All workers of our company are working together, in order to produce a high-quality product for candidates. I believe that our C_S4CFI_2408 exam torrent will be very useful for your future.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Financial Accounting Sample Questions (Q76-Q81):

NEW QUESTION # 76

What is the result of an automatic payment run? Note: There are 3 correct answers to this question

- A. Payment blocks
- B. Payment media
- C. Payment documents
- D. Repayment plan
- E. Payment log

Answer: B,C,E

NEW QUESTION # 77

On what level can you restrict postings using the posting period variant? Note: There are 2 correct answers to this question

- A. Customer reconciliation account
- B. Fixed asset number
- C. G/L account
- D. Supplier account

Answer: A,C

Explanation:
Using the posting period variant in SAP S/4HANA Cloud Public Edition, you can restrict postings at the level of the Customer reconciliation account and General Ledger (G/L) account. This feature enables organizations to control the posting periods for specific accounts, ensuring that postings are made only within the designated periods. It's particularly useful for managing the closing of financial periods and ensuring the integrity of financial data.

SAP S/4HANA Cloud Financial Accounting configuration guide
SAP Help Portal on posting period variant settings

NEW QUESTION # 78

You have started a project that requires help from external workers who submit their hours worke.. weekly. The manager responsible for this workforce approves the reported times irregularly. This Translation causes the accountants to have to track multiple sources and make manual calculations as they must show the expected expense even for unapproved submissions.
Which process automated by the SAP S/4HANA system can support the accounting department?

- A. Purchase order deferrals
- B. Purchase order accruals
- C. Service entry sheet deferrals
- D. Service entry sheet accruals

Answer: C

NEW QUESTION # 79

You are recording actions for custom process steps in a test automate. When do you press the "Read" button on the recording panel?
Note: There are 2 correct answers to this question.

- A. To capture a static label on the screen that should be checked during test execution
- B. To capture text in a message screen that can be used for data binding later
- C. To capture an error message on the screen that can be used later
- D. To capture a value in a text field that should be stored as a variable

Answer: A,D

Explanation:
Comprehensive and Detailed in Depth Explanation:In SAP S/4HANA Cloud's Test Automation Tool (available via SAP Cloud ALM), the "Read" button is used during test script recording to capture screen elements for validation or variable assignment during automated test execution.

* Option A (To capture a static label on the screen that should be checked during test execution):
Correct. Static labels (e.g., field names or titles) are often captured to verify UI consistency or screen navigation during test runs. This ensures the test validates expected screen content.
* Option B (To capture a value in a text field that should be stored as a variable):Correct. The
"Read" function can extract dynamic values (e.g., an invoice number) from text fields, storing them as variables for use in subsequent steps, such as validations or inputs.
* Option C (To capture an error message on the screen that can be used later):Incorrect. While error messages can be validated, the "Read" button is not typically used for this; instead, assertions or specific error-handling steps are recorded separately.
* Option D (To capture text in a message screen that can be used for data binding later):Incorrect.
Message screens (e.g., pop-ups) are handled differently, often via specific actions like "Confirm" or
"Check Message," not the generic "Read" function.

NEW QUESTION # 80
Which technologies should you use to integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution?
Note: There are 2 correct answers to this question.

* A. SAP Integration Suite
* B. SAP Process Orchestration
* C. Predelivered APIs
* D. SAP Cloud Connector

Answer: A,C

Explanation:
Comprehensive and Detailed in Depth Explanation:Cloud-to-cloud integration in SAP uses modern technologies.
* A:Correct. Predelivered APIs enable standard integration.
* B:Correct. Integration Suite handles complex scenarios.
* C, D:Incorrect. These are for on-premise integration.References:SAP Help Portal - "Cloud Integration Technologies."

NEW QUESTION # 81
......
