The Best The Open Group - OGEA-103 - TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Exam Questions Vce

P.S. Free 2025 The Open Group OGEA-103 dumps are available on Google Drive shared by Pass4sures: https://drive.google.com/open?id=11WRh50fIW1o4JyEi3j0TeAv3YbhSetqw

In a knowledge-based job market, learning is your quickest pathway, your best investment. Knowledge is wealth. Modern society needs solid foundation, broad knowledge, and comprehensive quality of compound talents. Our OGEA-103 certification materials can help you transfer into a versatile talent. Many job seekers have successfully realized financial freedom with the assistance of our OGEA-103 test training. All your dreams will be fully realized after you have obtained the OGEA-103 certificate. Finding a good paying job is available for you. Good chances are few. Please follow your heart.

Through years of efforts and constant improvement, our OGEA-103 exam materials stand out from numerous study materials and become the top brand in the domestic and international market. Our company controls all the links of OGEA-103 training materials which include the research, innovation, survey, production, sales and after-sale service strictly and strives to make every link reach the acme of perfection. Our company pays close attentions to the latest tendency among the industry and the clients' feedback about our OGEA-103 Certification guide.

>> OGEA-103 Exam Questions Vce <<

Pass Guaranteed Updated The Open Group - OGEA-103 Exam Questions Vce

Maybe you can find the data on the website that our OGEA-103 training materials have a very high hit rate, and as it should be, our pass rate of the OGEA-103 exam questions is also very high. Maybe you will not consciously think that it is not necessary to look at the data for a long time to achieve such a high pass rate? While OGEA-103 practice quiz give you a 99% pass rate, you really only need to spend very little time.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45
What is present in all phases within the ADM and should be identified, classified and mitigated before starting a transformation effort?

- A. Schedule constraints
- B. Budgetary constraints
- C. Information gaps
- D. Risk

Answer: D

Explanation:
According to the TOGAF Standard, 10th Edition, risk is present in all phases within the Architecture Development Method (ADM), and it should be identified, classified, and mitigated before starting a transformation effort 1. Risk is defined as "the effect of uncertainty on objectives" 2, and it can have positive or negative impacts on the architecture project. Risk management is a technique that helps to assess and address the potential risks that may affect the achievement of the architecture objectives, and to balance the trade-offs between opportunities and threats. Risk management is applied throughout the ADM cycle, from the Preliminary Phase to the Requirements Management Phase, and it is integrated with other techniques, such as stakeholder management, business transformation readiness assessment, gap analysis, and migration planning
1. The other options are not correct, as they are not present in all phases within the ADM, and they are not necessarily identified, classified, and mitigated before starting a transformation effort. Budgetary constraints are the limitations on the financial resources available for the architecture project, and they are usually considered in Phase E: Opportunities and Solutions, and Phase F: Migration Planning 3. Schedule constraints are the limitations on the time available for the architecture project, and they are also usually considered in Phase E and F 3. Information gaps are the missing or incomplete data or knowledge that may affect the architecture project, and they are usually identified in Phase B: Business Architecture, Phase C: Information Systems Architecture, and Phase D: Technology Architecture . References: 1: TOGAF Standard, 10th Edition, Part III: ADM Guidelines and Techniques, Chapter 32: Risk Management. 2: TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions. 3: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 16: Phase E: Opportunities and Solutions, and Chapter 17: Phase F: Migration Planning. : TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 13: Phase B: Business Architecture, Chapter 14: Phase C: Information Systems Architecture, and Chapter 15: Phase D: Technology Architecture.

NEW QUESTION # 46
Complete the sentence. Actions arising from the Business Transformation Readiness Assessment technique should be incorporated in the

- A. Architecture Requirements Specification
- B. Architecture Roadmap
- C. Implementation Governance Model
- D. Implementation and Migration Plan

Answer: D

Explanation:
The Business Transformation Readiness Assessment technique is used to evaluate the readiness of the organization to undergo change and to identify the actions needed to increase the likelihood of a successful business transformation. These actions should be incorporated in the Implementation and Migration Plan, which is the detailed plan to transition from the Baseline Architecture to the Target Architecture. The Implementation and Migration Plan also includes the Transition Architectures, the Architecture Building Blocks, the Work Packages, the Implementation Governance Model, and the Architecture Contract12

NEW QUESTION # 47

Which of the following statements about architecture partitioning is correct?

- A. Partitions are equivalent to architecture levels.
- B. Partitions are defined and assigned to agile Enterprise Architecture teams.
- C. Partitions reflect the organization's structure.
- D. Partitions are used to simplify the management of the Enterprise Architecture.

Answer: D

Explanation:
Based on the web search results, architecture partitioning is a technique that divides the Enterprise Architecture into smaller and manageable segments or groups, based on various classification criteria, such as subject matter, time, maturity, volatility, etc.12 Architecture partitioning is used to simplify the development and management of the Enterprise Architecture, by reducing complexity, improving governance, enhancing reusability, and increasing alignment and agility12. Therefore, the statement that partitions are used to simplify the management of the Enterprise Architecture is correct.
The other statements are incorrect because:
* Partitions are not equivalent to architecture levels. Architecture levels are different layers of abstraction that describe the Enterprise Architecture from different perspectives, such as strategic, segment, and capability3. Partitions are subsets of architectures that are defined within or across the levels, based on specific criteria1.
* Partitions do not necessarily reflect the organization's structure. The organization's structure is one possible criterion for partitioning the architecture, but it is not the only one. Other criteria, such as business function, product, service, geography, etc., can also be used to partition the architecture12.
* Partitions are not defined and assigned to agile Enterprise Architecture teams. Agile Enterprise Architecture is an approach that applies agile principles and practices to the architecture work, such as iterative development, frequent feedback, adaptive planning, and continuous delivery4. Partitions are not a specific feature of agile Enterprise Architecture, but a general technique that can be applied to any architecture method or framework, including TOGAF12.

NEW QUESTION # 48

Please read this scenario prior to answering the question
You are working as the Chief Enterprise Architect within a law firm specializing in personal injury cases.
Many of the firm's competitors have improved their litigation strategies, and efficiency by streamlining their processes using Artificial Intelligence {Al).
The CIO has approved a Request for Architecture Work to examine the use of Machine Learning in defining a new Al-driven litigation and finance process for the firm. This process would instruct the lawyers and analysts as to what tasks and portfolio they should work on. The key objectives are to increase task profitability, maximize staff utilization, and increase individual profitability. The CIO has emphasized that the architecture should enable the fast implementation of continuous Machine Learning. The solution will need to be constantly measured for delivered value and be quickly iterated to success.
Some of the partners have expressed concerns about letting the Al make the decisions, others about the risks associated with use of it for the type of service they deliver. The CIO wants to know if these concerns can be addressed, and how risks will be covered by a new architecture enabling Al and Machine Learning.
Refer to the scenario
You have been asked to respond to the CIO recommending an approach that would enable the development of an architecture that addresses the concerns of the CIO and the concerns of the partners.
Based on the TOGAF standard which of the following is the best answer?

- A. You recommend that all possible models be created for each candidate architecture that will enable the Al and Machine Learning solution. This ensures that all the necessary data and detail is addressed. A formal review should be held with the stakeholders to verify that their concerns have been properly addressed by the models. Agility will be considered during Phase G Implementation Governance.
- B. You recommend that a Communications Plan be created to address the key stakeholders, the most powerful and influential partners. This plan should include a report that summarizes the key features of the architecture reflecting their requirements. You will check with each key stakeholder that their concerns are being addressed. Risk mitigation and agility will be explicitly addressed as a component of the architecture being developed.
- C. You recommend that an analysis of the stakeholders is undertaken resulting in documenting the stakeholders and their concerns in a Stakeholder Map. The concerns and relevant views should then be defined for each group and recorded in the Architecture Vision document. Therequirements will include risk mitigation through regular assessments. This will also allow a supervised agile implementation of the continuous Machine Learning.
- D. You recommend creation of a set of business models that can be applied uniformly across all architecture projects. The stakeholders will be trained to understand the business models to ensure they can see that their concerns are being addressed.

Risk will be addressed once the Security Architecture is developed, which will happen later to avoid slowing down the agility required by the CIO.

Answer: C

Explanation:
A Stakeholder Map is a technique that can be used to identify and classify the stakeholders of the architecture work, and to document their key interests, requirements, and concerns. A stakeholder is any person, group, or organization that has a stake in the outcome of the architecture work, such as the sponsor, the client, the users, the suppliers, the regulators, or the competitors. A Stakeholder Map can help to understand the needs and expectations of the stakeholders, and to communicate and engage with them effectively1 The steps for creating a Stakeholder Map are:
Identify the stakeholders of the architecture work, using various sources and methods, such as interviews, surveys, workshops, or existing documents.
Classify the stakeholders according to their roles, responsibilities, and relationships, using various criteria and dimensions, such as power, influence, interest, attitude, or impact.
Define the concerns and relevant views for each stakeholder group, using various techniques, such as business scenarios, use cases, or value propositions. A concern is a key interest or issue that is relevant to the stakeholder, such as a goal, a problem, a need, or a risk. A view is a representation of the system of interest from the perspective of one or more stakeholders and their concerns.
Record the stakeholders and their concerns in a Stakeholder Map, which shows the mapping between the stakeholder groups, the concerns, and the views. The Stakeholder Map also shows the dependencies, assumptions, and issues related to each stakeholder and concern.
Therefore, the best answer is B, because it recommends the approach that would enable the development of an architecture that addresses the concerns of the CIO and the partners, using the Stakeholder Map technique.
The answer covers the following aspects:
An analysis of the stakeholders is undertaken, which involves identifying, classifying, and defining the stakeholders and their concerns.
The stakeholders and their concerns are documented in a Stakeholder Map, which provides a clear and comprehensive picture of the stakeholder landscape and their interests.
The concerns and relevant views are recorded in the Architecture Vision document, which is the output of Phase A: Architecture Vision of the Architecture Development Method (ADM), which is the core process of the TOGAF standard that guides the development and management of the enterprise architecture. The Architecture Vision defines the scope and approach of the architecture work, and establishes the business goals and drivers that motivate the architecture work. The Architecture Vision also involves obtaining the approval and commitment of the sponsors and other key stakeholders, and initiating the Architecture Governance process2 The requirements include risk mitigation through regular assessments, which involves identifying, analyzing, and evaluating the risks that may affect the architecture, and determining the appropriate measures or actions to prevent, reduce, or mitigate the risks. Risk mitigation can also involve monitoring and reviewing the risk situation, and communicating and reporting the risk status and actions3 This approach also allows a supervised agile implementation of the continuous Machine Learning, which involves applying agile principles and practices to the architecture development and implementation, such as iterative and incremental delivery, frequent feedback, collaboration, and adaptation. A supervised agile implementation can help to ensure the quality, value, and alignment of the architecture, and to respond to the changing needs and expectations of the stakeholders.
1: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 24: Stakeholder Management 2: The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 18: Phase A: Architecture Vision 3: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 32: Risk Management : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 29: Applying Iteration to the ADM

NEW QUESTION # 49
Which of the following best describes purpose of the Business Scenarios?

- A. To identify risk when implementing an architecture project
- B. To guide decision making throughout the enterprise
- C. To identify and understand requirements
- D. To catch errors in a project architecture early

Answer: C

Explanation:
Explanation
Business scenarios are a technique for capturing, clarifying, and communicating the functional and non-functional requirements of a system. Business scenarios describe the business environment, the actors involved, the desired outcomes, and the processes or rules that govern the behavior of the system. Business scenarios are useful for ensuring that the architecture addresses the real needs and

concerns of the stakeholders, and for validating and testing the architecture against expected situations. Business scenarios are developed in Phase A: Architecture Vision of the ADM cycle, and refined and updated throughout the other phases3 References: 3: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 26: Business Scenarios : The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 18: Phase A: Architecture Vision

NEW QUESTION # 50

......

The policy of "small profits "adopted by our company has enabled us to win the trust of all of our OGEA-103 customers, because we aim to achieve win-win situation between all of our customers and our company. And that is why even though our company has become the industry leader in this field for so many years and our OGEA-103 Exam Materials have enjoyed such a quick sale all around the world we still keep an affordable price for all of our customers and never want to take advantage of our famous brand.

Reliable OGEA-103 Exam Tutorial: https://www.pass4sures.top/Enterprise-Architecture/OGEA-103-testking-braindumps.html

The Open Group OGEA-103 Exam Questions Vce Our online workers are responsible for solving all your problems with twenty four hours service, Believe that the more the potential of students is inspired, the more the knowledge will be transformed to ability, Reliable OGEA-103 Exam Tutorial - TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam updated vce will motivate you maximally, You can only use test engine on the Windows operating system, but online version supports Windows/Mac/Android/iOS operating systems that mean you can practice The Open Group OGEA-103 test questions or test yourself on any electronic equipment.

You should understand how hubs, bridges, switches, and routers OGEA-103 segment the networks, as well as how they divide broadcast and collision domains, Finder Window Improvements.

Our online workers are responsible for solving OGEA-103 Actual Exam Dumps all your problems with twenty four hours service, Believe that the more the potential of students is inspired, the more the knowledge New OGEA-103 Exam Vce will be transformed to ability, TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam updated vce will motivate you maximally.

Efficient OGEA-103 Exam Questions Vce | Amazing Pass Rate For OGEA-103 Exam | Professional OGEA-103: TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam

You can only use test engine on the Windows OGEA-103 Actual Exam Dumps operating system, but online version supports Windows/Mac/Android/iOS operating systems that mean you can practice The Open Group OGEA-103 Test Questions or test yourself on any electronic equipment.

So, how to get out of the embarrassing dilemma is very important, To keep our questions up to date, we constantly review and revise them to be at par with the latest OGEA-103 syllabus for The Open Group certification.
