Topic 2, Contoso, Ltd

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirement, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

NEW QUESTION # 308

Case Study 3: A Datum Corporation

Overview

Company Information

ADatum Corporation is an energy company that has offices across North America and 3,000 employees.

Physical Locations

ADatum has the offices shown in the following table.

Existing Environment

Network Infrastructure

The office in Calgary has a 1-Gbps internet circuit. The offices in San Diego and New York have 100-Mbps internet circuits. The field site in Edmonton has a 3-Mbps internet circuit.

Departments

ADatum has the following departments:

- Information technology (IT)
- Project management
- Marketing

Microsoft 365 and Tenants Environment

ADatum recently purchased a Microsoft 365 E5 subscription that has the Microsoft Teams Domestic Calling Plan add-on. All users are assigned Microsoft 365 E5 and Microsoft Teams Domestic Calling Plan licenses and Calling Plans is deployed.

Azure AD has the default Cross-tenant access settings configured.

The Teams policies settings are configured as shown in the following exhibit.

The Teams client is deployed to a non-persistent Virtual Desktop Infrastructure (VDI) used by the project management department. Allow guest access in Teams is set to Off.

The Microsoft Viva Connections app is deployed to all users.

Problem Statements

ADatum identifies the following issues:

- An executive at the San Diego office reports that video drops during Teams meetings.
- The Edmonton field site has limited bandwidth, and users report poor audio during Teams calls and meetings.
- Users in the project management department report that they cannot give or take control during Teams calls and meetings while sharing their VDI desktop.

Planned Changes

ADatum plans to implement the following changes:

- Configure the media bit rate settings for the users at the Edmonton field site. The settings must apply only to the user while they are at the site, but NOT when they are at a different office.
- Create a Teams channel to enable the project management department to collaborate with the IT department on a device upgrade project.
- Implement a pilot rollout of Operator Connect for the users in the New York office. A port request was accepted already.
- Create a Teams channel for the marketing department for external collaboration.
- Rename the Viva Connections icon as Start portal.

Technical Requirements

ADatum identifies the following technical requirements:

- The marketing department requires that all the files shared by using Teams remain available for at least three years after deletion.
- The marketing department must be able to apply a watermark to content and video shared during Teams meetings.
- All users require indefinite access to training videos recorded in Teams by the IT department.
- All access to Teams and shared resources must use the principle of least privilege.
- Guest access must remain disabled.

You need to implement the planned change for the Edmonton field site.

What should you create?

- A. a network roaming policy
- B. a meeting policy
- C. a messaging policy
- D. a calling policy
- E. a voice routing policy

Answer: A

Explanation:

<https://learn.microsoft.com/en-us/microsoftteams/network-roaming-policy> This policy enables you to assign settings to network sites. The Teams client will dynamically pick up the settings based on which network site it connects to. When the Teams client signs in from a network site with a roaming policy assigned, that policy will be used. If there is no policy assigned, the values set in the meeting policy will be used.

The TeamsNetworkRoamingPolicy contains the following parameters:

AllowIPVideo - This setting controls whether video can be turned on in meetings hosted by a user and in 1:1 and group calls started

by a user.

MediaBitRateKb - This setting determines the total average media bit rate for audio, video, and video-based app sharing transmissions in calls and meetings for the user.
