| Q Backflow Certification TREEO Center, UF <small>Study online at https://quizlet.com/_ch07m</small> | |
| 1. What is the correct height to install an air gap ? | Two times the nominal diameter of the supply pipe or a minimum of 1 inch . |
| 2. What are the components of a RP ? | Two independently operating check valves , a relief valve assembly , four test cocks and two shut - off valves . |
| 3. What are the components of a DCVA ? | Two independently operating check valves , four test cocks and two shut - off valves . |
| 4. What is the definition of backsiphonage ? | Backflow caused by a drop in supply pressure below atmospheric pressure . |
| 5. The RV drips after closing customer's shut - off valve . Why ? | CV # 1 leaks . |
| 6. What causes the RV to spit ? | Line pressure fluctuation . |
| 7. If there is backpressure on the RP what does the RV do ? | Nothing unless CV # 2 leaks . |
| 8. If there is a drop in supply pressure what does the RV do ? | Opens to dump the zone . |
| 9. What holds the Relief valve open ? | Relief valve spring . |
| 10. What holds the Relief valve closed ? | Supply pressure . |
| 11. Relief valve does what if outlet shut - off valve leaks ? | Relief valve tries but may not open when being tested . |
| 12. In test # 3 on the RP , open vent control and the gauge needle rises , what's wrong ? | The outlet shut - off valve leaks with backpressure . |

2026 Latest PassReview DEP-2025 PDF Dumps and DEP-2025 Exam Engine Free Share: <https://drive.google.com/open?id=10LB45JL49UGtRVJUuD8uaBebINNYSAGv>

Nowadays certificates are more and more important for our job-hunters because they can prove that you are skillful to do the jobs in the certain areas and you boost excellent working abilities. Passing the test of DEP-2025 certification can help you find a better job and get a higher salary. With this target, we will provide the best DEP-2025 Exam Torrent to the client and help the client pass the exam easily if you buy our product.

The DEP-2025 certification verifies that you are a skilled professional. PassReview product is designed by keeping all the rules and regulations in focus that Apple publishes. Our main goal is that you can memorize the actual Apple DEP-2025 exam question to complete the Apple Deployment and Management Exam (DEP-2025) test in time with extraordinary grades. Apple DEP-2025 Exam Dumps includes Apple DEP-2025 dumps PDF format, desktop DEP-2025 practice exam software, and web-based DEP-2025 practice test software.

Pass Guaranteed Quiz Latest Apple - Minimum DEP-2025 Pass Score

Our DEP-2025 study braindumps are designed in the aim of making the study experience more interesting and joyful. Through pleasant learning situation and vivid explanation of our DEP-2025 exam materials, you will become more interested in learning. Please accept our DEP-2025 learning prep and generate a golden bowl for yourself. We are waiting for your wise decision to try on or buy our excellent DEP-2025 training guide.

Apple DEP-2025 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes. |
| Topic 2 | <ul style="list-style-type: none">• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools. |
| Topic 3 | <ul style="list-style-type: none">• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication. |
| Topic 4 | <ul style="list-style-type: none">• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs. |
| Topic 5 | <ul style="list-style-type: none">• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager. |
| Topic 6 | <ul style="list-style-type: none">• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs. |
| Topic 7 | <ul style="list-style-type: none">• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements. |
| Topic 8 | <ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices. |

Apple Deployment and Management Exam Sample Questions (Q255-Q260):

NEW QUESTION # 255

What's the benefit of using configuration profiles?

- A. Enhances device security
- B. Separates personal and managed data
- C. Improves network performance
- D. Simplifies enrollment

Answer: A

Explanation:

Configuration profiles enhance device security by allowing IT administrators to enforce policies such as passcode requirements, app restrictions, and encryption settings. Deployed via MDM or manually, they ensure devices meet organizational security standards. Network performance (option B) is improved by content caching, not profiles. Data separation (option C) is a User Enrollment feature. Simplified enrollment (option D) aligns with ADE. The Apple Platform Deployment Guide emphasizes security as a primary benefit of configuration profiles.

Reference: Apple Platform Deployment Guide (Chapter: Configuration Profiles).

NEW QUESTION # 256

What are two functions of Secure Enclave? (Select two)

- A. Encrypt tokens for Recovery Lock, Bypass Code, and Personal Recovery Key.
- B. Secure MDM communications and APNs notifications.
- C. Encrypt mail, web, and other internet traffic.
- **D. Provide secure generation and key storage for encrypting data at rest.**
- **E. Process data from Face ID and Touch ID sensors.**

Answer: D,E

Explanation:

The Secure Enclave is a coprocessor built into Apple silicon and T2-equipped devices, designed to handle sensitive security functions. Apple Learning emphasizes two primary roles: (1) secure key generation and storage for data at rest encryption (D), ensuring FileVault and other storage encryption keys remain isolated from the main processor, and (2) biometric data processing (E) for Touch ID and Face ID. The Secure Enclave isolates and protects this biometric data, never exposing it to iOS, iPadOS, or macOS directly. It does not encrypt mail or internet traffic (handled by TLS/SSL), nor does it secure MDM communications or APNs notifications. Tokens for Recovery Lock and bypass codes are tied to MDM workflows but not directly managed by Secure Enclave. Its primary function is cryptographic and biometric security.

References: Apple Platform Security - "Secure Enclave."

NEW QUESTION # 257

What's the name of Apple's portal that allows IT administrators to manage device enrollment, app licenses, and content?

- A. Apple School Manager
- B. Apple Configurator
- C. Managed Apple ID portal
- **D. Apple Business Manager**

Answer: D

Explanation:

Apple Business Manager (ABM) is Apple's web-based portal designed for IT administrators in businesses to manage device enrollment (via Automated Device Enrollment), purchase and distribute app licenses, and assign content like books. Apple School Manager (option C) serves a similar purpose but is tailored for educational institutions. Apple Configurator (option B) is a macOS app for device configuration, not a portal.

There's no "Managed Apple ID portal" (option D); Managed Apple IDs are managed within ABM or ASM.

The question's broad scope fits ABM for business contexts, as per the Apple Platform Deployment Guide.

Reference: Apple Platform Deployment Guide (Chapter: Apple Business Manager).

NEW QUESTION # 258

What must a user have to be able to upgrade macOS on their iMac?

- A. Local administrator rights
- B. An MDM bootstrap token
- **C. Volume ownership**
- D. A Managed Apple Account

Answer: C

Explanation:

Upgrading macOS requires volume ownership, tied to an admin account with permissions to modify the system volume. The macOS Deployment Reference states, "To install or upgrade macOS, the user must have volume ownership, which allows the system to authenticate the operation against the secure volume." Option B is for MDM updates, C is insufficient alone in newer macOS versions, and D is for content, not upgrades.

Reference:

macOS Deployment Reference, "Software Updates" section.

Apple Platform Security Guide, "System Volume Protections" section.

NEW QUESTION # 259

In which order do iPhone, iPad, and Mac devices automatically join a Wi-Fi network?

- A. Preferred network, public network, private networks
- B. Private networks, preferred network, public network
- C. Preferred network, private networks, public network
- D. Public network, preferred network, private networks

Answer: C

Explanation:

Apple documents that devices prioritize preferred networks first - these are networks the user or MDM has explicitly joined and saved. If no preferred networks are available, devices then attempt to join private networks (those that do not broadcast public hotspots but are available locally). Finally, as a last resort, devices may join public networks, such as captive Wi-Fi portals or unsecured hotspots. Apple Learning highlights this hierarchy to ensure consistent enterprise behavior and user experience. Administrators can influence priority through MDM-delivered Wi-Fi payloads, placing organizational SSIDs at the top of the preferred list. Public networks are deliberately last in the sequence because they are less secure and more likely to involve captive portals, which disrupt automatic connectivity.

NEW QUESTION # 260

.....

One of the features of DEP-2025 training materials of us is that we can help you pass the exam just one time, and we also pass guarantee and money back guarantee for you fail to pass the exam. You just need to send your failure scanned to us, and we will give you full refund. In addition, DEP-2025 exam dumps contain both questions and answers, which can help you have a quick check after you finish your practice. We also have online and offline chat service stuff, they possess the professional knowledge about the DEP-2025 Training Materials, if you have any questions just contact us.
