Exam UiPath-TAEPv1 Learning, Test UiPath-TAEPv1 Simulator Online
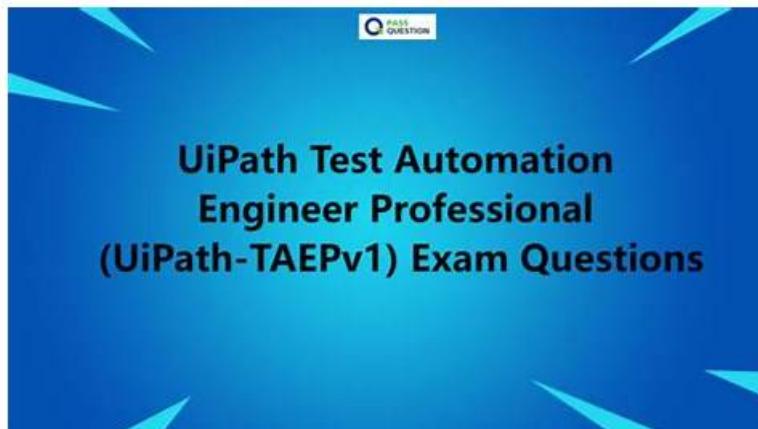

P.S. Free & New UiPath-TAEPv1 dumps are available on Google Drive shared by PassTestking: https://drive.google.com/open?id=1A3Nc2r5Z3-3sfBckNENvLQcafq-2HuTg

If you want to maintain your job or get a better job for making a living for your family, it is urgent for you to try your best to get the UiPath-TAEPv1 certification. We are glad to help you get the certification with our best UiPath-TAEPv1 study materials successfully. Our company has done the research of the study material for several years, and the experts and professors from our company have created the famous UiPath-TAEPv1 learning prep for all customers.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:
Topic 2	• UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 3	• UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 4	• CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.

|	
Topic 5	• UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 6	• UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.
Topic 7	• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 8	• Environments, Applications, and • or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.

Buy UiPath-TAEPv1 Exam Q&A PDF - One Year Free Update

If you come to our website to choose UiPath-TAEPv1 study materials, you will enjoy humanized service. Firstly, we have chat windows to wipe out your doubts about our UiPath-TAEPv1 study materials. You can ask any question about our study materials. All of our online workers are going through special training. They are familiar with all details of our UiPath-TAEPv1 Study Materials. Also, you have easy access to our free demo. Once you apply for our free trials of the study materials, our system will quickly send it via email.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q53-Q58):

NEW QUESTION # 53
According to the troubleshooting Test Manager tips, what is one of the ways to resolve the following issue?

Test cases could not be executed since no executable versions could be found. Only test cases published with the latest package version to Orchestrator can be executed.
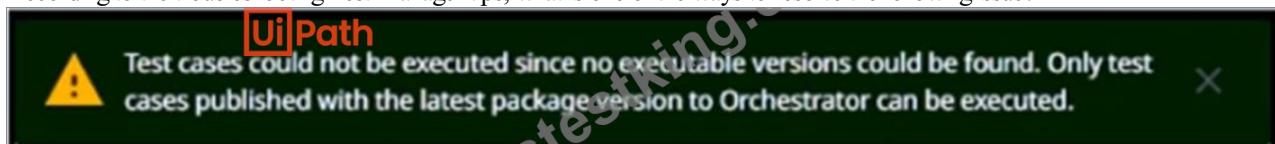

- A. Unlink the automation in Test Manager.
- B. Duplicate the faulty test case within Studio.
- C. Re-link the faulty test case to the test set.
- D. Re-publish the project to Orchestrator.

Answer: D

Explanation:
The warning message indicates that the test cases were not available in the latest published package version. To resolve this, you need to re-publish the project to Orchestrator to ensure all test cases are included and executable.

NEW QUESTION # 54
Which of the following activities are in scope when creating CI/CD Pipelines?

- A. Packing Studio projects Deploying NuGet packages to Orchestrator Setting Triggers in Orchestrator Running Test Sets in Orchestrator
- B. Packing Studio projects Deploying NuGet packages to Orchestrator Running jobs in Orchestrator Running Test Sets in Orchestrator
- C. Packing Studio projects Deploying NuGet packages to Orchestrator Running jobs in Orchestrator Running Test Sets in Orchestrator Creating Orchestrator Queues
- D. Packing Studio projects Deploying NuGet packages to Orchestrator Running jobs in Orchestrator Creating Orchestrator Queues

Answer: B

Explanation:
When creating CI/CD pipelines in UiPath, the following activities are in scope:
These actions enable automated build, test, and deployment of RPA solutions.

NEW QUESTION # 55
How can an input argument be set for a Test Case in an existing Test Set?

- A. Edit the Test Set in UiPath Test Manager and change the value by adding or editing the argument of the Test Case in the Arguments section.
- B. An input argument value ca be changed only at Test Case level in UiPath Orchestrator, not at the Test Set level.
- C. An input argument value ca be changed only at Test Case level in UiPath Test Manager, not at the Test Set level.
- D. Edit the Test Set in UiPath Orchestrator and change the value by adding or editing the argument value of the Test Case in the Arguments section.

Answer: D

Explanation:
To set or modify an input argument for a Test Case in an existing Test Set, you must edit the Test Set in UiPath Orchestrator and update the argument in the Arguments section for that specific test case. This allows customization of test inputs at the execution level.

NEW QUESTION # 56
What is the main purpose of conducting Regression Testing in application development?

- A. Regression Testing is conducted to ensure that changes in the code have not affected existing functionalities.
- B. Regression Testing is conducted to ensure the application's performance under high load conditions.
- C. Regression Testing is conducted to validate whether the software application is secure from threats.
- D. Regression Testing is conducted to ensure the application's compatibility with different environments.

Answer: A

Explanation:
The main purpose of Regression Testing is to ensure that recent changes or additions to the code have not negatively impacted existing functionality. It helps maintain application stability after updates.

NEW QUESTION # 57
How can the activities covered during a test case execution in UiPath Studio be checked?

- A. By checking the Output tab in UiPath Studio.
- B. By opening the Descriptor Coverage panel and double-clicking the test case.
- C. By checking the Run tab under Robot Executor.
- D. By opening the Activity Coverage panel and double-clicking the test case.

Answer: D

Explanation:
The Activity Coverage panel in UiPath Studio shows which activities were executed during a test case run. By double-clicking the test case in this panel, you can review coverage and identify untested or redundant activities.

NEW QUESTION # 58
......

In the course of studying UiPath-TAEPv1 preparation torrent, we will serve you throughout the process, and our back-office staff will provide 24-hour free online consultation. If you have problems with installation and use after purchasing UiPath-TAEPv1 learning prep, we have dedicated staff to provide you with remote online guidance. And if you have any questions about the content of the UiPath-TAEPv1 Exam Questions, please feel free to email us we will try our best to answer you at the first time.
