Google Chrome-Enterprise-Administrator인증시험도 어려울 뿐만 아니라 신청 또한 어렵습니다. Google Chrome-Enterprise-Administrator시험은 IT업계에서도 권위가 있고 직위가 있으신 분들이 응시할 수 있는 시험이라고 알고 있습니다. 우리 KoreaDumps에서는 Google Chrome-Enterprise-Administrator관련 학습가이드를 제동합니다. KoreaDumps는 우리만의 IT전문가들이 만들어낸 Google Chrome-Enterprise-Administrator관련 최신, 최고의 자료와 학습가이드를 준비하고 있습니다. 여러분의 편리하게 Google Chrome-Enterprise-Administrator응시하는데 많은 도움이 될 것입니다.

Google Chrome-Enterprise-Administrator 시험요강:

주제	소개
주제 1	Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
주제 2	Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
주제 3	Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
주제 4	Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
주제 5	Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Chrome-Enterprise-Administrator높은 통과율 시험덤프자료 & Chrome-Enterprise-Administrator최신버전 인기 시험자료

많은 시간과 정신력을 투자하고 모험으로 Google인증 Chrome-Enterprise-Administrator 시험에 도전하시겠습니까? 아니면 우리 KoreaDumps 의 도움으로 시간을 절약하시겠습니까? 요즘 같은 시간인 즉 모든 것인 시대에 여러분은 당연히 KoreaDumps의 제품이 딱 이라고 생각합니다. 그리고 우리 또한 그 많은 덤프판매사이트 중에서도 단연 일등이고 생각합니다. 우리 KoreaDumps선택함으로 여러분은 성공을 선택한 것입니다.

최신 Professional Chrome Enterprise Chrome-Enterprise-Administrator 무료 샘플문제 (Q29-Q34):

질문 # 29

Which percentage of Chrome is recommended during Beta before general availability'?

- A. 1%
- B. 2%
- C. 5%
- D. 10%

정답: C

설명:

While the exact percentage isn't explicitly stated in the provided material, industry best practices for software deployment, including browser updates, recommend testing in a Beta environment with a representative but limited subset of users before a full rollout. A common recommendation for Beta testing is around 5% of the user base. This provides sufficient feedback and issue detection without impacting the majority of users.

질문 # 30

Where can information about all of the profiles associated with a browser be found*?

- A. Managed browsers detail
- B. Chrome log events
- C. Managed devices
- D. Chrome Insights report

정답: A

설명:

The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The "Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

질문 # 31

How often do extensions update"?

- A. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- B. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- C. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store
- D. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running

정답: C

설명:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

질문 # 32

Which data point is available in the Chrome Versions report*?

- A. Last update
- B. Total Browsers
- C. Inactive Browsers
- D. Active Browsers

정답: D

설명:

The Chrome Versions report specifically focuses on the distribution of different Chrome browser versions across the managed fleet. A key data point in this report is the number of "Active Browsers" on each version, allowing administrators to understand their update status and identify any significant fragmentation. While "Total Browsers" might be a related metric, the core focus of the "Versions" report is on the active instances and their respective versions. Information on "Inactive Browsers" or the "Last update" time for individual browsers might be found in other reports.

질문 # 33

A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles Company

- Employees
- Users
- Contractors

If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Employees OU
- B. Create a Managed Browsers OU nested under the Contractors OU
- C. Create a Managed Browsers OU nested under the Company OU
- D. Create a Managed Browsers OU nested under the Users OU

정답: C

설명:

To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply policies at the user profile level), creating a separate OU at the top level (under "Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same managed browser.

질문 # 34
