

# The Best JN0-452 Actual Dump offer you accurate Pass Rate | Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless)

P.S. Free & New JN0-452 dumps are available on Google Drive shared by Itcertking: [https://drive.google.com/open?id=1Y-F1G4-mtfv\\_DdmcYnKocgd5ElONbPEW](https://drive.google.com/open?id=1Y-F1G4-mtfv_DdmcYnKocgd5ElONbPEW)

With the dumps, you can quickly review the topics and revise them before taking the actual exam. The Juniper JN0-452 Dumps also provide detailed explanations and solutions to every question so that you can understand the concept better. This will ensure that you are well-prepared to take the exam. With our premium quality resources and unbeatable prices, you are guaranteed to pass your Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) certification exams.

The Itcertking JN0-452 PDF file is a collection of real, valid, and updated Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) exam questions. It is very easy to download and install on laptops, and tablets. You can even use JN0-452 Pdf Format on your smartphones. Just download the Itcertking JN0-452 PDF questions and start Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) exam preparation anywhere and anytime.

## How Itcertking will Help You in Passing the JN0-452?

As we all know, Selecting high quality, respected study material will help develop the required skills to pass your JN0-452 exam test. While, where to find the best valid JN0-452 practice dumps is an important question. Juniper JN0-452 study material will be your good guide. JN0-452 Questions cover almost all the main topic, which can make you clear about the actual test. I believe, with the confident and our JN0-452 valid dumps, you will get your JN0-452 certification with ease.

## Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q116-Q121):

### NEW QUESTION # 116

Exhibit:

□ Your colleagues report that they are unable to browse tutorials needed for work located at youtube.com when using their BYOD devices. When using a guest device, they are able to access youtube.com.

In this scenario, how would you allow BYOD colleagues to access youtube.com using the WxLAN policies?

- A. Move the WxLAN policy for BYOD above the policy for guests.
- B. Delete the WxLAN policy for BYOD and add the BYOD label to the policy for guests.
- C. Delete the WxLAN policy for guests and add the guest label to the policy for BYOD.
- D. Move the WxLAN policy for guests above the policy for contractor.

**Answer: A**

Explanation:

In Juniper Networks Mist AI Wireless, WxLAN policies are evaluated using a top-down, first-match logic.

This means that when traffic matches a policy condition, that policy is applied immediately, and no further policies are evaluated.

Understanding this evaluation order is critical when troubleshooting access discrepancies between user types such as BYOD and guest users.

From the scenario and the exhibit, guest devices are able to access youtube.com, while BYOD devices are blocked. This indicates that:

- \* The guest WxLAN policy allows "All Video and Music" traffic (which includes YouTube).

- \* The BYOD WxLAN policy blocks "All Video and Music" traffic.

- \* The BYOD policy is evaluated before the guest policy.

Because BYOD users are matched to the BYOD label, their traffic hits the BYOD policy first and is denied before it can reach the more permissive guest policy. Simply modifying labels or deleting policies is unnecessary and could introduce unintended access control issues.

The correct and least disruptive solution is to move the BYOD WxLAN policy above the guest policy and then adjust the BYOD policy rules (for example, allowing YouTube or the "All Video and Music" category).

By reordering the policies, you ensure that BYOD traffic is evaluated correctly and receives the intended permissions without impacting guest access.

The incorrect options are explained as follows:

- \* Deleting policies (Options A and C) is not best practice and risks breaking segmentation and access control.

- \* Option B is irrelevant, as the contractor policy does not affect BYOD or guest traffic in this scenario.

Therefore, the correct solution is to move the WxLAN policy for BYOD above the policy for guests, making Option D the correct answer.

#### NEW QUESTION # 117

Which of these is a proactive troubleshooting capability of Marvis?

- A. Listing all the APs at a site.
- B. Displaying the event log for a client after a user reports a problem.
- C. Allowing an administrator to run a packet capture for a specific client.
- **D. Automatically identifying and reporting systemic network issues, like a site-wide DHCP failure, often before users are impacted.**

**Answer: D**

#### NEW QUESTION # 118

Under which hierarchy level would you create a new site configuration?

- A. location
- B. clients
- **C. organization**
- D. access points

**Answer: C**

#### NEW QUESTION # 119

By default, which 6 GHz channels does Juniper Mist radio resource management (RRM) use?

- A. Channels 1, 9, and 13
- **B. The preferred scanning channels (PSCs)**
- C. The channels you select as primary channels
- D. Channels 13 through 221

**Answer: B**

Explanation:

In Juniper Networks Mist AI Wireless, Radio Resource Management (RRM) is designed to optimize RF performance automatically

while minimizing client impact. With the introduction of Wi-Fi 6E and the 6 GHz band, Juniper Mist follows industry standards and client behavior to ensure efficient and reliable operation. By default, Mist RRM uses the Preferred Scanning Channels (PSCs) in the 6 GHz spectrum.

The 6 GHz band introduces a very large number of available channels, which creates challenges for client discovery, scanning efficiency, and roaming speed. To address this, the IEEE defined Preferred Scanning Channels (PSCs)-a specific subset of 6 GHz channels that access points advertise and clients prioritize during active and passive scanning. These PSCs allow clients to discover networks faster without having to scan the entire 6 GHz channel set.

Juniper Mist RRM automatically selects and operates on these PSCs by default to:

- \* Improve client discovery and association times
  - \* Reduce unnecessary scanning overhead
  - \* Enhance roaming performance
  - \* Maintain compatibility across a wide range of Wi-Fi 6E client devices
- Mist continuously evaluates RF conditions using telemetry and AI-driven analysis, but it intentionally limits default operation to PSCs to balance performance, efficiency, and client interoperability. Administrators can override defaults and customize channel plans if required, but PSCs remain the recommended baseline for most deployments.

The incorrect options are explained as follows:

- \* Option B is incorrect because Mist RRM does not require manual primary channel selection by default.
  - \* Option C refers to 2.4 GHz non-overlapping channels, not 6 GHz.
  - \* Option D represents the full 6 GHz channel range, which is not practical for default scanning or operation due to client limitations.
- Therefore, the correct answer is the preferred scanning channels (PSCs), which Juniper Mist RRM uses by default in the 6 GHz band to ensure optimal Wi-Fi 6E performance.

#### NEW QUESTION # 120

Which access points (APs) will be considered for inclusion in the AP Offline Marvis Action?

- **A. all APs assigned to sites**
- B. all APs assigned to sites that have connected to the cloud previously
- C. all APs in inventory
- D. all purchased APs

**Answer: A**

Explanation:

#### NEW QUESTION # 121

.....

We all know that Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) exam dumps are an important section of the Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) exam that is purely based on your skills, expertise, and knowledge. So, we must find quality JN0-452 Questions that are drafted by industry experts who have complete knowledge regarding the Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) certification exam and can share the same with those who want to clear the JN0-452 exam. The best approach to finding Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) exam dumps is to check the Itcertking that is offering the Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) practice questions.

**Pass JN0-452 Rate:** [https://www.itcertking.com/JN0-452\\_exam.html](https://www.itcertking.com/JN0-452_exam.html)

If you want to sail through the difficult Juniper JN0-452 exam, it would never do to give up using exam-related materials when you prepare for your exam, Itcertking can make your preparation very phenomenal for the exam and Itcertking will surely keep on helping you from start till the end of your preparation and you will be Itcertking experts and tools are willing to help candidates in their preparation for the JN0-452 video training. We can promise that you will have no regret buying our JN0-452 exam dumps.

This may not seem important to some people, Once JN0-452 pages are divided into sets of independent components, they are generally reassembled with one of two goals: assemble a page based JN0-452 Trustworthy Pdf on a collection of components, or convey how a component appears and varies across pages.

**Updated 100% Free JN0-452 – 100% Free Actual Dump | Pass JN0-452 Rate**

We can promise that you will have no regret buying our JN0-452 exam dumps, Once the newest test syllabus is issued by the official, our experts will quickly make a detailed summary about all knowledge points of the real Juniper JN0-452 exam in the shortest time.
