Time is valued especially when we are all caught up with plans and still step with the handy matters. If you suffer from procrastination and cannot make full use of your sporadic time during your learning process, it is an ideal way to choose our SC-300 training materials. We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your SC-300 Certification successfully. You will have a full understanding about our SC-300 guide torrent after you have a try on our SC-300 exam questions.

Microsoft SC-300 (Microsoft Identity and Access Administrator) Certification Exam is designed to validate the skills and knowledge of IT professionals in managing and securing Microsoft's identity and access solutions. SC-300 exam is ideal for those who aspire to become certified identity and access administrators and want to demonstrate their expertise in implementing and managing identity and access solutions on the Microsoft platform.

The SC-300 Certification Exam is ideal for IT professionals who are responsible for implementing security measures across different technologies and platforms. SC-300 exam covers various security concepts, including identity and access management, authentication, authorization, and password management. It also covers technologies such as Azure AD, conditional access policies, role-based access control, and multi-factor authentication.

Topic 2, Contoso, Ltd

Overview

Contoso, Ltd is a consulting company that has a main office in Montreal offices in London and Seattle.

Contoso has a partnership with a company named Fabrikam, Inc. Fabrikam has an Azure Active Directory (Azure AD) tenant named fabrikam.com.

Existing Environment

The on-premises network of Contoso contains an Active Directory domain named contos.com. The domain contains an organizational unit (OU) named Contoso_Resources. The Contoso_Resources OU contains all users and computers.

The Contoso.com Active Directory domain contains the users shown in the following table.

Microsoft 365/Azure Environment

Contoso has an Azure AD tenant named Contoso.com that has the following associated licenses:

- * Microsoft Office 365 Enterprise E5
- * Enterprise Mobility + Security
- * Windows 10 Enterprise E5
- * Project Plan 3

Azure AD Connect is configured between Azure AD and Active Directory Domain Serverless (AD DS). Only the Contoso Resources OU is synced.

Helpdesk administrators routinely use the Microsoft 365 admin center to manage user settings.

User administrators currently use the Microsoft 365 admin center to manually assign licenses. All users have all licenses assigned besides following exception:

The users in the London office have the Microsoft 365 admin center to manually assign licenses. All users have licenses assigned besides the following exceptions:

- * The users in the London office have the Microsoft 365 Phone System License unassigned.
- * The users in the Seattle office have the Yammer Enterprise License unassigned.

Security defaults are disabled for Contoso.com.

Contoso uses Azure AD Privileged Identity Management (PIM) to project administrator roles.

Problem Statements

Contoso identifies the following issues:

- * Currently, all the helpdesk administrators can manage user licenses throughout the entire Microsoft 365 tenant.
- * The user administrators report that it is tedious to manually configure the different license requirements for each Contoso office.
- * The helpdesk administrators spend too much time provisioning internal and guest access to the required Microsoft 365 services and apps.
- * Currently, the helpdesk administrators can perform tasks by using the: User administrator role without justification or approval.
- * When the Logs node is selected in Azure AD, an error message appears stating that Log Analytics integration is not enabled.

Planned Changes

Contoso plans to implement the following changes.

Implement self-service password reset (SSPR). Analyze Azure audit activity logs by using Azure Monitor- Simplify license allocation for new users added to the tenant. Collaborate with the users at Fabrikam on a joint marketing campaign. Configure the User administrator role to require justification and approval to activate.

Implement a custom line-of-business Azure web app named App1. App1 will be accessible from the internet and authenticated by using Azure AD accounts.

For new users in the marketing department, implement an automated approval workflow to provide access to a Microsoft SharePoint Online site, group, and app.

Contoso plans to acquire a company named Corporation. One hundred new Adatum users will be created in an Active Directory OU named Adatum. The users will be located in London and Seattle.

Technical Requirements

Contoso identifies the following technical requirements:

- * AH users must be synced from AD DS to the contoso.com Azure AD tenant.
- * App1 must have a redirect URI pointed to <https://contoso.com/auth-response>.
- * License allocation for new users must be assigned automatically based on the location of the user.
- * Fabrikam users must have access to the marketing department's SharePoint site for a maximum of 90 days.
- * Administrative actions performed in Azure AD must be audited. Audit logs must be retained for one year.
- * The helpdesk administrators must be able to manage licenses for only the users in their respective office.
- * Users must be forced to change their password if there is a probability that the users' identity was compromised.

NEW QUESTION # 276

You have a Microsoft Entra tenant named contoso.com that contains an enterprise application named App1.

A contractor uses the credentials of user1@outlook.com.

You need to ensure that you can provide the contractor with access to App1. The contractor must be able to authenticate as user1@outlook.com.

What should you do?

- A. Implement Microsoft Entra Application Proxy.
- B. Implement Microsoft Entra Connect sync.
- C. Add a custom domain name to contoso.com.
- D. Run the New-MgInvitationcmdlet.

Answer: D

Explanation:

- * Create a guest user account in contoso.com.
- * Run the New-AzureADMSInvitation cmdlet. [For Microsoft Active Directory]
- * Run the New-MgInvitationcmdlet. [For Microsoft Entra]

Note:

* New-AzureADMSInvitation

This cmdlet is used to invite a new external user to your directory.

* New-MgInvitation

Microsoft.Graph.Identity.SignIns

Use this API to create a new invitation or reset the redemption status for a guest user who already redeemed their invitation.

Invitation adds an external user to the organization Reference:

NEW QUESTION # 277

You have an Azure Active Directory (Azure AD) tenant that contains an administrative unit named Department1.

Department1 has the users shown in the Users exhibit. (Click the Users tab.)

Department1 has the groups shown in the Groups exhibit. (Click the Groups tab.)

Department1 has the user administrator assignments shown in the Assignments exhibit. (Click the Assignments tab.)

The members of Group2 are shown in the Group2 exhibit. (Click the Group2 tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/roles/administrative-units>

NEW QUESTION # 278

You need to modify the settings of the User administrator role to meet the technical requirements. Which two actions should you perform for the role? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Select Require justification on activation
- B. Select Require ticket information on activation.
- C. Set all assignments to Active
- **D. Set all assignments to Eligible**
- **E. Modify the Expire eligible assignments after setting.**

Answer: D,E

Explanation:

In Azure AD Privileged Identity Management (PIM), the SC-300 materials explain that role assignment type determines how a user obtains permissions. An eligible assignment means the user requests activation when needed; an active assignment grants continuous permissions. As the guide states, "Eligible assignments require the user to activate the role for just-in-time access, while active assignments grant standing access." To allow users of the User administrator role to request the role when needed, you must set assignments to Eligible rather than active.

The same objective also calls for ensuring this capability is available "for up to one year." In PIM role configuration, the duration of an eligibility is controlled by the Expire eligible assignments after policy. The documentation describes that administrators can "configure the maximum duration for eligible assignments by setting 'Expire eligible assignments after' to a specific period (for example, months up to one year)." Therefore, you must modify the "Expire eligible assignments after" setting to the required period. No requirement mentions activation justification or ticket metadata; those are optional controls used to add context to activations. Consequently, the two actions that directly satisfy the stated technical requirement are: set all assignments to Eligible (C) and configure "Expire eligible assignments after" (D).

NEW QUESTION # 279

.....

After you visit the pages of our SC-300 test torrent on the websites, you can know the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the Microsoft Identity and Access Administrator guide torrent, the price of the product and the discounts. In the pages of our product on the website, you can find the details and guarantee and the contact method, the evaluations of the client on our SC-300 Test Torrent and other information about our product. So it is very convenient for you.
