We also update MuleSoft Certified Developer - Level 1 (Mule 4) (MCD-Level-1) PDF questions regularly to ensure they match with the new content of the MCD-Level-1 exam

## MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q223-Q228):

### NEW QUESTION # 223

A Utility.dwl file is located in a Mule project at src/main/resources/modules. The Utility.dwl file defines a function named pascalize that reformats strings to pascal case.

What is the correct DataWeave to call the pascalize function in a Transform Message component?

- A)
- B)
- C)
- D)

- A. Option C
- B. Option D
- C. Option A
- **D. Option B**

**Answer: D**

**NEW QUESTION # 224**

Refer to the exhibit.

What is the correct syntax to add an employee ID as a URI parameter in an HTTP Listener path?

- A. (employeeID)
- B. \${employeeID}
- **C. {employeeID}**
- D. # [employeeID]

**Answer: C**

Explanation:

Paths

The path of an HTTP listener can be static, which requires exact matches, or feature placeholders.

Placeholders can be wildcards (\*), which match against anything they are compared to, or parameters ({param}), which not only match against anything but also capture those values on a URI parameters map.

Take the following example paths for three listeners using a configuration that establishes api/v1 as the base path:

account/mulesoft/main-contact: only match the exact path request

http://awesome-company.com/api/v1/account/mulesoft/main-contact

account/{accountId}/main-contact: matches all path requests structured similarly, such as

http://awesome-company.com/api/v1/account/salesforce/main-contact, and save salesforce as the value of accountId.

account/{accountId}/\*: matches all path requests different from main-contact, such as

http://awesome-company.com/api/v1/account/mulesoft/users, and save mulesoft as the value of accountId.

Mule Ref Doc : <https://docs.mulesoft.com/http-connector/1.6/http-listener-ref#paths>

**NEW QUESTION # 225**

Refer to the exhibits.

What is written to the records.csv file when the flow executes?

- **A. The JSON payload**
- B. Nothing
- C. The payload convert to CVS
- D. An error message

**Answer: A**

**NEW QUESTION # 226**

Refer to the exhibit.

The main flow contains a Flow Reference for the child flow.

What

values are accessible in the child flow after a web client submits a request to http://localhost:8Q81/order?color=red?

- A. payload  
color query param
- **B. payload  
quantity var color query param**
- C. payload  
quantity var
- D. payload

**Answer: B**

### NEW QUESTION # 227

How are query parameters dynamically passed to an outbound REST request using an HTTP Request operation?

- A. As URI parameters in the HTTP Request operation
- **B. As query parameters in the HTTP Request operation**
- C. In the Mule event's payload
- D. As flow variables

**Answer: B**

Explanation:

In General > Request > Query Parameters, click the plus icon (+) to add a parameter to a request. Type a name and value for the parameter or use a DataWeave expression to define the name and value.

### NEW QUESTION # 228

.....

All our regular candidates have impulse to choose again when they have the similar MCD-Level-1 exam. So they totally trust us.
