Marvelous SAFe-SPC Exam Questions: SAFe Practice Consultant SPC (6.0) Demonstrate Latest Training Quiz - DumpsValid

You will be feeling be counteracted the effect of tension for our Scaled Agile SAFe-SPC practice dumps can relieve you of the anxious feelings. Our SAFe Practice Consultant SPC (6.0) practice materials are their masterpiece full of professional knowledge and sophistication to cope with the Scaled Agile SAFe-SPC Exam. They have sublime devotion to their career just like you, and make progress ceaselessly.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q126-Q131):

NEW QUESTION # 126

Who is the content authority for an Agile Team?

- A. The System Architect
- B. The Scrum Master/Team Coach
- C. The Product Owner
- D. The Product Manager

Answer: C

Explanation:
According to SAFe 6.0, "The Product Owner is the content authority for the team backlog. They are responsible for defining Stories and prioritizing the team backlog to streamline the execution of program priorities while maintaining the conceptual and technical integrity of the Features or components the team is responsible for." The Scrum Master/Team Coach facilitates team events and removes impediments, but does not own content decisions. Product Manager and System Architect provide input and guidance but are not the content authority at the team level.

NEW QUESTION # 127
(Select 2) What are the ways to evolve the Solution Intent from variable to fixed scope?

- A. Building prototypes
- B. Creating work breakdown structures.
- C. Adapting WIP limits
- D. Modeling

Answer: A,D

Explanation:
Solution Intent captures the "single source of truth" regarding the current and intended behavior of the solution. As solutions evolve, so does the Solution Intent-from variable (unknown, undecided) to fixed (known, decided). Ways to evolve the Solution Intent include:
Modeling: Documenting aspects of the solution using models helps clarify and fix certain elements.
Building prototypes: Prototypes allow for validation and learning, which in turn help evolve the intent from exploratory (variable) to more defined (fixed).
Creating work breakdown structures is not a recommended SAFe practice for evolving Solution Intent.
Adapting WIP limits pertains to flow, not directly to Solution Intent.

NEW QUESTION # 128
A company is about to launch Agile Release Trains within a Value Stream that consists of 200 people, 90 of whom are in the U.S. working on the system's business logic and databases, and 110 of whom are in India working on the UI front end.
What would be the most effective way to launch?

- A. Launch it as two distributed ARTs organized around end-to-end functionality.
- B. Launch it as a single ART and then conduct Inspect & Adapt at the end of the PI to determine whether it needs to be split.
- C. Launch it as two or more ARTs based on how the cost centers are defined.
- D. Launch it as two geography-based ARTs, with one working on the UI and the other on business logic and databases.

Answer: A

Explanation:
SAFe recommends organizing ARTs around value and end-to-end functionality, not geography or cost centers. Two distributed ARTs-each cross-functional and capable of delivering end-to-end value-enables global collaboration while preserving Agile principles.
"ARTs should be formed around delivering end-to-end value, even when teams are distributed globally.

Organizing by function or geography creates silos and dependencies, undermining flow and agility." (Source: SAFe 6.0 Framework: ART Organization; SPC 6.0 Guide, "Designing the Implementation")

NEW QUESTION # 129
What is NOT a good Definition of Done (DoD)?

- A. Nonfunctional Requirements are met.
- B. Coding standards have been followed.
- C. No must-fix defects exist.
- D. The Customer is satisfied with the User Experience.
- E. Code is checked in and merged into main branch.
- F. All unit tests are passing.

Answer: D

Explanation:
A good Definition of Done (DoD) is a clear, objective, and verifiable set of criteria that must be met for a backlog item to be considered complete. "The Customer is satisfied with the User Experience" is subjective and cannot be objectively or consistently verified during iteration acceptance. All other options are concrete, testable, and objective.
"Definition of Done is a list of criteria that must be met before a product increment is considered complete.
These criteria must be objective, unambiguous, and easily verified."
(Source: SAFe 6.0 Framework: Definition of Done; SPC 6.0 Guide "Establishing Team and Technical Agility")

NEW QUESTION # 130
Who typically facilitates the ART Sync meeting?

- A. Release Train Engineer
- B. Agile coach
- C. Value Stream Engineer
- D. Development manager or QA manager
- E. Senior Scrum Master

Answer: A

Explanation:
The ART Sync is a program-level synchronization event that brings together Scrum Masters and Product Owners. It is typically facilitated by the Release Train Engineer (RTE), who serves as the chief Scrum Master for the train, ensuring smooth coordination and flow across teams.
"The Release Train Engineer (RTE) is the servant leader and coach for the ART and typically facilitates the ART Sync." (Source: SAFe 6.0 Framework: ART Events; SPC 6.0 Guide, "Coaching ART Execution")

NEW QUESTION # 131
......

helped a large number of candidates pass the SAFe-SPC Exam yet.
