

# 100% Pass CMMC-CCA - Perfect Certified CMMC Assessor (CCA) Exam Reliable Exam Labs

P.S. Free & New CMMC-CCA dumps are available on Google Drive shared by Easy4Engine: <https://drive.google.com/open?id=1tNgeC9thiCrQwOMhvMhvXStXFHQgf2qe>

Our experts all have a good command of exam skills to cope with the CMMC-CCA preparation materials efficiently in case you have limited time to prepare for it, because all questions within them are professionally co-related with the CMMC-CCA exam. Moreover, to write the Up-to-date CMMC-CCA Practice Braindumps, they never stop the pace of being better. As long as you buy our CMMC-CCA study quiz, you will find that we update it from time to time according to the exam center.

## Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.</li> </ul>

## Cyber AB CMMC-CCA Clearer Explanation, Valid CMMC-CCA Dumps Demo

Here in this Desktop practice test software, the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) practice questions given are very relevant to the actual Certified CMMC Assessor (CCA) Exam (CMMC-CCA) exam. It is compatible with Windows computers. Easy4Engine provides its valued customers with customizable Certified CMMC Assessor (CCA) Exam (CMMC-CCA) practice exam sessions. The Certified CMMC Assessor (CCA) Exam (CMMC-CCA) practice test software also keeps track of the previous Cyber AB CMMC-CCA practice exam attempts.

## Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q50-Q55):

### NEW QUESTION # 50

Ron is the Lead Assessor for an OSC's CMMC assessment. His team has scheduled interviews and demonstrations with the OSC's system administrator, Olivia. However, on the first day, the CEO informs Ron that Olivia is very ill and is unavailable. The CEO offers to be interviewed about Olivia's responsibilities instead, even though he does not actually perform those tasks. What should Ron do in this scenario?

- A. Interview the CEO.
- B. Reschedule the interviews with Olivia or continue with another person who understands and performs Olivia's duties while she is away.
- C. It depends on the specific details discussed during the interview with the CEO.
- D. Have the CEO accompanied by another IT rep during the interview.

**Answer: B**

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CAP requires interviews with individuals who perform the tasks, not proxies like the CEO (Options A, B, C). Option D ensures compliance by seeking the appropriate personnel.

Extract from Official Document (CAP v1.0):

\* Section 2.2 - Conduct Assessment (pg. 25): "Interviews and demonstrations must be conducted with the person responsible for carrying out the work." References:

CMMC Assessment Process (CAP) v1.0, Section 2.2; CoPC Paragraph 2.4.

### NEW QUESTION # 51

Removable media can pose significant cybersecurity risks to an organization if not adequately controlled and secured. Understanding the dangers of this, an OSC has crafted a meticulous removable media policy. It defines removable media, types of removable media, examples of removable media, etc. The policy limits the use of removable media unless authorized; even then, the media must be scanned for malware. Organizational removable media has specific signatures unique to organizational systems and provided to a defined group of personnel. Any data stored on such media is encrypted, and the OSC has disabled autorun and closed some ports on their computer systems. The contractor also has deployed an endpoint protection solution for every employee searched while entering or leaving the facility. Users must also pass through a walk-in metal detector to ensure they do not sneak in thumb drives and SD cards. Based on the OSC's effort, how would you score their implementation of CMMC practice MP.L2-3.8.7 - Removable Media?

- A. Partially Met
- B. Not Applicable

- C. Not Met
- D. Met

**Answer: D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

MP.L2-3.8.7 requires "controlling removable media use on systems." The OSC's policy, restrictions, scanning, encryption, and technical/physical controls fully meet this, scoring Met (+1) for this 1-point practice. No gaps suggest Partial (C) or Not Met (D), and N/A (A) doesn't apply.

Extract from Official CMMC Documentation:

\* CMMC Assessment Guide Level 2 (v2.0), MP.L2-3.8.7: "Control removable media with policy, scanning, and encryption."

\* DoD Scoring Methodology: "1-point practice: Met = +1."

### NEW QUESTION # 52

Some OSCs share real estate with other companies. To protect FCI/CUI behind unmanned entrances to buildings, floors, or other areas where FCI/CUI is created, used, stored, or transmitted, which of the following is the BEST method?

- A. One-way gates which require proper credentials or intercom authorization to unlock and permit entry
- B. Turnstiles to limit access
- C. Cameras to monitor and record foot traffic
- D. Bold signage with strong language to discourage entry

**Answer: A**

Explanation:

The Physical Protection (PE) practices require that unmanned access points to areas containing CUI be restricted with technical controls that only allow entry to authorized personnel. While cameras, signage, and turnstiles support security, they do not actually prevent access.

Extract from PE.L2-3.10.1:

"Limit physical access to organizational information systems, equipment, and the respective operating environments to authorized individuals." The strongest measure listed is one-way gates requiring credentials or intercom authorization, which directly enforces access control.

Reference: CMMC Assessment Guide - Level 2, PE.L2-3.10.1.

### NEW QUESTION # 53

An OSC employs guards to protect the manufacturing shop where a magnetic radar-absorbing coating is manufactured. This specific coating is used by the Army for a particular fleet of unmanned aerial vehicles (UAVs). The facility is under constant surveillance with the help of HD CCTVs. Within the OSC's facilities, there is a Vector Network Analyzer (VNA) that measures the reflection and transmission properties of the coating over a range of frequencies. Guards protect the OSC's anechoic chamber, and anyone entering must use an iris scanner and sign a physical form detailing their name and reason for being there. At the door is a huge sign reading "Authorized Personnel Only." Which of the following statements is true about handling the Vector Network Analyzer (VNA) in a CMMC assessment?

- A. The VNA should be reviewed in the SSP in accordance with practice CA.L2-3.12.4 - System Security Plan.
- B. The VNA should be assessed against CMMC practices.
- C. If appropriately documented, the assets should not be assessed against other CMMC practices.
- D. The VNA is out of scope for a CMMC assessment.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation:

The VNA, used to measure coating properties, is a Specialized Asset per the CMMC Assessment Scope - Level 2, as it is test equipment tied to contract performance. Specialized Assets are in scope but not assessed against the full 110 CMMC practices unless they process, store, or transmit CUI (not indicated here). Instead, they must be documented and reviewed in the SSP per

practice CA.L2-3.12.4 to ensure risk-based management. Option A is incorrect as it's in scope. Option C overextends the assessment requirement. Option D is vague but aligns partially with B, which is more precise.

Reference:

CMMC Assessment Scope - Level 2, Section 2.3.4 (Specialized Assets), p. 6: "Specialized Assets are reviewed in the SSP per CA.L2-3.12.4."

#### NEW QUESTION # 54

Conducting a CMMC assessment for an OSC includes interviewing, testing, or examining various Assessment Objects. As a CCA, you are part of an Assessment Team tasked with evaluating how an OSC has implemented AC.L2-3.1.4 - Separation of Duties. Which of the following is not an Assessment Object you would use to validate the OSC's implementation of AC.L2-3.1.4[a], "the duties of individuals requiring separation to reduce the risk of malevolent activity are defined"?

- A. Mechanisms implementing the separation of duties policy
- **B. Mechanisms that implement system audit logging**
- C. Personnel responsible for defining divisions of responsibility and separation of duties
- D. The organization's Access Control Policy

**Answer: B**

Explanation:

Comprehensive and Detailed in Depth Explanation:

AC.L2-3.1.4[a] focuses on defining duties requiring separation, per NIST SP 800-171A. Relevant Assessment Objects include the Access Control Policy (Option C), personnel defining duties (Option A), and mechanisms enforcing separation (Option D). Audit logging mechanisms (Option B) track actions, not duty definitions, making it irrelevant to this objective. Option B is the correct answer as the non-applicable object.

Reference Extract:

\* NIST SP 800-171A, AC-3.1.4[a]: "Examine access control policy and interview personnel; audit logging is not required for definition." Resources: <https://csrc.nist.gov/pubs/sp/800/171/a/final>

#### NEW QUESTION # 55

.....

With the rapid market development, there are more and more companies and websites to sell CMMC-CCA guide question for learners to help them prepare for exam, but many study materials have very low quality and low pass rate, this has resulting in many candidates failed the exam, some of them even loss confidence of their exam. You may be also one of them, you may still struggling to find a high quality and high pass rate CMMC-CCA Test Question to prepare for your exam. Your search will end here, because our study materials must meet your requirements.
