2026 DEP-2025 – 100% Free Reliable Exam Review | Efficient Premium Apple Deployment and Management Exam Files

The most distinguished feature of Pass4Leader's study guides is that they provide you the most workable solution to grasp the core information of the certification syllabus in an easy to learn set of DEP-2025 study questions. Far more superior in quality than any online courses free, the questions and answers contain information drawn from the best available sources. They are relevant to the DEP-2025 Exam standards and are made on the format of the actual DEP-2025 exam.

Apple Deployment and Management Exam Sample Questions (Q237-Q242):

NEW QUESTION # 237

What provides a consistent set of management tools for Apple devices to all MDM vendors?

- A. Apple Push Notification service
- B. Managed service configuration files
- C. Automated Device Enrollment
- D. Apple's MDM framework

Answer: D

Explanation:

Apple's MDM framework standardizes tools. The Mobile Device Management Protocol Reference states, "Apple's MDM

framework provides a consistent set of APIs and management tools that all MDM vendors use to manage Apple devices." Option D supports communication, not tools.

Reference:

Mobile Device Management Protocol Reference, "Overview" section.

Apple Platform Deployment Guide, "MDM Framework" section.

NEW QUESTION # 238

Where are bypass codes for Apple devices stored when you use organization-linked Activation Lock?

- A. In the user's personal Apple Account
- **B. In the MDM solution**
- C. In the user's Managed Apple Account
- D. In Apple Business Manager or Apple School Manager

Answer: B

Explanation:

Bypass codes are stored in MDM for organization-linked Activation Lock. The Apple Platform Deployment Guide states, "Bypass codes for organization-linked Activation Lock are stored in the MDM solution, allowing administrators to unlock devices without user credentials." References:

Apple Platform Deployment Guide, "Activation Lock" section.

Mobile Device Management Protocol Reference, "Activation Lock Management" section.

NEW QUESTION # 239

What's required to deploy macOS configuration profiles to devices?

- A. A VPN configuration
- B. An Apple Developer account
- C. User acceptance
- **D. An MDM solution**

Answer: D

Explanation:

Deploying macOS configuration profiles to devices requires an MDM solution, which pushes the profiles remotely via APNs to enrolled devices, ensuring centralized management. An Apple Developer account (option A) is for app development, not profile deployment. User acceptance (option C) is needed for manual installation but not for MDM deployment, especially on supervised devices. A VPN configuration (option D) is unrelated. The Apple Platform Deployment Guide specifies MDM as the standard method for deploying profiles to macOS devices.

NEW QUESTION # 240

Which benefit does using Return to Service provide?

- A. Automatic software updates
- **B. Automatic progression to the Home Screen after erasing**
- C. Automatic creation of an Apple Account
- D. Interactive authentication during enrollment

Answer: B

Explanation:

The Return to Service workflow is designed to quickly redeploy devices, particularly in education or enterprise shared-use environments. Apple Learning explains that the key benefit is the automatic progression of the device to the Home Screen after an erase command. Normally, Setup Assistant requires user input to complete setup after a wipe, but with Return to Service, MDM can preconfigure settings such as Wi-Fi payloads and enrollment profiles. This allows the device to erase, re-enroll, and complete setup with no user interaction, landing directly at the Home Screen ready for the next user. It does not create Apple IDs, nor does it install updates automatically. It also avoids requiring authentication during setup. The speed and automation reduce IT overhead and downtime when reissuing devices.

References: Apple Platform Deployment - "Return to Service workflow."

NEW QUESTION # 241

What's required to use Find My on a device?

- A. A VPN configuration
- **B. An Apple ID**
- C. Supervision
- D. An MDM solution

Answer: B

Explanation:

Find My requires an Apple ID (personal or Managed) to enable device tracking, remote locking, or wiping via iCloud. It's a user-initiated feature activated in device settings, not dependent on organizational tools. An MDM solution (option A) can manage Find My settings but isn't required to use it. Supervision (option C) enhances management but isn't necessary for Find My. A VPN configuration (option D) is unrelated. The Apple Platform Security Guide specifies an Apple ID as the prerequisite for Find My.

NEW QUESTION # 242

.....

Are you worrying about how to pass Apple DEP-2025 test? Now don't need to worry about the problem. Pass4Leader that committed to the study of Apple DEP-2025 certification exam for years has a wealth of experience and strong exam dumps to help you effectively pass your exam. Whether to pass the exam successfully, it consists not in how many materials you have seen, but in if you find the right method. Pass4Leader is the right method which can help you sail through Apple DEP-2025 Certification Exam.

Premium DEP-2025 Files: <https://www.pass4leader.com/Apple/DEP-2025-exam.html>

These tools assist you in assessing your ability and identifying areas for improvement to pass the Apple Premium DEP-2025 Files certification exam, All of them have passed the exam and got the DEP-2025 certificate, Apple DEP-2025 Reliable Exam Review You know how to choose, Our company has been providers of DEP-2025 : Apple Deployment and Management Exam dumps for many years and has been the pass-king in this this industry, It is cost-efficient to purchase Apple DEP-2025 guide as soon as possible.
