as the destination of SD-WAN rules only on the CLI.
- **B. You must enable the feature first using the GUI menu System > Feature Visibility.**
- C. You cannot use applications as the destination when FortiGate is used for a DIA setup.
- D. You must enable the feature on the CLI.

Answer: B

Explanation:

To configure applications as destinations in SD-WAN rules via the GUI, the Application Control feature must be enabled in System > Feature Visibility. Once enabled, the GUI displays the application-based options.

NEW QUESTION # 43

Refer to the exhibit. You configure SD-WAN on a standalone FortiGate device. You want to create an SD-WAN rule that steers Facebook and LinkedIn traffic through the less costly internet link. The FortiGate GUI page appears as shown in the exhibit. What should you do to set Facebook and LinkedIn as destinations?

- A. Install a license to allow applications as destinations of SD-WAN rules.
- B. You cannot configure applications as destinations of an SD-WAN rule on a standalone FortiGate device.
- C. Enable the applications as destinations of the SD-WAN rule feature visibility.
- **D. In the Internet service field, select Facebook and LinkedIn.**

Answer: D

Explanation:

In an SD-WAN rule, you can steer application traffic by using Internet Service Database (ISDB) entries. Facebook and LinkedIn are predefined ISDB objects in FortiGate, so the correct way is to select them in the Internet service field under Destination. This ensures that all traffic to these applications is matched and routed through the chosen (less costly) link.

NEW QUESTION # 44

Exhibit.

Refer to the exhibit, which shows the SD-WAN rule status and configuration.

Based on the exhibit, which change in the measured packet loss will make HUB1-VPN3 the new preferred member?

- A. When HUB1-VPN1 has 4% packet loss

- B. When HUB1-VPN3 has 4% packet loss
- C. When HUB1-VPN1 has 12% packet loss
- D. When all three members have the same packet loss

Answer: D

NEW QUESTION # 45

.....

Many people choose to sign up for the Fortinet FCSS_SDW_AR-7.6 certification examinations in order to advance their knowledge and abilities. We offer updated and actual Fortinet FCSS_SDW_AR-7.6 Dumps questions that will be enough to get ready for the Fortinet FCSS_SDW_AR-7.6 test. Our Fortinet FCSS_SDW_AR-7.6 questions are 100% genuine and will certainly appear in the next Fortinet FCSS_SDW_AR-7.6 test.
