While using this APMG-International ISO-IEC-27001-Foundation practice exam software, you can easily customize your APMG-International ISO-IEC-27001-Foundation mock exam conditions such as exam duration, number of questions, and many more. These APMG-International ISO-IEC-27001-Foundation bear the closest resemblance to the actual ISO-IEC-27001-Foundation dumps that will be asked of you in the exam.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 2	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.

Topic 3	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 4	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 5	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 6	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 7	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 8	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.

Examinations ISO-IEC-27001-Foundation Actual Questions, ISO-IEC-27001-Foundation Exam Questions Answers

The web-based ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice exam can be accessed through online browsing anywhere just with a stable internet connection. So the applicants can take the ISO-IEC-27001-Foundation practice exam with ease for the preparation for the ISO-IEC-27001-Foundation Exam. All browsers and operating systems support the web-based ISO-IEC-27001-Foundation practice exam. Users can access it without installing or downloading any excessive plugins or software.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11
Which output is a required result from risk analysis?

- A. Prioritized risks for treatment
- B. Determined levels of risk
- C. Risk acceptance criteria
- D. Risk treatment control options

Answer: B

Explanation:
Clause 6.1.2 (d) states that during risk analysis, the organization shall:
* "assess the potential consequences that would result if the risks identified... were to materialize;"
* "assess the realistic likelihood of the occurrence of the risks identified;"
* "determine the levels of risk."
This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

NEW QUESTION # 12
Which statement describes a requirement for information security objectives?

- A. They shall be reviewed at least annually
- B. They shall be consistent with the information security policy
- C. They shall all be measurable
- D. They shall be contractually transferred to third parties

Answer: B

Explanation:
Clause 6.2 (Information security objectives) requires that objectives:
* "be consistent with the information security policy"
* "be measurable (if practicable)"
* "take into account applicable information security requirements"
* "be monitored, communicated, and updated as appropriate."
From this, option A is correct since consistency with policy is an explicit requirement. Option B is incorrect because the standard allows objectives to be measurable "if practicable" (not mandatory for all). Option C is incorrect-objectives are not transferred contractually to third parties, though third-party agreements may include security requirements. Option D is incorrect because the standard requires regular review "as appropriate," not a fixed annual cycle.
Thus, the verified requirement isA: They shall be consistent with the information security policy.

NEW QUESTION # 13
Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO
/IEC 27001?

- A. To track the use of outsourced processes
- B. To monitor the use of information assets
- C. To ensure that employees and contractors are competent
- D. To evaluate information security performance

Answer: D

Explanation:
Clause 9.1 requires:
"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.
Thus, the verified purpose is A: To evaluate information security performance.

NEW QUESTION # 14
Which information is required to be included in the Statement of Applicability?

- A. The risk assessment approach of the organization
- B. The criteria against which risk will be evaluated
- C. The justification for including each information security control
- D. The scope and boundaries of the ISMS

Answer: C

Explanation:
Clause 6.1.3 (d) requires that the organization'produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.
Therefore, the mandatory requirement for the SoA isjustification for including (or excluding) each information security control.

NEW QUESTION # 15

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Implementing the actions from internal audits
- B. Ensuring information security objectives are established
- C. Communicating feedback from interested parties to the organization
- D. Producing a risk assessment report

Answer: B

Explanation:
Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:
* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"
* "ensuring the integration of the ISMS requirements into the organization's processes;"
* "ensuring that the resources needed for the ISMS are available;"
Among the options, the one explicitly mandated isensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer isB.

NEW QUESTION # 16

......

Our ISO-IEC-27001-Foundation study materials' developers to stand in the perspective of candidate, fully consider their material basis and actual levels of knowledge, formulated a series of scientific and reasonable learning mode, meet the conditions for each user to tailor their learning materials. What's more, our ISO-IEC-27001-Foundation Study Materials are cheap and cheap, and we buy more and deliver more. The more customers we buy, the bigger the discount will be. In order to make the user a better experience to the superiority of our ISO-IEC-27001-Foundation study materials.
