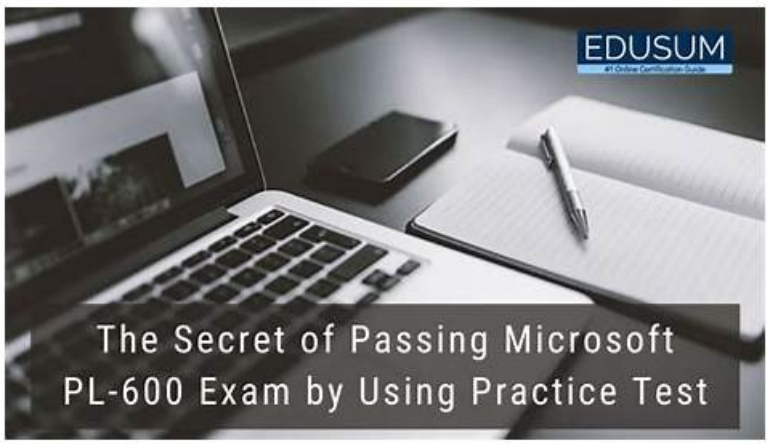
2026 Microsoft PL-600 Test Preparation Pass Guaranteed Quiz



P.S. Free 2025 Microsoft PL-600 dumps are available on Google Drive shared by DumpsValid: https://drive.google.com/open?id=1uHDEBhl5IZKKggaH-jY3G8rDEEh0p_w5

DumpsValid's PL-600 exam certification training materials are not only with high accuracy and wide coverage, but also with a reasonable price. After you buy our PL-600 certification exam training materials, we also provide one year free renewable service for you. We promise, when you buy the PL-600 Exam Certification training materials, if there are any quality problems or you fail PL-600 certification exam, we will give a full refund immediately.

Microsoft PL-600 exam consists of various topics, including designing solutions with the Power Platform, configuring and managing the Common Data Service, creating Power Apps and Power Automate workflows, and integrating Power Virtual Agents. It also covers the security and compliance features of the Power Platform and the best practices for designing and implementing secure solutions. PL-600 exam is designed to test both the conceptual knowledge and the practical skills of solution architects.

By earning the Microsoft PL-600 Certification, professionals demonstrate their expertise in designing and implementing solutions on the Microsoft Power Platform, which can lead to career advancement opportunities and increased earning potential. Microsoft Power Platform Solution Architect certification is also a valuable asset to organizations as it validates the technical competency of professionals in delivering solutions that drive business value and improve operational efficiency.

100% Pass Quiz 2026 PL-600: Microsoft Power Platform Solution Architect Latest Test Preparation

In order to let customers enjoy the best service, all PL-600 exam prep of our company were designed by hundreds of experienced experts. Our PL-600 test questions will help customers learn the important knowledge about exam. At the same time, our PL-600 test torrent can help you avoid falling into rote learning habits. You just need to spend 20 to 30 hours on study, and then you can take and pass your PL-600 Exam. In addition, the authoritative production team of our PL-600 exam prep will update the study system every day in order to make our customers enjoy the newest information.

Microsoft Power Platform Solution Architect Sample Questions (Q55-Q60):

NEW QUESTION # 55
You need to recommend an authentication solution for the planned implementation of Dynamics 365.
What should you include in the recommendation?

- A. Use federated identities
- B. Create a new tenant for Dynamics 365 Customer Service.
- C. Use synchronized identities.
- D. Use the Office 365 tenant for Dynamics 365 Customer Service.

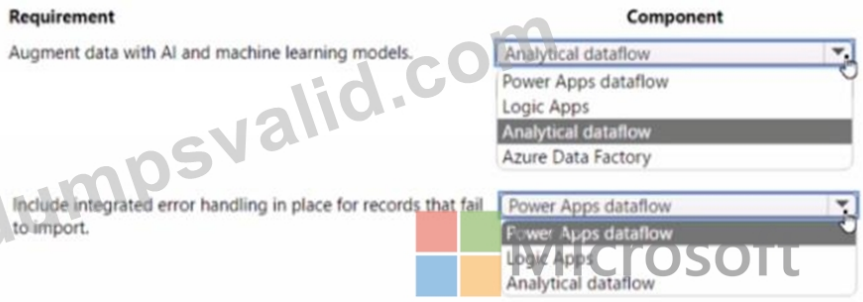
Answer: C

Explanation:
Scenario: Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.
Synchronized identity. Synchronize on-premises directory objects with Microsoft 365 and manage your users on-premises. You can also synchronize passwords so that the users have the same password on-premises and in the cloud, but they will have to sign in again to use Microsoft 365.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/manage-user-account-synchronization
Topic 3, Fabrikam, inc.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.
Background
Fabrikam, Inc. manufactures industrial metal cutting machines. The company installs and services the machines for customers. Fabrikam has manufacturing plants in Canada, France, and Chin
a. The company also has regional service organizations that are responsible for installation and maintenance of the machines.
Current environment
Overview
Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes. The company has been experiencing quality issues associated with its manufacturing operations and installations.
The company wants to implement a way to capture quality inspection results for each machine produced. Current inspection checklists are stored in the Files section of a Teams channel for inspectors. Inspectors commonly print the incorrect inspection checklist.
The company has specific inspection stations for certain inspection steps. Each station has the gauges and equipment required for related inspection steps. There is often a backlog at specific inspection stations. This results in delays in shipping machines to customers.
Accounting system
The current system does not handle shop floor or manufacturing planning functionality.
Machines are assigned serial numbers and placed in stock until they are shipped to customers.
Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.
Other systems
The company has an enterprise Microsoft 365 subscription. The company uses Microsoft 365 only for sending and receiving email.
The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.
The company recently started using Dynamics 365 Field Service to manage and maintain the machines that it installs for its customers. The app has not been customized.
The company has added roles, skills, and certification proficiencies to Dynamics 365 Field Service resources to support both customer onsite inspections and final manufacturing inspections.
Requirements
Quality inspection app
Fabrikam is evaluating Microsoft Power Platform to determine whether it can meet the company's requirements for a manufacturing defect and quality inspection solution. Each machine produced must be subjected to a quality inspection at various points during production. Each machine must undergo a more extensive quality inspection before the machine can be shipped to the customer.
Inspection orders
Inspection orders must:
Allow entry of quality ratings of passed or failed for each quality metric identified for the machine being rated.
Include information about the person who performed each inspection step and any comments made by the inspector.
Be automatically marked as failed if one inspection step rating is marked as failed.
Be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.
Inspectors must fill in findings comments and upload at least one photo for any inspection step that is marked as failed.
Inspection standardization
Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated. The solution must:
Prevent an inspector from proceeding to the next step of the checklist until required information for a step is entered.
Support the addition of steps to inspections to support custom features added to a machine for a customer.

Support the direct input of measurements from testing gauges to avoid incorrect readings being entered by inspectors.
Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.
Support the ability to store photo references within each inspection step to document defects found during inspections.
Security
Users must be active employees of Fabrikam.
When a user signs into the inspection solution, the solution must display a picture of the employee who has signed in.
Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.
You must prevent users from changing inspection order data once an inspection is marked as final.
Analytics and reporting
The solution must:
Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
Provide a printed quality certificate to be included with each machine.
Issues
During initial testing of the solution, testers report that they cannot see the photos taken during a previously failed inspection.

NEW QUESTION # 56
You are designing a solution to continually import data from several data sources into Microsoft Dataverse. The solution must meet the following requirements:
* Include integrated error handling for records that fail to import successfully into Dataverse.
* Augment data with Al and machine learning models.
You need to select a component for each requirement
Which components should you use? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

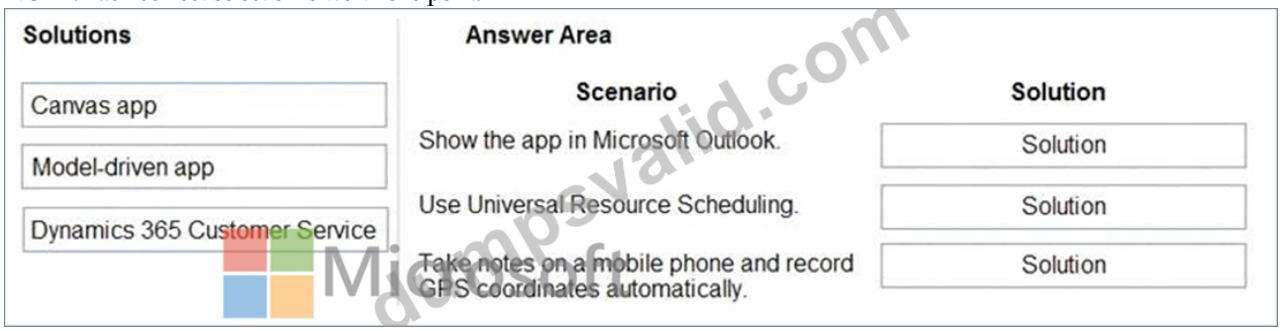


Answer:

Explanation:

NEW QUESTION # 57
A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.

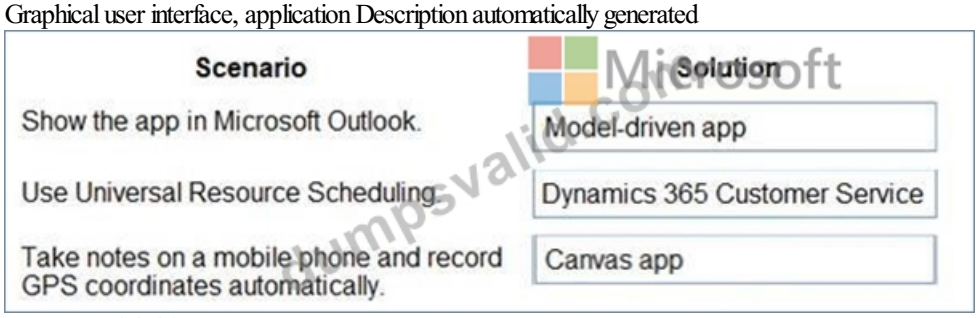
The customer wants to keep the service process simple and save on both licensing and development time.
You need to recommend solutions for the customer.
What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:

Explanation:

Explanation
Graphical user interface, application Description automatically generated



Box 1: Model-drive app
Integration with Microsoft Outlook requires a Model-driven app.
Box 2: Dynamics 365 Customer Service
Schedule anything in Dynamics 365 using Universal Resource Scheduling. You can enable scheduling for any entity in Dynamics 365 Sales, Field Service, Customer Service, and Project Service Automation, including custom entities.
Box 3: Canvas app
Reference:
https://docs.microsoft.com/en-us/dynamics365/common-scheduler/schedule-anything-with-universal-resource-sc

NEW QUESTION # 58
You need to manage user access to the app.
Which two connection types should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Virtual table with a customer connector
- B. Office 365 Outlook connector
- C. Microsoft Dataverse connector
- D. Office 365 Users connector

Answer: C,D

Explanation:
Office 365 Users lets you access user profiles in your organization using your Office 365 account. You can use the Use the

connection in your Power Platform app.
Dataverse is part of the Microsoft 365 collaboration and productivity tools. Using federation, applications can connect to Dataverse using the same system user identities and credentials available in an Azure Active Directory based network.
Scenario:
Users must be active employees of Fabrikam.
Quality inspection app: Fabrikam is evaluating Microsoft Power Platform to determine whether it can meet the company's requirements for a manufacturing defect and quality inspection solution. Each machine produced must be subjected to a quality inspection at various points during production. Each machine must undergo a more extensive quality inspection before the machine can be shipped to the customer.

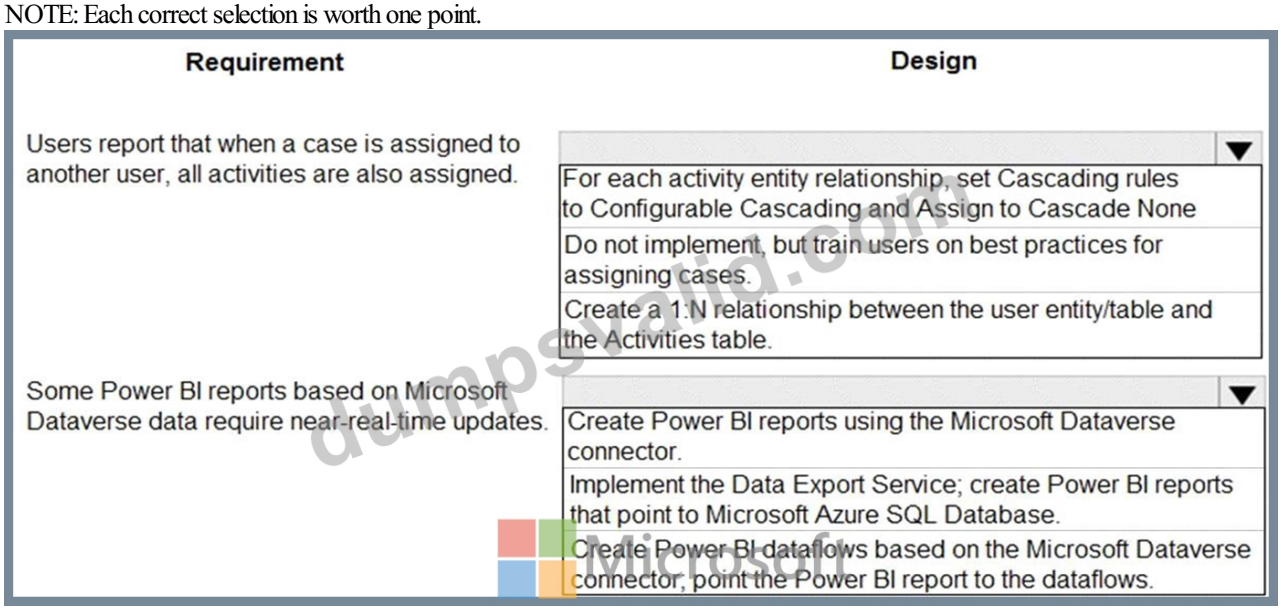
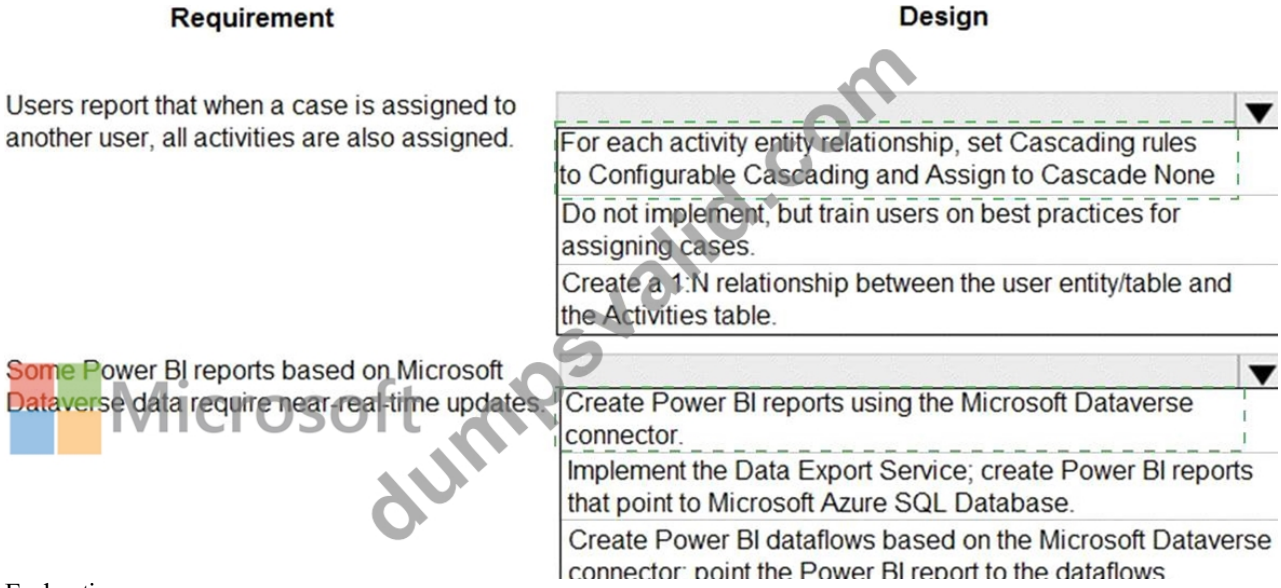
NEW QUESTION # 59
An organization is optimizing its Microsoft Power Platform solution architecture.
The optimization needs to address the following:
Label names for option sets and multiselect option sets should be added as separate fields for reporting.
Users complain that when a case is assigned to another user, all the activities are also assigned.
Some Power BI reports based on Microsoft Dataverse data need near-real-time updating.
You need to recommend a design solution to meet these requirements.
What should you recommend? To answer, select the appropriate option in the answer area.
NOTE: Each correct selection is worth one point.



Answer:

Explanation:



Explanation
Graphical user interface, text, application, email Description automatically generated
