# NCP-DB-6.10 Free Pdf Guide - Exam NCP-DB-6.10 Braindumps

DOWNLOAD the newest Pass4training NCP-DB-6.10 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1hh6zMPTGvRJxz0wDfywTiWubv33s73E1

Everyone has their own characteristics when they start to study our NCP-DB-6.10 exam questions. In order for each user to find a learning method that suits them, we will provide you with a targeted learning version and study plan. There are three versions of the NCP-DB-6.10 Practice Engine for you to choose: the PDF, Software and APP online. And further more, we have free demos of the NCP-DB-6.10 learning guide on the website for you to download before you make the purchase.

Working in IT industry, IT people most want to attend Nutanix certification exam. As a widely recognized certification examination, Nutanix certification exams are becoming more and more popular. Among them, Nutanix NCP-DB-6.10 certification test is the most important exam. Having NCP-DB-6.10 certificate proves you have high skills. Owing to its importance, it is very difficult to pass Nutanix NCP-DB-6.10 exam successfully. Although to pass the exam is hard, you also don't need to worry about it. Pass4training exam dumps will help you sail through NCP-DB-6.10 test.

Nutanix NCP-DB-6.10 the latest certification exam training materials

NCP-DB-6.10 training dumps are created in the most unique, customized way so it can cover different areas of exam with the Quality and Price of the product which is unmatched by our Competitors. The 100% guarantee pass pass rate of NCP-DB-6.10 training materials that guarantee you to pass your Exam and will not permit any type of failure. You will find every question and answer within NCP-DB-6.10 Training Materials that will ensure you get any high-quality certification you're aiming for.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q219-Q224):

NEW QUESTION # 219
An administrator has deployed an NDB HA setup. An electrical maintenance window needs to be planned and the clusters where NDB is deployed must be powered off. After shutting down the load balancer server, what should the administrator do next?

- A. Shutdown the API leader node.
- B. Run the high-availability list command.
- C. In the sudo systemctl stop patroni command.
- D. Shutdown the API standby node.

Answer: D

Explanation:
In an NDB HA (High Availability) setup, when planning an electrical maintenance window requiring the clusters hosting NDB to be powered off, the administrator must follow a controlled shutdown sequence to preserve data integrity and minimize disruption. After shutting down the load balancer server (HAProxy), the next step is to shut down the API standby node. In an NDB HA configuration, the API leader node handles active operations, while the standby node provides redundancy. Shutting down the standby node first ensures the leader remains operational, allowing ongoing management tasks to continue until the final shutdown of the leader node.

NEW QUESTION # 220
An administrator needs to perform patching on a MongoDB server cluster within an NDB environment.
How should the administrator accomplish this task?

- A. Apply the patch to all nodes at once.
- B. Disable the replica set while patching.
- C. Perform a rolling upgrade, applying the patch to the primary member first, followed by the secondary members.
- D. Perform a rolling upgrade, applying the patch to the secondary members first, followed by the primary member.

Answer: D

Explanation:
The administrator should perform a rolling upgrade, applying the patch to the secondary members first, followed by the primary member, to accomplish the task of patching a MongoDB server cluster within an NDB environment. A rolling upgrade is a method of applying patches or updates to a cluster without downtime or interruption of service. The administrator can use the NDB patching feature to perform a rolling upgrade on a MongoDB server cluster, which consists of a primary member and one or more secondary members that form a replica set. The NDB patching feature allows the administrator to select the software profile version, the database parameters profile, and the network profile for the patching operation.

NEW QUESTION # 221
A user accidentally drops a table in the database at 10:42pm and the NDB administrator is tasked with restoring the table.
The snapshot schedule is set for every 30 minutes and the log catchup is set for every 15 minutes.
The last available snapshot is at 10:30pm.
What is the optimal path to restore the table back with minimum data loss?

- A. Restore the 10:30pm snapshot.
- B. Restore using point in time till 10:41pm.
- C. Restore the 10:42pm snapshot.
- D. Restore using point in time till 10:42pm.

Answer: D

Explanation:
The optimal path to restore the table back with minimum data loss is to use the point in time restore feature of NDB, which allows the administrator to restore the database to a specific point in time based on the available snapshots and logs. By restoring using point in time till 10:42pm, the administrator can recover the table just before it was dropped by the user, and minimize the data loss to the least possible amount. The other options are not optimal, as they either involve restoring an older snapshot, which may result in more data loss, or restoring a non-existent snapshot, which is not possible.

NEW QUESTION # 222
An administrator is interested in using profiles to simplify the database provisioning process. The profile needs to include information related to the SQL service startup account, and the NDB worker service account.
Which profile would help the administrator accomplish this task?

- A. Network
- B. Database Parameter
- C. Software
- D. Windows Domain

Answer: D

Explanation:
The correct answer is A because the Windows Domain profile is the profile that includes information related to the SQL service startup account and the NDB worker service account. A Windows Domain profile is a collection of settings that define how NDB manages Windows-based database servers and databases. It contains the following information:
The domain name and credentials to join the database server VMs to the domain The SQL service startup account and password to run the SQL Server service on the database server VMs The NDB worker service account and password to run the NDB Database Agent service on the database server VMs The SQL Server authentication mode to use for the databases By using a Windows Domain profile, the administrator can simplify the database provisioning process by applying the same settings to multiple database server VMs and databases, without having to manually enter them each time. The other options are not correct because they describe different types of profiles that do not include information related to the SQL service startup account and the NDB worker service account.

NEW QUESTION # 223

In Nutanix Database Service (NDB), which component is primarily responsible for coordinating database lifecycle tasks such as deployment, cloning, and patching?

- A. NDB Controller VM
- B. Prism Central
- C. NDB Agent
- D. Calm Blueprint Engine

Answer: A

Explanation:
The NDB Controller VM is the core orchestration component that manages workflows for database lifecycle tasks. The Agent runs inside DB Server VMs to execute commands, while Prism Central provides general management but not database orchestration.

NEW QUESTION # 224

......

We will continue to pursue our passion for better performance and human-centric technology of latest NCP-DB-6.10 quiz prep. And we guarantee you to pass the NCP-DB-6.10 exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the NCP-DB-6.10 Certification. We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods. According to the statistics shown in the feedback chart, the general pass rate for latest NCP-DB-6.10 test prep is 98%.

Exam NCP-DB-6.10 Braindumps: https://www.pass4training.com/NCP-DB-6.10-pass-exam-training.html

In order to make the exam easier for every candidate, Pass4training Exam NCP-DB-6.10 Braindumps compiled such a study materials that allows making you test and review history performance, and then you can find your obstacles and overcome them, Our NCP-DB-6.10 study materials allow you to stand at a higher starting point, pass the NCP-DB-6.10 exam one step faster than others, and take advantage of opportunities faster than others, Nutanix NCP-DB-6.10 Free Pdf Guide Many employers want to find the most capable and talented person when recruiting someone for a position.

From this understanding, you will be able to realize what it NCP-DB-6.10 can do for your programming, Catherine has in-depth knowledge of security systems, remote access, and routing technology.

In order to make the exam easier for every candidate, Pass4training compiled Exam NCP-DB-6.10 Braindumps such a study materials that allows making you test and review history performance, and then you can find your obstacles and overcome them.
