

Free PDF Fortinet - High-quality FCSS_EFW_AD-7.4 - FCSS - Enterprise Firewall 7.4 Administrator New Dumps Book

BONUS!!! Download part of LatestCram FCSS_EFW_AD-7.4 dumps for free: <https://drive.google.com/open?id=15L44Qy9QmGuHqynz-qVA4ythioJ0DFWD>

LatestCram You can modify settings of practice test in terms of FCSS_EFW_AD-7.4 practice questions types and mock exam duration. Both FCSS_EFW_AD-7.4 exam practice tests (web-based and desktop) save your every attempt and present result of the attempt on the spot. Actual exam environments of web-based and desktop Fortinet FCSS_EFW_AD-7.4 Practice Test help you overcome exam fear.

Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills on our FCSS_EFW_AD-7.4 exam questions. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our FCSS_EFW_AD-7.4 Exam Materials and to be our long-term partner. For we carry forward the spirit of "firm & indomitable, developing & innovative, achieving the first class", serving customers with all our heart and soul with our wonderful FCSS_EFW_AD-7.4 practice braindumps.

FCSS_EFW_AD-7.4 Passed, Reliable FCSS_EFW_AD-7.4 Exam Sims

Our FCSS_EFW_AD-7.4 exam prepare is definitely better choice to help you go through the test. Will you feel that the product you have brought is not suitable for you? One trait of our FCSS_EFW_AD-7.4 exam prepare is that you can freely download a demo to have a try. Because there are excellent free trial services provided by our FCSS_EFW_AD-7.4 exam guides, our products will provide three demos that specially designed to help you pick the one you are satisfied. The key trait of our product is that we keep pace with the changes of syllabus and the latest circumstance to revise and update our FCSS_EFW_AD-7.4 Study Materials, and we are available for one-year free updating to assure you of the reliability of our service.

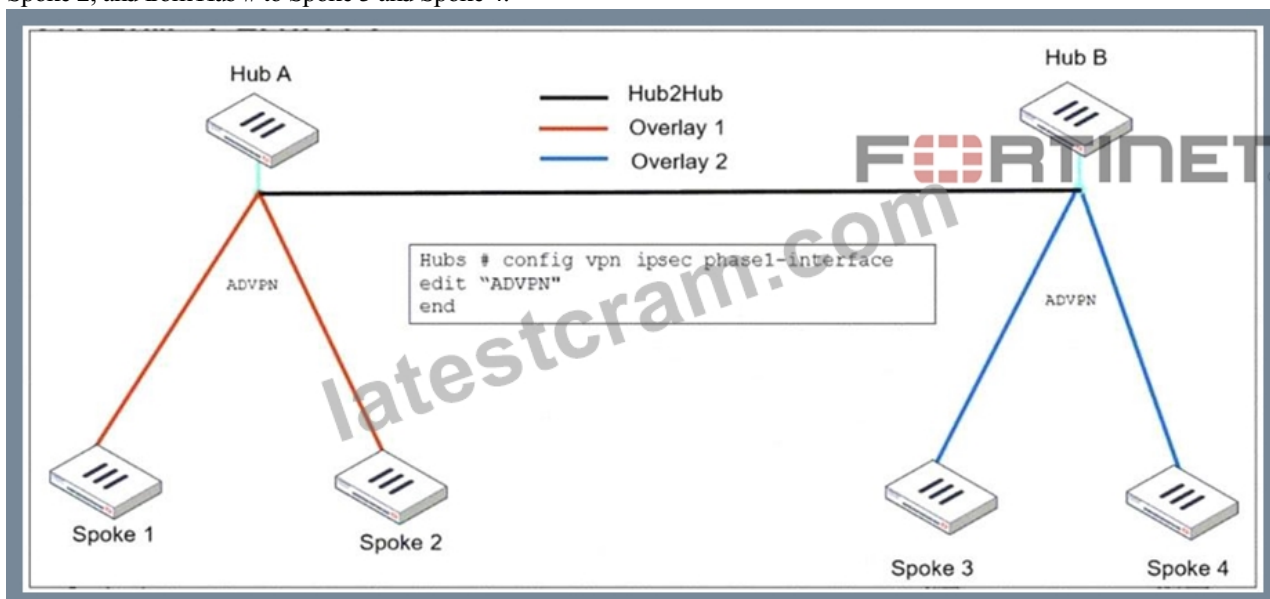

Fortinet FCSS_EFW_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Security Profiles: This section of the exam measures the skills of Network Security Engineers and focuses on managing security inspection profiles, including SSL and SSH inspections. Candidates will learn to apply a combination of web filtering, application control, and Internet Service Database (ISDB) to enhance network security. The section also covers integrating Intrusion Prevention Systems (IPS) to monitor and mitigate threats within enterprise networks.
Topic 2	<ul style="list-style-type: none"> System Configuration: This section of the exam measures the skills of Network Security Engineers and covers the implementation of the Fortinet Security Fabric, ensuring seamless integration across security solutions. It also includes configuring hardware acceleration on FortiGate devices to optimize performance. Candidates will learn to set up different operation modes for high-availability clusters and implement enterprise networks using VLANs and VDOMs. Additionally, it covers various use case scenarios that demonstrate how Fortinet solutions contribute to secure network environments.
Topic 3	<ul style="list-style-type: none"> Central Management: This section of the exam measures the skills of Security Administrators and focuses on implementing central management for Fortinet security solutions. It includes configuring and managing devices centrally to streamline network security operations. Candidates will understand how to maintain consistency in security policies and automate deployments for efficient management of large-scale enterprise environments.
Topic 4	<ul style="list-style-type: none"> VPN: This section of the exam measures the skills of Network Security Engineers and covers the implementation of secure communication tunnels for enterprise environments. Candidates will learn to configure IPsec VPN with IKE version 2 to establish encrypted connections. The section also includes the implementation of ADVPN to enable on-demand VPN tunnels between different sites, ensuring secure and dynamic connectivity.
Topic 5	<ul style="list-style-type: none"> Routing: This section of the exam measures the skills of Security Administrators and covers the implementation of advanced routing protocols to manage enterprise traffic effectively. Candidates will gain expertise in configuring Open Shortest Path First (OSPF) for dynamic routing and Border Gateway Protocol (BGP) to facilitate communication between different networks, ensuring efficient traffic flow across enterprise environments.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q13-Q18):

NEW QUESTION # 13

Refer to the exhibit, which shows the ADVPN IPsec interface representing the VPN IPsec phase 1 from Hub A to Spoke 1 and Spoke 2, and from Hub B to Spoke 3 and Spoke 4.

An administrator must configure an ADVPN using IBGP and EBGP to connect overlay network 1 with 2. What must the administrator configure in the phase 1 VPN IPsec configuration of the ADVPN tunnels?

- A. set auto-discovery-sender enable and set network-id x
- B. set auto-discovery-forwarder enable and set remote-as x
- **C. set auto-discovery-crossover enable and set enforce-multihop enable**
- D. set auto-discovery-receiver enable and set npu-offload enable

Answer: C

Explanation:

When configuring ADVPN (Auto-Discovery VPN) to connect overlay networks across different hubs using IBGP and EBGP, special configurations are required to allow spokes from different overlay networks to dynamically establish tunnels.

#set auto-discovery-crossover enable

This allows cross-hub tunnel discovery in an ADVPN deployment where multiple hubs are used.

Since Hub A and Hub B belong to different overlays, enabling crossover discovery ensures that spokes from one overlay can dynamically create direct tunnels to spokes in the other overlay when needed.

#set enforce-multihop enable

This setting ensures that BGP peers using loopback interfaces can establish connectivity even if they are not directly connected.

Multihop BGP sessions are required when using loopback addresses as BGP peer sources because the connection might need to traverse multiple routers before reaching the BGP neighbor.

This is especially useful in ADVPN deployments with multiple hubs, where routes might need to cross from one hub to another.

NEW QUESTION # 14

An administrator is extensively using VXLAN on FortiGate. Which specialized acceleration hardware does FortiGate need to improve its performance?

- **A. NP7**
- B. NTurbo
- C. SP5
- D. 0

Answer: A

Explanation:

VXLAN (Virtual Extensible LAN) is an overlay network technology that extends Layer 2 networks over Layer 3 infrastructure.

When VXLAN is used extensively on FortiGate, hardware acceleration is crucial for maintaining performance.

NP7 (Network Processor 7) is Fortinet's latest network processor designed to accelerate high-performance networking features, including:

- VXLAN encapsulation/decapsulation
- IPsec VPN offloading
- Firewall policy enforcement
- Advanced threat protection at wire speed

NP7 significantly reduces latency and improves throughput when handling VXLAN traffic, making it the best choice for large-scale VXLAN deployments.

NEW QUESTION # 15

An administrator is checking an enterprise network and sees a suspicious packet with the MAC address e0:23:fffc:00:86.

What two conclusions can the administrator draw? (Choose two.)

- **A. The suspicious packet is related to a cluster that has VDOMs enabled.**
- B. The network includes FortiGate devices configured with the FGSP protocol.
- C. The suspicious packet corresponds to port 7 on a FortiGate device.
- **D. The suspicious packet is related to a cluster with a group-id value lower than 255.**

Answer: A,D

Explanation:

The MAC address 02:23:ff:fc:00:86 follows the format used in FortiGate High Availability (HA) clusters. When FortiGate devices are in an HA configuration, they use virtual MAC addresses for failover and redundancy purposes. The suspicious packet is related to a cluster that has VDOMs enabled: FortiGate devices with Virtual Domains (VDOMs) enabled use specific MAC address ranges to differentiate HA-related traffic. This MAC address is likely part of that mechanism. The suspicious packet is related to a cluster with a group-id value lower than 255: FortiGate HA clusters assign virtual MAC addresses based on the group ID. The last octet (00:86) corresponds to a group ID that is below 255, confirming this option.

NEW QUESTION # 16

Which two statements about an auxiliary session are true? (Choose two.)

- A. With the auxiliary session setting enabled, two sessions will be created in case of routing change.
- B. With the auxiliary session disabled, only auxiliary sessions will be offloaded.
- C. With the auxiliary session setting disabled, for each traffic path, FortiGate will use the same auxiliary session.
- D. With the auxiliary session setting enabled, ECMP traffic is accelerated to the NP6 processor.

Answer: B,C

NEW QUESTION # 17

Which of the following steps are executed to get antivirus and IPS updates using the pull method? (Choose three.)

- A. FortiGate periodically queries for pending updates.
- B. FortiGate gets a list of server IP addresses that can be contacted.
- C. FortiGate contacts DNS to resolve update.fortiguard.net.
- D. FortiGate starts sending rating queries to one of the servers in the list.
- E. FortiGate registers its public IP address in FortiGuard.

Answer: A,B,C

NEW QUESTION # 18

.....

They are not forced to buy one format or the other to prepare for the FCSS - Enterprise Firewall 7.4 Administrator FCSS_EFW_AD-7.4 exam. LatestCram designed Fortinet FCSS_EFW_AD-7.4 exam preparation material in FCSS - Enterprise Firewall 7.4 Administrator FCSS_EFW_AD-7.4 PDF and practice test. If you prefer PDF Dumps notes or practicing on the FCSS - Enterprise Firewall 7.4 Administrator FCSS_EFW_AD-7.4 practice test software, use either.
