

Free PDF F5CAB4 New Question & Leading Offer in Qualification Exams & Authorized F5CAB4 Latest Test Bootcamp

2026 Latest TestPDF F5CAB4 PDF Dumps and F5CAB4 Exam Engine Free Share: https://drive.google.com/open?id=1Hq_xYbZ0xivGEkMxclBWWF2nzt6ZXtRV

In order to save a lot of unnecessary trouble to users, we have completed our F5CAB4 study questions research and development of online learning platform, users do not need to download and install, only need your digital devices have a browser, can be done online operation of the F5CAB4 test guide. This kind of learning method is very convenient for the user, especially in the time of our fast pace to get F5CAB4 Certification. When using our F5CAB4 training materials, all the operations of the F5CAB4 learning material of can be applied perfectly.

F5 F5CAB4 Exam Overview:

Certification Vendor:	F5
Exam Name:	BIG-IP Administration Control Plane Administration
Exam Number:	F5CAB4
Exam Price:	USD 50 (online Certiverse) / USD 65 (Pearson VUE test center)
Exam Format:	Scenario-based questions, Multiple choice
Exam Duration:	30 minutes
Related Certifications:	F5CAB3 BIG-IP Administration Data Plane Configuration F5CAB5 BIG-IP Administration Support and Troubleshooting F5CAB1 BIG-IP Administration Install, Initial Configuration, and Upgrade F5CAB2 BIG-IP Administration Data Plane Concepts
Available Languages:	English
Real Exam Qty:	25–30
Passing Score:	245 (scaled score)
Recommended Training:	Administering BIG-IP (F5 Training) Troubleshooting BIG-IP Training

Exam Registration:	F5 Certification Portal Official F5 Exam Page
Sample Questions:	F5 F5CAB4 Sample Questions
Exam Way:	Online proctored (Certiverse) or in-person test center (Pearson VUE)
Pre Condition:	No formal prerequisites; part of the F5 Certified Administrator, BIG-IP track (must pass 5 exams in total).
Official Syllabus URL:	https://education.f5.com/exams/big-ip-administration-control-plane-administration-f5cab4

Features of F5 F5CAB4 Dumps PDF Format

There is no doubt that among our three different versions of F5CAB4 guide torrent, the most prevalent one is PDF version, and this is particularly suitable and welcomed by youngsters. There are some features of this version: first of all, PDF version of our F5CAB4 prep guide can be printed into paper, though which you are able to do some note-writing and highlight the important exam points. Besides our F5CAB4 Exam Torrent support free demo download, as we mentioned before, it is an ideal way for you to be fully aware of our F5CAB4 prep guide and then purchasing them if suitable and satisfactory.

F5 F5CAB4 Exam Syllabus Topics:

Topic	Details
Topic 1	Identify configured system services: This domain covers verifying proper configuration of essential services including DNS, NTP, SNMP, and syslog.
Topic 2	Given a scenario, determine device upgrade eligibility: This domain covers determining appropriate timing for software and platform upgrades and strategies to minimize downtime during upgrades.
Topic 3	Given a scenario, interpret Service status: This section teaches interpreting service states, analyzing netstat output, and determining whether services are listening on specific ports.
Topic 4	Explain config sync: This section focuses on configuration synchronization procedures, identifying sync errors, determining sync necessity, checking sync status, and comparing configuration timestamps.
Topic 5	Identify management connectivity configurations: This section focuses on understanding management access configurations, including management IP addresses, port lockdown settings, remote connectivity verification, and troubleshooting access issues.
Topic 6	- Identify and report current device status: This domain covers monitoring BIG-IP operational status through LCD panels, dashboards, Network Map, GUI - TMSH commands, and checking high availability states.
Topic 7	- List which log files could be used to find events and - or hardware issues: This section teaches identification of key log files (- var - log - ltm, secure, audit), understanding event severity levels, and interpreting log messages.
Topic 8	- Apply procedural concepts required to manage the state of a high availability pair: This domain covers controlling and monitoring failover states in high availability pairs, including forcing standby - offline modes, reporting failover status, and verifying device trust.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q61-Q66):

NEW QUESTION # 61

A BIG-IP device sends out the following SNMP trap:

big-ipo.f5.com - bigipExternalLinkChange Link: 1.0 is DOWN.

Where in the BIG-IP Configuration utility should the BIG-IP Administrator verify the current status of Link 1.0?

- A. Network > Interfaces > Interface List
- B. System > Platform
- C. Network > Trunks > Trunk List
- D. Statistics > Performance > System

Answer: A

Explanation:

Monitoring the physical status of the device is critical for reporting device health. In F5 nomenclature, "1.0", "1.1", etc., represent physical hardware interfaces. To verify if a physical link is up or down as reported by the Control Plane's SNMP agent, the administrator must check the Interface List located under Network > Interfaces

NEW QUESTION # 62

Users report that traffic is negatively affected every time a BIG-IP device fails over. The traffic becomes stabilized after a few minutes. What should the BIG-IP Administrator do to reduce the impact of future failovers?

- A. Set up Failover Method to HA Order
- B. Configure MAC Masquerade
- C. Enable Failover Multicast Configuration
- D. Configure a global SNAT Listener

Answer: B

Explanation:

When a failover occurs, the newly active device must inform the surrounding network that it now "owns" the shared IP addresses. Without MAC Masquerade, the new device uses its own hardware MAC, requiring upstream routers to update their ARP tables (which causes a delay).

MAC Masquerading allows the HA pair to share a "floating" MAC address, ensuring the Control Plane transition is transparent to the network layer

NEW QUESTION # 63

A BIG-IP Administrator needs to update the list of configured NTP servers. In which area of the Configuration Utility should the BIG-IP Administrator perform this update?

- A. System > Platform
- B. System > Services
- C. System > Preferences
- D. System > Configuration

Answer: D

Explanation:

NTP (Network Time Protocol) is vital for management connectivity and HA state synchronization. Correct time is required for log timestamping and device trust group communication⁴⁶. To manage these settings, the administrator navigates to System > Configuration, where general system-level services like NTP and DNS are defined to ensure the Control Plane remains synchronized with the network environment.

NEW QUESTION # 64

Refer to the exhibit.

Filesystem	Size	Used	Avail	Use%	Mounted on
/dev/mapper/vg--db--sda-set.4.root	427M	427M	0M	100%	/
devtmpfs	48G	4.0K	48G	1%	/dev
tmpfs	48G	2.5M	48G	1%	/dev/shm
tmpfs	48G	2.8M	48G	1%	/run
tmpfs	48G	0	48G	0%	/sys/fs/cgroup
/dev/mapper/vg--db--sda-set.4._usr	5.3G	5.0G	60M	99%	/usr
/dev/mapper/vg--db--sda-dat.share	40G	13G	25G	34%	/shared
none	48G	43M	48G	1%	/shared/rrd.1.2
/dev/mapper/vg--db--sda-set.4._var	3.0G	816M	2.1G	29%	/var
/dev/mapper/vg--db--sda-set.4._config	3.2G	334M	2.7G	12%	/config
prompt	4.0M	28K	4.0M	1%	/var/prompt
none	48G	19M	48G	1%	/var/tmstat
/dev/mapper/vg--db--sda-dat.appdata	337G	16G	304G	5%	/appdata
/dev/mapper/vg--db--sda-dat.log	20G	457M	19G	3%	/var/log
none	48G	4.0K	48G	1%	/run/pamcache
none	48G	0	48G	0%	/var/loipc
tmpfs	9.5G	0	9.5G	0%	/run/user/91
tmpfs	9.5G	0	9.5G	0%	/run/user/0

The BIG-IP Administrator is investigating disk utilization on the BIG-IP device. What should the BIG-IP Administrator check next? (Choose one answer)

- A. Large files on /usr file system
- **B. Large files on the / file system**
- C. Results from the EUD test
- D. Results from the platform diagnostics test

Answer: B

Explanation:

When troubleshooting a BIG-IP system where a partition is reported as full (100% utilization), identifying and removing large or unnecessary files is the immediate next step for restoration of system stability.

* Symptoms of Full Partitions: If a file system (such as the root / or /var) becomes full, it can result in unpredictable system behavior, failure to save configurations, and the inability to log in to the Web UI.

* The Root (/) Partition: This partition is intentionally kept small on F5 systems. It is highly sensitive to the storage of third-party software or diagnostic files that should ideally be stored in the /shared or /var directories.

* Procedural Resolution: To resolve 100% disk usage, administrators should check for large files on the affected partition using CLI commands like `du -ah` or `find / -xdev -type f -exec du {} \; | sort -rn | head -20`.

* Common Culprits: Large files typically causing these issues include old core files, tech support bundles, large diagnostic logs (packet diags), or temporary files created during administrative tasks.

* Diagnostics vs. Remediation: While tests like the EUD (End User Diagnostics) or platform diagnostics are useful for hardware verification, they do not resolve file system exhaustion issues that have already reached a critical 100% state.

NEW QUESTION # 65

The BIG-IP Administrator suspects unauthorized SSH login attempts on the BIG-IP system. Which log file would contain details of these attempts? (Choose one answer)

- A. /var/log/audit
- B. /var/log/ltn
- C. /var/log/messages
- **D. /var/log/secure**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

On BIG-IP systems, authentication and authorization events are logged in /var/log/secure. This includes:

Successful and failed SSH login attempts

Invalid user authentication attempts

PAM (Pluggable Authentication Module) authentication failures

Why the other options are incorrect:

/var/log/audit records administrative configuration changes (who changed what and when), not login attempts.

Therefore, the correct log file for investigating unauthorized SSH login attempts is `/var/log/secure`.
