## Passing EMC D-UN-DY-23 Exam is Easy with Our Reliable D-UN-DY-23 Latest Exam Pdf: Dell Unity Deploy 2023 Exam

If you have the certification the exam, you can enter a better company, and your salary will also be doubled. D-UN-DY-23 training materials can help you pass the exam and obtain corresponding certification successfully. D-UN-DY-23 exam materials are edited by experienced experts, and they possess the professional knowledge for the exam, and you can use it with ease. We have online and offline chat service, they possess the professional knowledge for the exam, and you can consult them any questions that bothers you. We offer you free update for one year for D-UN-DY-23 Exam Dumps, and our system will send the latest version to you automatically.

### EMC Dell Unity Deploy 2023 Exam Sample Questions (Q273-Q278):

#### NEW QUESTION # 273

When creating a new LUN on a Dell EMC Unity array using Unisphere, what is the default setting of the Data Reduction feature?

- A. OFF for thin LUNs in an All-Flash pool
- B. ON for thick LUNs in an All-Flash pool
- C. ON for thick LUNs and OFF for thin LUNs
- D. OFF for thick LUNs and ON for thin LUNs

**Answer: A**

**NEW QUESTION # 274**

A storage administrator is configuring asynchronous remote replication.

What is the total number of internal snapshots created on the source and destination systems?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

**NEW QUESTION # 275**

A Unity 400 system has Data at Rest Encryption licensed and enabled.

Which operation(s) must be performed from the Unisphere Settings window to ensure the system is still operational after SP replacements?

- A. Backup Keystore File
- B. Download Audit Log and Checksum
- C. Download Audit Log
- D. Download Checksum

**Answer: A**

**NEW QUESTION # 276**

A system administrator wants to grant privileges to manage storage resources and host configurations for some users. However, the administrator wants to ensure users have no privileges to manage user accounts, change network settings and NAS servers, or perform software upgrades.

Which user role should be associated with the user accounts to be created?

- A. Administrator
- B. Operator
- C. Service
- D. Storage Administrator

**Answer: D**

**NEW QUESTION # 277**

What is the maximum time difference allowed between the current system time (UTC) and the NTP server time during the initial configuration of a Dell Unity system?

- A. 15 min
- B. 5 min
- C. 7 min
- D. 17 min

**Answer: D**

Explanation:

Explanation

If the time difference between the current system (UTC) time and the NTP server time is too large (approximately 17 minutes), the user cannot configure an NTP server during initial configuration. The user will need to adjust the time while in "Set time manually" mode before changing to "Enable NTP synchronization". This is to avoid potential issues with data replication, snapshots, and audit logs that rely on accurate time stamps. References: Dell EMC Unity: How to change System Time from 'Set time manually' option to NTP2, page 1.
