Real4exams will be the first time to provide you with exam information and exam practice questions and answers to let you be fully prepared to ensure 100% to pass APMG-International Certification AgilePM-Foundation Exam. Real4exams can not only allow you for the first time to participate in the APMG-International certification AgilePM-Foundation exam to pass it successfully, but also help you save a lot of valuable time.

Agile project management is a methodology that has become increasingly popular in recent years, particularly in the software development industry. It is a flexible and iterative approach to project management that focuses on delivering value to customers through continuous improvement, collaboration, and customer feedback. Agile project management is based on the Agile Manifesto, which outlines four core values and 12 principles for Agile software development.

APMG-International AgilePM-Foundation (Agile Project Management (AgilePM) Foundation) Exam is a certification program that is designed to provide individuals with a comprehensive understanding of agile project management principles and practices. Agile Project Management (AgilePM) Foundation Exam certification is suited for individuals who are interested in pursuing a career in project management or individuals who are already working in the field and want to improve their skills and knowledge.

AgilePM-Foundation exam is suitable for project managers, team leaders, business analysts, and anyone involved in Agile projects. The AgilePM-Foundation Certification is recognized globally and is highly valued by employers.

APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40

How are the business roles critical to the success of a DSDM project?

- A. Lead Solution Developer demonstrations
- **B. Guide the evolution of the solution at the detailed level**
- C. Provide formal progress reporting
- D. Make all decisions

Answer: B

Explanation:

Business roles are critical in a DSDM project as they guide the evolution of the solution at a detailed level. They provide day-to-day business direction and ensure that the solution being developed aligns with the business needs and objectives.

NEW QUESTION # 41

Which of the following statements about the technical Coordinator role is true?

The technical Coordination provides the same function from a technical perspective as the Business Ambassador does from a business perspective.

The technical Coordinator is responsible for ensuring that the solution confirm to the requested technical standards.

- A. Only 2 is true
- B. Neither 1 or 2 is true
- C. Only 1 is true
- **D. Both 1 and 2 are true**

Answer: D

Explanation:

Both statements about the Technical Coordinator role in AgilePM are true. The Technical Coordinator provides the same function from a technical perspective as the Business Ambassador does from a business perspective, ensuring that the technical aspects of the project align with the overall business objectives.

Additionally, the Technical Coordinator is responsible for ensuring that the solution conforms to the requested technical standards, overseeing the technical integrity and quality of the product throughout the development process.

NEW QUESTION # 42

Which of the following describes the role of the Product Owner in an Agile context?

- A. Responsible for approving the solution as technically fit for purpose prior to deployment
- **B. Accountable for maximizing the value of the product or service developed by the Delivery Team**
- C. Accountable for the Scrum Teams' effectiveness, improving their practices within the Scrum framework
- D. Responsible for monitoring progress against the baselined Delivery Plan

Answer: B

Explanation:

The Product Owner is value steward and single ordering voice for the product backlog. Their accountability is to maximize value from the team's work by clarifying outcomes, ordering backlog items, and ensuring transparency of goals, acceptance criteria, and readiness. They continuously engage customers and stakeholders, translate learning into backlog adjustments, and make scope trade-offs that protect time, cost, and quality. The Product Owner does not approve technical fitness (that sits with technical leadership and agreed quality criteria) nor manage a baselined delivery plan in a command-and-control sense; plans are living forecasts shaped by empirical evidence. Team effectiveness coaching belongs to the Scrum Master. By holding outcome accountability while collaborating closely with delivery and business roles, the Product Owner ensures increments align to strategy, benefits, and the evolving Business Case—precisely what option B states.

NEW QUESTION # 43

Which of the following statements about diverse teams are true?

* Provide greater creativity.

* Reach consensus sooner than teams of 'similar.'

- A. Both 1 and 2 are true.
- B. Only 2 is true.
- C. Only 1 is true.
- D. Neither 1 nor 2 is true.

Answer: C

Explanation:

* Statement 1: Correct. Diverse teams leverage different perspectives, leading to higher creativity and innovation, as Agile encourages collaborative solutions.

* Statement 2: Incorrect. Diverse teams typically take longer to reach consensus due to varying viewpoints and styles of communication, though the decisions they make are often more robust.

* Team Collaboration and Creativity: AgilePM Handbook, Chapter 5, Section 5.3.

NEW QUESTION # 44

Which of the following is a DSMD principle?

- A. Build incrementally in Timeboxes
- B. Build incrementally
- C. Build incrementally from firm foundations
- D. Build incrementally from Feasibility onwards

Answer: C
