Latest and Real DEP-2025 Exam Questions in Three User-Friendly Formats

The Real4Prep is committed to making the Apple DEP-2025 certification exam preparation simple, smart, and successful. To achieve this objective Real4Prep is offering top-notch and real DEP-2025 exam questions in three different formats. The names of these Apple Deployment and Management Exam (DEP-2025) exam questions formats are PDF files, desktop practice test

software, and web-based DEP-2025 practice test software.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 2	<ul style="list-style-type: none">• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 3	<ul style="list-style-type: none">• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 4	<ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 5	<ul style="list-style-type: none">• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 6	<ul style="list-style-type: none">• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 7	<ul style="list-style-type: none">• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 8	<ul style="list-style-type: none">• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 9	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 10	<ul style="list-style-type: none">• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 11	<ul style="list-style-type: none">• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.

Apple Deployment and Management Exam Sample Questions (Q101-Q106):

NEW QUESTION # 101

A user forgot their password for their organization-owned Mac. Their Mac has FileVault turned on, and the key is escrowed to the MDM solution. What can the user use in macOS Recovery to reset their password?

- A. Institutional recovery key
- B. Secure token

- C. Personal recovery key
- D. Bootstrap token

Answer: C

Explanation:

The personal recovery key resets passwords. The macOS Security Overview states, "With FileVault enabled and the personal recovery key escrowed to MDM, users can use it in macOS Recovery to reset their password." Reference: macOS Security Overview, "FileVault Recovery" section. Apple Platform Deployment Guide, "Password Recovery" section.

NEW QUESTION # 102

Which type of Apple ID is required for Shared iPad?

- A. Managed Apple ID
- B. Shared Apple ID
- C. Personal Apple ID
- D. Apple ID

Answer: A

Explanation:

Shared iPad requires Managed Apple IDs, created via Apple School Manager (ASM) or Apple Business Manager (ABM), to enable multiple users to log in with separate sessions. These IDs are organization-controlled and integrate with MDM for session management. Personal Apple IDs (options B and C, the same) are for individual use and incompatible with Shared iPad. There's no "Shared Apple ID" (option D); Shared iPad uses individual Managed Apple IDs or temporary sessions. The Apple Platform Deployment Guide mandates Managed Apple IDs for Shared iPad.

NEW QUESTION # 103

Which feature prevents a wiped device from being reactivated without authorization?

- A. Find My
- B. iCloud
- C. Activation Lock
- D. MDM

Answer: C

Explanation:

Activation Lock is a security feature tied to a user's Apple ID or Managed Apple ID that prevents a wiped device from being reactivated without the original credentials or organizational authorization (via MDM or ABM/ASM). It's automatically enabled when Find My is active on a device with an Apple ID. Find My (option B) enables locating and wiping but doesn't enforce reactivation protection alone. MDM (option C) can manage Activation Lock but isn't the feature itself. iCloud (option D) supports Activation Lock but isn't the feature. The Apple Platform Security Guide explains Activation Lock's role in theft deterrence. Reference: Apple Platform Security Guide (Section: Activation Lock).

NEW QUESTION # 104

Which type of Apple ID is required for content caching?

- A. None of the above
- B. Managed Apple ID
- C. Personal Apple ID
- D. Apple ID

Answer: A

Explanation:

Content caching on a Mac (macOS 10.13 or later) doesn't require an Apple ID, Managed Apple ID, or Personal Apple ID to

function. It's a system-level feature enabled in macOS settings or via MDM, caching content like app updates and iCloud data for network efficiency. While iCloud caching benefits from a user's Apple ID on client devices, the caching Mac itself doesn't need one. The Apple Platform Deployment Guide confirms no Apple ID is required for content caching setup. Reference: Apple Platform Deployment Guide (Chapter: Content Caching).

NEW QUESTION # 105

You deploy an app to a supervised Apple device that already has the app installed as unmanaged. Using your organization's MDM, you convert unmanaged apps to managed. What's the expected behavior?

- A. The unmanaged app is removed and the managed app is installed.
- B. The unmanaged app converts to managed and sends a notification.
- C. The unmanaged app asks the user to convert it to managed.
- **D. The unmanaged app converts to managed without user interaction.**

Answer: D

Explanation:

Apple's MDM framework allows organizations to take ownership of apps that users may have installed manually. This process is called converting unmanaged apps to managed. When an administrator deploys the same app via MDM to a supervised device, Apple documentation specifies that the system silently converts the app to a managed state. No user interaction is required, and the existing app data remains intact. This avoids disruption while still giving the organization control over the app, including the ability to configure settings, update it, or remove it remotely. Options like requiring user approval or uninstalling the app are not part of the standard workflow; Apple designed the feature to ensure seamless transition for end users while granting IT management authority. References: Apple Platform Deployment - "Managing apps: Convert unmanaged apps to managed."

NEW QUESTION # 106

.....

After the client pay successfully they could receive the mails about DEP-2025 guide questions our system sends by which you can download our test bank and use our study materials in 5-10 minutes. The mail provides the links and after the client click on them the client can log in and gain the DEP-2025 Study Materials to learn. The procedures are simple and save clients' time. For the client the time is limited and very important and our product satisfies the client's needs to download and use our DEP-2025 practice engine immediately.
