

VMCE_v12 Training Materials: Veeam Certified Engineer v12 & VMCE_v12 Practice Test

Veeam Certified Engineer VMCE_V12 Exam With Complete Solutions 2024

Veeam Certified Engineer V12 (VMCE) Certification Answer: The VMCE certification is documented proof that an administrator or engineer has the necessary level of expertise to protect an organization's data with the Veeam Data Platform. The Veeam Certified Engineer V12 exam is a certification assessment designed to verify candidates meet the level of competence required for certification. The exam assesses knowledge of and ability to deploy, manage, and maintain scalable Veeam infrastructures and understand the key features and components of Veeam Data Platform. The exam has been developed in line with 12.0.0.1420 build capabilities.

Candidate Profile Answer: This certification is for anyone responsible for protecting data with Veeam Data Platform. To qualify for a Veeam certification exam, candidates must attend the Veeam Backup & Replication V12: Configure, Manage and Recover training course through a Veeam Authorized Education Center (VMAEC).

VMCE Exam Details Answer: The exam consists of 60 multiple choice items, 50 of which are scored. The Veeam Certified Engineer V12 exam uses a scoring scale of 300–900 with a cut score of 720. On completing the exam, candidates receive a score report. On achieving a passing score, candidates receive their certificate, digital badge, and priority access to technical support. Test takers have 75 minutes to take the exam. A 15-minute time extension is available when the exam is delivered in regions where the local language is not English. The exam is available in English (US). The exam is delivered through Pearson VUE test centers or on their Online Proctored Platform.

VMCE Exam Outline Answer: Core Concepts (27%)

Components & Functionality (20%)

Implementation (15%)

Operations (38%)

Preparation Tips To Pass The Veeam Certified Engineer VMCE_v12 Exam Answer: 1. Familiarize yourself with the exam objectives and content: Take the time to thoroughly understand what topics and

With the aid of our Veeam VMCE_v12 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our Veeam VMCE_v12 learning questions. Our Veeam VMCE_v12 training questions are the accumulation of professional knowledge worthy practicing and remembering.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 2	<ul style="list-style-type: none">Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.
Topic 3	<ul style="list-style-type: none">Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.

Topic 4	<ul style="list-style-type: none"> • Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 5	<ul style="list-style-type: none"> • Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 6	<ul style="list-style-type: none"> • Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 7	<ul style="list-style-type: none"> • Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Topic 8	<ul style="list-style-type: none"> • Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 9	<ul style="list-style-type: none"> • Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 10	<ul style="list-style-type: none"> • Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 11	<ul style="list-style-type: none"> • Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 12	<ul style="list-style-type: none"> • Data protection strategies: This section of the exam covers an overview of data protection strategies.
Topic 13	<ul style="list-style-type: none"> • Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 14	<ul style="list-style-type: none"> • Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.

Reliable VMCE_v12 Test Materials - Test VMCE_v12 Registration

To get success in the Veeam VMCE_v12 exam is not an easy task, it is quite difficult to pass it. But with proper planning, firm commitment, and PassSureExam VMCE_v12 Questions, you can pass this milestone easily. PassSureExam is a leading platform that offers real, valid, and updated Veeam VMCE_v12 Exam Dumps. With the PassSureExam Veeam Certified Engineer v12 (VMCE_v12) Questions you can easily prepare well for the final Veeam VMCE_v12 exam and crack it easily.

Veeam Certified Engineer v12 Sample Questions (Q27-Q32):

NEW QUESTION # 27

When you back up regular or standalone VMs in vCloud Director, which of the following is captured and stored in Veeam's Backup & Replication backup file? (Choose three.)

- A. Raw device mapping
- B. vApp metadata
- C. Linked clone VM's prior to vCenter 6.5
- D. VM disk content
- E. In-guest iSCSI disk
- F. VM metadata

Answer: B,D,F

Explanation:

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/vcloud_regular_vm_restore.html?ver=100

NEW QUESTION # 28

A backup administrator decided to move the Veeam Backup & Replication server and configuration database to new servers. Which configuration restore mode should be used?

- A. Planned failover
- **B. Migrate**
- C. Failover plan
- D. Restore

Answer: B

Explanation:

Explanation

https://helpcenter.veeam.com/docs/backup/vsphere/vbr_config_migrate.html?ver=120#step5 The "Migrate" mode is designed specifically for scenarios where you need to move the Veeam Backup & Replication server and its configuration database to new servers or locations. It ensures a smooth transition without data loss or service interruption. This mode allows you to migrate the entire configuration seamlessly.

NEW QUESTION # 29

When a replication job is configured to use the replica mapping feature (no seeding), what will happen during the first run of the job?

- A. If a VM within the replication job is not mapped, the job will fail
- B. The replication job will first restore the VM from the most recent restore point and then start to synchronize the incremental changes from the source infrastructure
- C. The replication job creates a clone of the mapped replica to preserve the original state before synchronizing the changes from the source infrastructure
- **D. The replication job calculates the differences between the original and mapped VM; only the incremental changes will be synchronized**

Answer: D

Explanation:

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/replica_seeding_hv.html?ver=100

NEW QUESTION # 30

Veeam Backup & Replication is currently configured to back up different workloads: Windows virtual machines on VMware vSphere and Linux virtual machines on Microsoft Hyper-V. A secondary copy of all the backups including transaction logs must be created. Which backup copy job configuration is correct?

- A. Two periodic copy backup copy jobs
- **B. Two immediate copy backup copy jobs**
- C. A single immediate copy backup copy job
- D. A single periodic copy backup copy job

Answer: B

Explanation:

2 Backup Copy Jobs in Immediate mode. Mixing vSphere backup and hyper-v is not supported, Periodic copy doesn't support log backups.

NEW QUESTION # 31

A request to protect some new domain controllers has been submitted in the ticketing system. The engineer creates a backup job with the following steps:

1. Right-clicks on the Jobs navigation item on the left
2. Selects VMware vSphere from the menu
3. Enters a name for the job.
4. Selects workloads to protect.
5. Defines a job schedule.
6. Clicks the Finish button.

When testing restores, the engineer finds that the backups are crash-consistent.

Which set of steps should the engineer use to avoid crash-consistent backups for the domain controllers?

- A. Launch the New Backup Job Wizard. Enter a name and a description. Select a resource pool to protect. Specify a backup repository with copy-mode enabled. Define a job schedule. Click the Finish button.
- B. Launch the New Backup Job Wizard Enter a name for the job Specify a backup repository. Specify Guest Processing settings. Define a job schedule Click the Finish button.
- C. Launch the New Backup Job Wizard Enter a name or description for the job. Select the vSphere environment to protect. Choose the Default Backup Repository Check the box labelled 'Run the job when I click Finish'. Specify Guest Processing settings. Define a job schedule.
- **D. Launch the New Backup Job Wizard. Enter a name for the job. Select workloads to protect. Choose a destination. Enable the Application-Aware checkbox and configure settings. Define a job schedule. Click the Finish button.**

Answer: D

Explanation:

Application-aware processing is a feature in Veeam Backup & Replication that creates transactionally consistent backup images of VMs. For domain controllers, this feature ensures that backups are consistent with the applications running on the VM, like Active Directory services. To avoid crash-consistent backups and ensure application consistency, the engineer must enable the Application-Aware Processing option during the job configuration.
