100% Pass Cisco - Pass-Sure 200-901 Brain Exam

The most important feature of the online version of our 200-901 learning materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the 200-901 Learning Materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

Cisco DevNet Associate Exam Sample Questions (Q158-Q163):

NEW QUESTION # 158

On which network plane is routing protocol traffic handled?

- A. authentication plane
- B. control plane
- C. management plane
- D. data plane

Answer: B

NEW QUESTION # 159

Refer to the exhibit.

For CLI commands that support XML, the `clid()` method returns JSON output. An exception is thrown when XML is not used. Executes CLI commands. Takes CLI command string and returns show command output in a JSON form.

“

Note: The “clid” API can be useful when searching the output of show commands using JSON tools as shown in the example.

PYTHON

Example:

```
>>> import json
>>> from cli import
>>> jversion = json.loads(clid("show
version"))
>>> jversion['ios_ver_str']
'08.06'
```

Arguments:

- `cmd`: Single CLI command or a batch of CLI commands. Delimiter for multiple CLI commands is a space followed by a semicolon. Configuration commands must be in a fully qualified form.

Returns:

- string: JSON-formatted output of show commands.

```
>>> from cli import *
>>> import json

>>>
>>> cli('configure terminal ; interface loopback 5 ; no shut')
''
>>> intflist=json.loads(clid('show interface brief'))
>>> i=0
>>> while i < len (intflist['TABLE_interface']['ROW_interface']):
...     intf=intflist['TABLE_interface']['ROW_interface'][i]
...     i=i+1
...     if intf['state'] == 'up':
...         print intf['interface']
```

The python interpreter and the Cisco python SDK are available by default in the Cisco NX-OS software. The SDK documentation shows how the `clid()` API can be used when working with working with JSON and XML.

What are two effect of running the script? (Choose two.)

- A. show only the interfaces in admin shut status
- B. issue shutdown on interface loopback 5
- C. configure interface loopback 5
- D. show only the interfaces In the up status
- E. show details for the TABLE interface

Answer: C,D

NEW QUESTION # 160

By default, how does EIGRP determine the metric of a route for the routing table?

- A. It uses a default metric of 10 for all routes that are learned by the router.
- B. It uses a reference bandwidth and the actual bandwidth of the connected link to calculate the route metric.
- C. It uses the bandwidth and delay values of the path to calculate the route metric.
- D. It counts the number of hops between the receiving and destination routers and uses that value as the metric.

Answer: C

Explanation:

Section: IP Connectivity

NEW QUESTION # 161

How are load balancers used in modern application deployment?

- A. Allow http and https traffic to continue as old compute units are discontinued before new units are brought up.
- B. Turn off traffic and take down compute units, then update and bring the compute units back up.
- **C. Bring up new compute units, test the compute units, and switch the traffic from old units to new units.**
- D. Allow traffic to continue as new compute units are brought up and old compute units are taken down.

Answer: C

NEW QUESTION # 162

What is a capability of Cisco Webex?

- A. Join preconfigured or new spaces with fixed user rights.
- B. Initiate or respond to calls automatically via automation.
- **C. Get space history or notified in real time when new messages are posted.**
- D. Configure devices at scale via automation scripts or by manual execution.

Answer: C

Explanation:

Cisco Webex offers a range of collaboration capabilities, including real-time messaging, video conferencing, and integration with various productivity tools. Specifically, Webex allows users to:

* **Get Space History:** Users can retrieve historical messages and files shared within a space, ensuring they have access to all past communications and documents.

* **Real-Time Notifications:** Webex provides notifications when new messages are posted in spaces, allowing users to stay updated with ongoing conversations and respond promptly.

These features enhance the collaborative experience by ensuring users can keep track of conversations and receive timely updates.
