

Detailed DP-100 Study Dumps, DP-100 Exam Passing Score

BONUS!!! Download part of Getcertkey DP-100 dumps for free: <https://drive.google.com/open?id=1XQQd7NLZZd3rNsas363soN7jvMKFHyC8>

There is an old saying goes, the customer is king, so we follow this principle with dedication to achieve high customer satisfaction on our DP-100 exam questions. First of all, you are able to make full use of our DP-100 learning dumps through three different versions: PDF, PC and APP online version. For each version, there is no limit and access permission if you want to download our DP-100 study materials, and it really saves a lot of time for it is fast and convenient.

The DP-100 certification is an essential certification for data professionals who want to develop their skills in designing and implementing data solutions using Microsoft Azure. Designing and Implementing a Data Science Solution on Azure certification demonstrates the candidate's proficiency in various aspects of data science, including data exploration, data preparation, data modeling, machine learning, and data visualization. Designing and Implementing a Data Science Solution on Azure certification is recognized globally and can help the candidate to gain better job opportunities and career growth.

Microsoft DP-100 Certification Exam covers a wide range of topics related to data science, including data exploration and visualization, data preparation, modeling, and deployment. It also covers various Azure tools and services for data science, such as Azure Machine Learning, Azure Databricks, Azure Stream Analytics, and more. DP-100 exam is designed to test your ability to design and implement end-to-end data science solutions on the Azure platform.

DP-100 Exam Passing Score | DP-100 Reliable Practice Questions

Most of the study material providers fail to provide insight on the DP-100 real exam questions to the candidates of certification exams. There is such scene with Getcertkey products. They are in fact made, keeping in mind the DP-100 Actual Exam. Thus every DP-100 exam dumps is set in line with the format of real exam and introduces the candidate to it perfectly.

Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q513-Q518):

NEW QUESTION # 513

You have a dataset that contains 2,000 rows. You are building a machine learning classification model by using Azure Learning Studio. You add a Partition and Sample module to the experiment.

You need to configure the module. You must meet the following requirements:

Divide the data into subsets

Assign the rows into folds using a round-robin method

Allow rows in the dataset to be reused

How should you configure the module? To answer, select the appropriate options in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/studio-module-reference/partition-and-sample>

NEW QUESTION # 514

You need to identify the methods for dividing the data according to the testing requirements.

Which properties should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/algorithm-module-reference/partition-and-sample>

NEW QUESTION # 515

You are analyzing a raw dataset that requires cleaning.

You must perform transformations and manipulations by using Azure Machine Learning Studio.

You need to identify the correct modules to perform the transformations.

Which modules should you choose? To answer, drag the appropriate modules to the correct scenarios. Each module may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/studio-module-reference/smote>

<https://docs.microsoft.com/en-us/azure/machine-learning/studio-module-reference/convert-to-indicator-values>

NEW QUESTION # 516

You create an Azure Machine Learning workspace.

You must implement dedicated compute for model training in the workspace by using Azure Synapse compute resources. The solution must attach the dedicated compute and start an Azure Synapse session.

You need to implement the compute resources.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

NEW QUESTION # 517

You are performing feature scaling by using the scikit-learn Python library for x1, x2, and x3 features.

Original and scaled data is shown in the following image.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

□

The StandardScaler assumes your data is normally distributed within each feature and will scale them such that the distribution is now centred around 0, with a standard deviation of 1.

Example:

All features are now on the same scale relative to one another.

Box 2: Min Max Scaler

Notice that the skewness of the distribution is maintained but the 3 distributions are brought into the same scale so that they overlap.

Box 3: Normalizer

NEW QUESTION # 518

• • • • •

There may be customers who are concerned about the installation or use of our DP-100 study materials. You don't have to worry about this. In addition to high quality and high efficiency, considerate service is also a big advantage of our company. We will provide 24 - hour online after-sales service to every customer. If you have any questions about installing or using our DP-100 Study Materials, our professional after-sales service staff will provide you with warm remote service.
