FC0-U71 Training Materials: CompTIA Tech+ Certification Exam & FC0-U71 Cram PDF & FC0-U71 Exam Guide

If you want to pass the shortest time to pass you exam, just find us. Our FC0-U71 Training Materials will have the collective of the questions and answers, it will help you to have a good command of the knowledge point, therefore make it possible for you to pass the exam. Besides money back guarantee if you fail to pass it, or we can change another exam dumps for you for free. All we do is just want to serve you better. Choose us and you will never regret.

CompTIA FC0-U71 Exam Syllabus Topics:

Topic	Details
Topic 1	• Security: This section of the exam measures skills of Cybersecurity Support Interns and covers essential cybersecurity principles, including confidentiality, data protection, user authentication, and malware threats. It also includes awareness of social engineering, encryption, and common best practices for device and network security.
Topic 2	• Infrastructure: This section of the exam measures skills of Network Support Trainees and covers essential knowledge of device setup, networking concepts, and physical and wireless connectivity. It includes an understanding of IP addressing, cables, ports, and basic infrastructure components like routers and switches necessary for setting up secure, functional networks.
Topic 3	• IT Concepts and Terminology: This section of the exam measures skills of aspiring IT Support Assistants and covers foundational knowledge such as types of computing devices, basic troubleshooting concepts, and understanding of common terminology. Candidates should grasp basic operational terms, roles of software and hardware, and be familiar with emerging tech like IoT and cloud computing.

Topic 4	• Applications and Software: This section of the exam measures the skills of Entry-Level Technical Analysts and covers commonly used software applications and their purposes. It involves understanding operating systems, mobile and desktop software, and the basics of software installation and configuration. This domain also touches on licensing and application support tools.
Topic 5	• Software Development Concepts: This section of the exam measures the skills of Junior Software Developers and introduces foundational knowledge of programming logic, data structures, and the software development life cycle. It includes awareness of coding concepts, algorithm basics, and scripting used in automated and task-based environments.

CompTIA Tech+ Certification Exam Sample Questions (Q102-Q107):

NEW QUESTION # 102
Which of the following must be configured to install a printer on a network?

- A. Physical address
- B. IP address
- C. Access point
- D. MAC address

Answer: B

Explanation:
A network printer must have an IP address configured so that devices on the network can locate and communicate with it.
Other options:
*MAC address is used at a lower network level but isn't configured by users,
*Physical address is another term for MAC address,
*Access point provides wireless connectivity but is not required just to install a printer.

NEW QUESTION # 103
An application is unresponsive. Which of the following will close the application?

- A. System utilities
- B. File permissions
- C. Remote assistance
- D. Task management

Answer: D

Explanation:
Task management tools such as Task Manager in Windows or Activity Monitor in macOS allow users to monitor running applications and processes. They also provide the functionality to force-close (end) applications that are not responding.
"Task Manager provides a way to close applications that are unresponsive and manage running processes." - CompTIA ITF+ Official Guide Correct answer: A

NEW QUESTION # 104
A systems administrator requires access to a user's laptop over a VPN for troubleshooting. Which of the following software types should the systems administrator use?

- A. Productivity
- B. Collaboration
- C. Remote assistance
- D. Web browsing

Answer: C

Explanation:

Remote assistance software allows a systems administrator to remotely access and control a user's device, especially over a VPN, for troubleshooting and support.
Other options:
*Collaboration tools are for team communication,
*Productivity software includes apps like word processors,
*Web browsing is unrelated to remote access.

NEW QUESTION # 105

A user attempts to log in to a website and receives a prompt to update their password. Which of the following is this an example of?

- A. Password expiration
- B. Password complexity
- C. Password history
- D. Password privacy

Answer: A

Explanation:
A prompt to update a password during login typically indicates that the password has expired based on the system's policy.
Other options:
*Password history prevents reuse of old passwords,
*Password complexity sets rules for character requirements,
*Password privacy involves keeping the password confidential.

NEW QUESTION # 106

A lab technician removes access from students who do not need to use a fileshare. Which of the following best describes this action?

- A. Non-repudiation
- B. Multifactor authentication
- C. Single sign-on
- D. Least privilege model

Answer: D

Explanation:
The least privilege model is a principle of giving users the minimum level of access needed to perform their roles. Removing unnecessary access aligns with this principle.
"Least privilege limits users to only the resources necessary for their duties, reducing the risk of unauthorized access." - CompTIA ITF+ Security Essentials Correct answer: A

NEW QUESTION # 107

......
