SAP C_WME_2506 시험요강:

주제	소개
주제 1	Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.
주제 2	Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
주제 3	Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.

최신 SAP Certified Associate C_WME_2506 무료샘플문제 (Q41-Q46):

질문 # 41

You have created a Smart Walk-Thru to guide users creating a new department on a site. Depending on which option users select from a dropdown at one step in the process, they may need to complete a few additional items before moving forward. Which WalkMe feature could help address this alternate path in a Smart Walk-Thru?

- A. Popup Step
- B. Start Point
- C. Wait For Condition
- **D. Split**

정답: D

설명:

The Split feature in a Smart Walk-Thru allows Builders to create alternate paths based on user actions or conditions, such as selecting a specific dropdown option. In this case, if users choose a dropdown option that requires additional steps, the Split feature can branch the Smart Walk-Thru to guide them through those steps before rejoining the main flow. This ensures the Smart Walk-Thru adapts dynamically to user choices, providing tailored guidance.

The other options are incorrect:

- * Start Point(A) defines where a Smart Walk-Thru begins, not alternate paths.
- * Wait For Condition(B) pauses the flow until a condition is met, not for branching.
- * Popup Step(D) displays a message or input field, not for managing alternate paths.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2:

Smart Walk-Thrus):

"The Split feature enables branching in Smart Walk-Thrus based on user actions, such as dropdown selections, allowing customized guidance for different paths." The course Getting Started with Building WalkMe Solutions explains:

"Use Split steps to handle alternate paths in a Smart Walk-Thru, like additional steps for specific dropdown choices, ensuring flexible and accurate guidance." Option C, Split, is the correct feature for this scenario.
