CompTIA Tech+ Certification Exam Sample Questions (Q88-Q93):

NEW QUESTION # 88
A user is typing a document using a keyboard. Which of the following describes this action?

- A. Output
- B. Storage
- C. Processing
- D. Input

Answer: D

Explanation:
A keyboard allows a user to enter data into a system:
"Input devices allow users to provide data or control signals to the computer; keyboards are primary examples." Storage saves data, output displays data, and processing handles data operations.

NEW QUESTION # 89
A user wants to use virtualization on a local workstation. Which of the following best describes the technology that will be used?

- A. Cloud
- B. Guest OS
- C. Hypervisor
- D. SaaS

Answer: C

Explanation:
A hypervisor is the technology that enables virtualization on a local workstation by allowing multiple guest operating systems to run on a single physical machine.
Other options:

*Guest OS is what runs inside the virtual machine,
*Cloud and SaaS are remote services, not local virtualization technologies.

NEW QUESTION # 90

Which of the following is the smallest storage unit?

- A. Petabyte
- B. Megabyte
- C. Kilobyte
- D. Terabyte

Answer: C

Explanation:
In terms of size from smallest to largest: Kilobyte < Megabyte < Terabyte < Petabyte.

NEW QUESTION # 91

Which of the following is the most important consideration when opening a file on an OS GUI?

- A. Default permissions
- B. File extension
- C. Data compression
- D. Backup policy

Answer: B

Explanation:
The most important consideration when opening a file on an Operating System Graphical User Interface (OS GUI) is the file extension. A file extension identifies the type of file and determines which software application can open it. In the official CompTIA ITF+ Student Guide, it is stated that:
"The last part of the file name represents an extension, which describes what type of file it is and is used by Windows to associate the file with an application."
"Files are usually opened by double-clicking them. You may want to open a file in a software product other than the default, however. When you right-click a file, the shortcut menu displays a list of suitable choices, or you can choose Open With and browse for a different application. You can also use the Default Programs applet to configure file associations."
"Do not change a file's extension if it is shown. If you delete or change the extension, the file will not be associated with the correct program for opening it." This means the OS uses the file extension to decide which application to use to open a file. Changing or deleting the extension can result in the file not opening properly because it no longer matches the program expected to open it.

NEW QUESTION # 92

Which of the following data types would be best for storing data representing a phone number?

- A. Float
- B. Char
- C. Integer
- D. String

Answer: D

Explanation:
A phone number is best stored as a string because it may include leading zeros, parentheses, dashes, or plus signs, which are not handled properly by numeric data types like integers or floats.
Other options:
*Integer and float are numeric types unsuitable for formatted phone numbers,
*Char holds only a single character.
