

Updated DA0-002 Test Cram - CompTIA CompTIA Data+ Exam (2025) - Latest New DA0-002 Practice Questions

In rare cases, if you fail to pass the CompTIA Data+ Exam (2025) DA0-002 exam despite using CompTIA Data+ Exam (2025) exam dumps we will return your whole payment without any deduction. Take the best decision of your professional career and start exam preparation with CompTIA Data+ Exam (2025) exam practice questions and become a certified CompTIA Data+ Exam (2025) DA0-002 expert.

The ActualTestsIT is one of the leading platforms that have been offering valid, updated, and real CompTIA DA0-002 exam dumps for many years. The CompTIA Data+ Exam (2025) DA0-002 practice test questions offered by the ActualTestsIT are designed and verified by experienced CompTIA DA0-002 Certification Exam trainers. They work together and put all their expertise to ensure the top standard of CompTIA Data+ Exam (2025) DA0-002 valid dumps.

Trust the Experts and Use Online CompTIA DA0-002 Practice Test Engine for Your Exam Preparation

ActualTestsIT is a website which is able to speed up your passing the CompTIA certification DA0-002 exams. Our CompTIA certification DA0-002 exam question bank is produced by ActualTestsIT's experts's continuously research of outline and previous

exam. When you are still struggling to prepare for passing the CompTIA certification DA0-002 Exams, please choose ActualTestsIT's latest CompTIA certification DA0-002 exam question bank, and it will bring you a lot of help.

CompTIA Data+ Exam (2025) Sample Questions (Q32-Q37):

NEW QUESTION # 32

A data analyst needs to identify outliers from a given dataset. Which of the following visualizations is the best way to identify outliers?

- A. Waterfall chart
- B. Gantt chart
- C. Scatter plot
- D. Box plot

Answer: D

Explanation:

This question falls under the Visualization and Reporting domain, focusing on selecting the appropriate visualization to identify outliers in a dataset.

* Box plot (Option A): A box plot displays the distribution of data, including the median, quartiles, and outliers (data points beyond the whiskers), making it the best choice for identifying outliers.

* Scatter plot (Option B): A scatter plot shows relationships between two variables, and while outliers may be visible, it's not specifically designed for outlier detection.

* Gantt chart (Option C): Gantt charts are for project scheduling, not suitable for outlier identification.

* Waterfall chart (Option D): Waterfall charts show cumulative changes (e.g., financial contributions), not designed for outlier detection.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a box plot is the standard visualization for identifying outliers.

NEW QUESTION # 33

Which of the following pieces of information, if made public, results in a data privacy violation?

- A. Driver's license
- B. Age
- C. Employment status
- D. Gender

Answer: A

Explanation:

This question falls under the Data Governance domain, which in DA0-002 includes understanding data privacy and compliance with regulations like GDPR. The question asks which piece of information, if made public, constitutes a privacy violation, meaning it must be personally identifiable information (PII).

* Gender (Option A): Gender is not typically considered PII on its own, as it's not uniquely identifiable.

* Driver's license (Option B): A driver's license number is PII because it uniquely identifies an individual and can be linked to other personal information, such as name and address. Making it public violates privacy regulations.

* Age (Option C): Age alone isn't PII, as it's not uniquely identifiable.

* Employment status (Option D): Employment status (e.g., employed, unemployed) isn't PII, as it doesn't uniquely identify an individual.

The DA0-002 Data Governance domain includes "identifying PII and data privacy concepts," and a driver's license is a clear example of PII that, if exposed, results in a privacy violation.

NEW QUESTION # 34

A data analyst creates a report that identifies the middle 50% of the collected data. Which of the following best describes the analyst's findings?

- A. Skewness from the slope
- B. Interquartile range

- C. The difference between mode and median
- D. Mean variance

Answer: B

Explanation:

This question pertains to the Data Analysis domain, focusing on statistical measures. The middle 50% of a dataset refers to a specific statistical concept related to data distribution.

- * Interquartile range (Option A): The interquartile range (IQR) is the range between the first quartile (Q1, 25th percentile) and the third quartile (Q3, 75th percentile), representing the middle 50% of the data, which matches the description.
- * The difference between mode and median (Option B): This measures the spread between two central tendency metrics but doesn't represent the middle 50% of the data.
- * Mean variance (Option C): Variance measures data dispersion around the mean, not the middle 50%.
- * Skewness from the slope (Option D): Skewness measures data asymmetry, and "slope" is irrelevant here.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," and the IQR is the standard measure for the middle 50% of a dataset.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 3.0 Data Analysis.

NEW QUESTION # 35

A data analyst needs to get an accurate idea of how data components are automated. Which of the following types of documentation should the analyst review first?

- A. Data explainability report
- B. Data lineage
- **C. Data flow diagram**
- D. Data dictionary

Answer: C

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on documentation for understanding data processes. The analyst needs to understand automation of data components, which involves data movement and processes.

- * Data flow diagram (Option A): A data flow diagram (DFD) visualizes how data moves through systems, including automated processes, making it the best starting point.
- * Data explainability report (Option B): This is related to AI/ML model transparency, not data automation.
- * Data dictionary (Option C): A data dictionary defines data elements, not how they're automated.
- * Data lineage (Option D): Data lineage tracks data origin and transformations but doesn't focus on automation processes.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and a data flow diagram is key for visualizing automation.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 1.0 Data Concepts and Environments.

NEW QUESTION # 36

Which of the following is found in metadata?

- A. Data lineage
- B. Syntax
- **C. Variable types**
- D. Transformations

Answer: C

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on the content of metadata.

Metadata describes data attributes, and the task is to identify what it typically includes.

- * Transformations (Option A): Transformations (e.g., data cleaning steps) are part of data lineage, not metadata.
- * Data lineage (Option B): Data lineage tracks data flow and transformations, which is related to metadata but not a direct component.
- * Syntax (Option C): Syntax refers to code structure, not a metadata component.
- * Variable types (Option D): Metadata includes information about data fields, such as variable types (e.

g., integer, string), which is a standard component.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and metadata typically contains details like variable types to describe the dataset.

NEW QUESTION # 37

It is understandable that different people have different preference in terms of DA0-002 study guide. Taking this into consideration, we have prepared three kinds of versions of our DA0-002 preparation questions: PDF, online engine and software versions. The PDF version of DA0-002 training materials is convenient for you to print, the software version can simulate the real exam and the online version can be used on all electronic devices. If you are hesitating about which version should you choose, you can download our DA0-002 free demo first to get a firsthand experience before you make any decision.
