- **B. All units must have the same firmware.**
- C. The most powerful model must be configured as the primary unit.
- **D. Group capacity is limited to the least powerful model.**

Answer: B,D

Explanation:

- **B. Devices must be deployed behind a load balancer.**
- **C. Mail data must be stored on a NAS server.**
- D. Service monitoring must be configured for remote SMTP.

FortiMail in server-mode active-active requires a shared mail store (e.g. NAS) so both units see the same data, and an external load-balancer (or DNS round-robin) to distribute SMTP sessions across the pair.
