Whenever you have problems about our C-ACDET-2506 study materials, you can contact our online workers via email. We warmly welcome you to experience our considerate service.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	<ul style="list-style-type: none">Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Ace Your C-ACDET-2506 Exam with SAP's Exam Questions and Achieve Success

Our C-ACDET-2506 exam preparation materials are the hard-won fruit of our experts with their unwavering efforts in designing products and choosing test questions. Pass rate is what we care for preparing for an examination, which is the final goal of our C-ACDET-2506 certification guide. According to the feedback of our users, we have the pass rate of 99%, which is equal to 100% in some sense. The high quality of our products also embodies in its short-time learning. You are only supposed to practice C-ACDET-2506 Guide Torrent for about 20 to 30 hours before you are fully equipped to take part in the examination.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which of the following can be used to define relation types and establish a custom relationship? (Select 2 correct answers)

- A. A custom Form Template such as vrealm_1936.formDoc_18697.LessonsLearned
- **B. A standard class such as ariba.basic.core.CommodityCode**
- C. A custom Enumeration such as Contracts_Contract_Type
- **D. A custom Flex Master Data Template such as vrealm_1936.fmd_58984.Hospital**

Answer: B,D

Explanation:

In SAP Ariba, relation types can be defined using custom Flex Master Data (FMD) templates and standard classes such as ariba.basic.core.CommodityCode. These define valid relationships between fields, allowing dependent picklists or filtering logic in forms. Custom enumerations are static lists and are not used to establish dynamic relations, and custom form templates are for form layouts and do not define data relationships.

NEW QUESTION # 53

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? (Select 2 correct answers)

- A. SAP Ariba Category Management
- B. SAP Ariba Buying and Invoicing
- **C. SAP Ariba Contracts**
- **D. SAP Ariba Supplier Lifecycle and Performance**

Answer: C,D

Explanation:

The SAP Ariba Strategic Sourcing Suite typically includes SAP Ariba Contracts and SAP Ariba Supplier Lifecycle and Performance (SLP) solutions. These modules, along with SAP Ariba Sourcing and Supplier Risk, form the core sourcing suite for supplier management, contract lifecycle management, and performance analytics. Category Management and Buying and Invoicing belong to different SAP Ariba product suites focused on procurement and spend management rather than strategic sourcing.

NEW QUESTION # 54

What are the key characteristics of a Bluefield deployment scenario? (Select 2 correct answers)

- A. Many team members have a naive perception of deploying software solutions

- B. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed
- C. The Production site may have live transactions
- D. The Test site has been configured using the SAP Bluefield template

Answer: B,C

Explanation:

A Bluefield deployment means the customer already has an SAP Ariba solution deployed (B), and the production system may be live with ongoing transactions (C). This requires careful, incremental migration to avoid disruption. There is no specific "Bluefield template" for test sites (D), and team perceptions (A) are irrelevant.

NEW QUESTION # 55

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. Neither the templates nor the data is migrated using the tool
- B. Both the templates and their data are fully migrated by the tool.
- C. The templates are migrated by the tool, but the data must be loaded manually later.
- D. Only the data of the flex master data templates is migrated; templates must be created manually.

Answer: C

NEW QUESTION # 56

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Realize
- B. Deploy
- C. Configure
- D. Setup

Answer: A

Explanation:

The Realize phase is where the core configuration activities happen. During Realize, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. Deploy is focused on cutover and go-live, while Configure and Setup are not formal SAP Activate phases for Ariba.

NEW QUESTION # 57

.....

We will give you full refund if you fail to pass the exam after purchasing C-ACDET-2506 learning materials from us.
