최신 Certified Construction Manager Construction-Manager 무료샘플문제 (Q52-Q57):

질문 # 52

Contract administration includes, but is not limited to, planning for implementation of drawings, specifications, and

- A. owner's scope of work.
- B. permits.
- C. licenses.
- D. standards.

정답: D

설명:

The CMAA Standards of Practice (Chapter 6 - Contract Administration) describes that the CM's role in contract administration includes planning for the implementation of drawings, specifications, and applicable standards. It states:

"Contract administration includes establishing and maintaining procedures for the implementation of drawings, specifications, standards, and contract requirements." Standards ensure that construction meets established technical and performance criteria. The CM must integrate these elements to maintain quality and compliance during the execution phase.

질문 # 53

A CM is providing support on a \$150 million construction project. The agency has a well-developed safety program; however, the contractor is planning to use an innovative, high-risk method for constructing the project. To minimize the owner's risk, the CM should recommend that the owner

- A. ensure they have a contractor-controlled insurance program (CCIP) to cover the safety risk for the project.
- B. provide a safety coordinator to perform the necessary project safety functions on behalf of the contractor.
- C. modify the CM contract to include safety management to protect the owner's interests.
- D. have the contractor submit a safety management plan for review and approval by the owner.

정답: D

설명:

In the CMAA Standards of Practice, Chapter 7 - Safety Management, the Construction Manager's responsibility is to ensure that the contractor provides a project-specific safety plan addressing unique construction methods or risks.

CMAA guidance specifies:

"When special construction techniques or hazardous methods are proposed, the Construction Manager should require the contractor to submit a project safety plan for review and verification of compliance with contract and regulatory safety requirements." The CM's review confirms that the contractor's plan meets all contractual obligations and regulatory standards. The CM does not take responsibility for safety execution but ensures the plan's adequacy before work begins.

질문 # 54

Which delivery method, if not properly coordinated, introduces the strong possibility of work scope being duplicated or even omitted?

- A. Design Build (DB)
- B. CM at Risk (CMAR)
- **C. Multi-Prime**
- D. Design-Bid-Build (DBB)

정답: C

설명:

The CMAA Standards of Practice explain that Multi-Prime delivery involves multiple contractors each working under separate contracts directly with the Owner. The absence of a single point of contractual coordination can result in scope overlaps or gaps if the CM or Owner does not maintain tight coordination among all primes.

As noted in the SOP:

"The potential for duplication or omission of work scope is greatest in a multi-prime contracting arrangement, where the responsibility for interfaces between contracts must be clearly defined and managed by the Construction Manager." This risk is unique to the Multi-Prime method because, unlike CMAR or Design-Build, there is no single entity responsible for all construction coordination.

질문 # 55

Which of the following would MOST likely help provide benchmarking for a sustainable project?

- A. Housing and Urban Development
- B. Department of Transportation
- **C. Energy Star program**
- D. Environmental Protection Agency

정답: C

설명:

The CMAA Standards of Practice (Chapter 8 - Sustainability and Environmental Stewardship) identifies Energy Star as one of the leading benchmarking systems for evaluating energy performance and sustainability in buildings. The SOP describes:

"Benchmarking tools such as Energy Star and LEED provide measurable metrics for evaluating the energy efficiency and sustainability of a facility." The Energy Star program, administered by the U.S. Environmental Protection Agency, offers standardized methods to measure, track, and compare energy performance, making it the most directly relevant choice for sustainability benchmarking.

질문 # 56

A construction manager is responsible for the bid review and evaluation of an \$85 million high school project.

All bids must be submitted in person at the client's Purchasing Office by 1:00 PM EST and stamped by the CM's team. While preparing for the bid opening, the CM noticed that one of the contractor's bids was submitted a day earlier to a new clerk, but was date and time stamped after the bids were due. What should the CM do in this situation?

- A. Send the bid back to the contractor and apologize for the mishap.
- B. Put the contractor's unopened bid in tight security until the bid opening has been completed.
- C. Include the unopened bid, since it clearly was an oversight.
- **D. Inform the Owner and review the instructions to bidders for guidance on how to proceed.**

정답: D

설명:

According to the CMAA Construction Management Standards of Practice (SOP), Chapter 6 - Contract Administration, the Construction Manager is responsible for ensuring that all bid procedures are handled in strict accordance with the procurement

requirements and instructions to bidders.

CMAA guidance emphasizes:

"In the event of irregularities during the bidding or proposal submission process, the Construction Manager must immediately notify the Owner and refer to the procurement documents for direction before taking any independent action." The CM must maintain impartiality, protect the integrity of the bidding process, and avoid unilateral decisions that could imply bias or alter bid fairness. Since the bid in question was timestamped incorrectly, the proper step is to inform the Owner and review the bidding instructions to determine the correct procedural resolution.
