

100% Pass 2026 ISACA High Pass-Rate CGEIT: Certified in the Governance of Enterprise IT Exam Latest Test Practice

What's more, part of that VCE4Plus CGEIT dumps now are free: https://drive.google.com/open?id=1T1eyEjcOOk6_zWr0C4q6I5j7HWRuV8CD

You can learn from your Certified in the Governance of Enterprise IT Exam (CGEIT) practice test mistakes and overcome them before the actual Certified in the Governance of Enterprise IT Exam (CGEIT) exam. The software keeps track of the previous Certified in the Governance of Enterprise IT Exam (CGEIT) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the ISACA CGEIT Practice Test immediately, which is an excellent way to understand which area needs more attention.

The CGEIT exam is a comprehensive and rigorous exam that covers key areas of IT governance, including strategic alignment, value delivery, risk management, resource management, and performance measurement. CGEIT exam is designed to test the candidate's understanding of the principles and practices of IT governance and their ability to apply them in real-world situations. CGEIT exam is also designed to ensure that candidates have the skills and knowledge required to provide assurance services and advise senior management on the governance of IT.

The CGEIT Exam covers topics such as IT governance frameworks, strategic management, risk management, and IT resource management. Candidates must have a minimum of five years of experience in IT governance, including experience in one or more of the exam domains. CGEIT exam is four hours long and consists of 150 multiple-choice questions. Candidates must achieve a minimum score of 450 out of 800 to pass the exam.

The CGEIT certification exam is a four-hour computer-based exam that consists of 150 multiple-choice questions. CGEIT exam assesses the candidate's understanding of IT governance principles and practices, risk management, strategic alignment, value delivery, and resource management. CGEIT Exam is administered by ISACA, a leading global association that provides IT governance, security, and assurance professionals with the knowledge, tools, and resources they need to excel in their roles.

ISACA Certified in the Governance of Enterprise IT Exam Sample Questions (Q659-Q664):

NEW QUESTION # 659

Which of the following provides the BEST evidence of effective IT governance?

- A. IT risk identification and mitigation
- B. Comprehensive IT policies and procedures
- C. Business value and customer satisfaction
- D. Cost savings and human resource optimization

Answer: C

Explanation:

Effective IT governance is the process of ensuring that IT supports the achievement of the organization's goals and objectives, and delivers value to its stakeholders¹. IT governance involves aligning the IT strategy, policies, processes, and resources with the business strategy, needs, and expectations². Therefore, the BEST evidence of effective IT governance is business value and customer satisfaction. Business value is the measure of the benefits and outcomes that IT provides to the organization, such as increased revenue, reduced costs, improved efficiency, enhanced innovation, or competitive advantage³. Customer satisfaction is the measure of the quality and performance of IT services and products, as perceived by the internal and external customers of the organization, such as employees, partners, suppliers, or end-users. By demonstrating business value and customer satisfaction, IT governance can show that IT is aligned with and supports the business goals and objectives.

The other options are not as good as option B. While cost savings and human resource optimization, IT risk identification and mitigation, and comprehensive IT policies and procedures are important aspects of IT governance, they are not sufficient to demonstrate effective IT governance. They are rather means to achieve the end goal of delivering business value and customer satisfaction. They do not necessarily reflect the extent to which IT supports the achievement of the organization's goals and objectives. References :=

NEW QUESTION # 660

Which of the following is the BEST way to maximize the value of an enterprise's information asset base?

- A. Facilitate widespread user access to all information assets
- B. Seek additional opportunities to leverage existing information assets .
- C. Regularly purge information assets to minimize maintenance costs
- D. Implement an automated information management platform

Answer: D

NEW QUESTION # 661

Which of the following processes are covered by Service Strategy? Each correct answer represents a complete solution. Choose all that apply.

- A. IT Financial Management
- B. IT Architecture Management
- C. Supplier Management
- D. Service Portfolio Management
- E. Demand Management

Answer: A,C,D,E

NEW QUESTION # 662

Which of the following is PRIMARILY achieved through performance measurement?

- A. Transparency
- B. Benefit realization
- C. Process improvement
- D. Cost efficiency

Answer: A

Explanation:

Transparency is primarily achieved through performance measurement, as it involves providing clear, accurate, and timely information about the performance of IT processes, services, and projects to the relevant stakeholders. Performance measurement can help to increase the visibility, accountability, and trustworthiness of IT activities and outcomes, and to enable informed decision-making and feedback. The other options are not as primary, as they are more related to the results or consequences of performance measurement, rather than the purpose or intention of it. NEW QUESTION # 663

A small enterprise has just hired its first CIO, who has been tasked with making the IT department more efficient. What should be the CIO's NEXT step after identifying several new improvement initiatives?

- A. Mandate IT staff training.
- B. Allocate funding for the initiatives.
- C. Require a cost-benefit analysis.
- D. Request an IT balanced scorecard.

Answer: C

Explanation:

A cost-benefit analysis (CBA) is a process that's used to estimate the costs and benefits of projects or investments to determine their profitability for an organization. A CBA is a versatile method that's often used for business administration, project management and public policy decisions1. A CBA can help the CIO prioritize the improvement initiatives based on their expected value and feasibility, and justify the allocation of resources and funding for them. A CBA can also align the IT goals with the enterprise objectives and demonstrate the IT value delivery to the stakeholders2. Reference:=
