CDCP Exam Simulator, CDCP Latest Test Bootcamp

BTW, DOWNLOAD part of ActualTorrent CDCP dumps from Cloud Storage: https://drive.google.com/open?id=1qJhmmgc-JeyEy7B1_-A2_SPLOkLbSSNZ

Our company is a professional certificate study materials provider. We have occupied in this field for years, we are in the leading position of providing exam materials. CDCP training materials of us is high-quality and accurate, for we have a profession team to verify and update the CDCP answers and questions. We have received many good feedbacks from our customers for helping pass the exam successfully. Furthermore, we provide you free update for one year after purchasing CDCP exam dumps from us.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Fire Safety • Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 2	• Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 3	• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 4	• Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.
Topic 5	• Equipment Racks: It discusses power rail • strip options, security considerations, and rack standards, properties and selection criteria.
Topic 6	• Water Supply: This topic is all about water supply techniques and application areas.
Topic 7	• Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.

Quiz Unparalleled EXIN - CDCP Exam Simulator

ActualTorrent web-based practice exam is compatible with all browsers and operating systems. Whereas the CDCP PDF file is concerned this file is the collection of real, valid, and updated EXIN CDCP exam questions. You can use the EXIN CDCP Pdf Format on your desktop computer, laptop, tabs, or even on your smartphone and start Certified Data Centre Professional (CDCP) (CDCP) exam questions preparation anytime and anywhere.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q24-Q29):

NEW QUESTION # 24
Which one of the following is an AC Power Quality Anomaly?

- A. Attenuation
- B. Signal Distortion
- C. Backup Condition
- D. Waveform Distortion

Answer: D

Explanation:
Waveform distortion is a type of AC power quality anomaly that occurs when the shape of the voltage or current waveform deviates from the ideal sinusoidal shape. Waveform distortion can be caused by nonlinear loads, such as rectifiers, inverters, variable frequency drives, and electronic devices, that draw current in pulses or harmonics. Waveform distortion can result in overheating, reduced efficiency, malfunctioning, or damage of equipment.
References: EPI Data Centre Training Framework, CDCP Preparation Guide, 5 anomalies in AC power that can damage your home devices, 9 Most Common Power Quality Problems

NEW QUESTION # 25
What is a potential risk when using floor mounted cool air ducting systems?

- A. The neighboring racks could have a potential cooling impact.
- B. Using floor mounted cool air ducting systems will increase the Computer room temperature
- C. Using floor mounted cool air ducting systems will increase the Computer room relative humidity.
- D. There are no risks when using floor mounted cool air ducting systems.

Answer: A

Explanation:
Floor mounted ducting can cause uneven cooling, potentially leading to overcooling or undercooling of adjacent racks, which affects performance and reliability.

NEW QUESTION # 26
An optical fiber cable comes with the specifications 50/125 um.
What do the numbers represent?

- A. The first number represents the required distance to single-phase power cabling; the second number represents the required distance to three-phase cabling.
- B. The first number represents the diameter of the core; the second number represents the diameter of the cladding in microns.
- C. The first number represents the distance for a 10 Gb/s connection; the second number represents the distance for a 1 Gb/s connection.
- D. The first number represents the diameter of the core; the second number represents the actual diameter cable including the buffer and jacket.

Answer: B

Explanation:
Optical fiber cables are composed of a core, a cladding, and a coating. The core is the central part of the fiber that carries the light

signal. The cladding is the layer surrounding the core that reflects the light back into the core and prevents signal loss. The coating is the protective layer that covers the cladding and provides mechanical strength and environmental protection. The specifications of an optical fiber cable indicate the dimensions of the core and the cladding in microns (#m), which are one millionth of a meter. For example, a
50/125 #m cable has a core diameter of 50 #m and a cladding diameter of 125 #m. The coating diameter is usually 250 #m, but it is not part of the specifications.

NEW QUESTION # 27
systems are designed specifically to protect the structure of a building.

- A. Pro-inert
- B. Total Flooding
- C. Water sprinkler
- D. Inergen

Answer: C

Explanation:
Water sprinkler systems are designed to protect the structure of a building from fire by suppressing or extinguishing the flames with water. Water sprinkler systems are typically installed in the ceiling or walls of a building and are activated by heat or smoke detectors. Water sprinkler systems can reduce the risk of fire spreading and causing structural damage to the building.

NEW QUESTION # 28
A fire extinguisher in the data centre is found which is classed as ABC.
Is this suitable?

- A. Yes
- B. No
- C. Only for fires not related to electrical power
- D. Depends on the brand

Answer: B

Explanation:
A fire extinguisher in the data centre that is classed as ABC is not suitable, because it contains dry chemical powder that can damage the ICT equipment and the data. ABC fire extinguishers are designed to fight Class A, B, and C fires, which are fueled by combustible materials, flammable liquids or gases, and electrical equipment, respectively. However, the dry chemical powder can leave a corrosive residue on the ICT equipment, which can cause short circuits, data loss, or malfunction. Moreover, the dry chemical powder can be difficult to clean, especially from the small spaces and crevices of the ICT equipment. Therefore, ABC fire extinguishers are not recommended for data centres, and should be replaced with more suitable fire extinguishers, such as clean agent fire extinguishers, which use gas or liquid that does not leave any residue or harm the ICT equipment.
