

VMware 2V0-16.25 Exam Questions - Easy Way To Prepare [2026]

2026 Latest VCE4Plus 2V0-16.25 PDF Dumps and 2V0-16.25 Exam Engine Free Share: <https://drive.google.com/open?id=1q4mwVWq8awiPint8nySS5iRKISQMVEMh>

2V0-16.25 practice materials stand the test of time and harsh market, convey their sense of proficiency with passing rate up to 98 to 100 percent. They are 100 percent guaranteed 2V0-16.25 learning quiz. And our content of the 2V0-16.25 Exam Questions are based on real exam by whittling down superfluous knowledge without delinquent mistakes. At the same time, we always keep updating the 2V0-16.25 training guide to the most accurate and the latest.

All we want you to know is that people are at the heart of our manufacturing philosophy, for that reason, we place our priority on intuitive functionality that makes our 2V0-16.25 Exam Question to be more advanced. So with our 2V0-16.25 guide torrents, you are able to pass the exam more easily in the most efficient and productive way and learn how to study with dedication and enthusiasm, which can be a valuable asset in your whole life. It must be your best tool to pass your exam and achieve your target.

Pass Guaranteed Quiz 2026 VMware Valid 2V0-16.25: VMware vSphere Foundation 9.0 Administrator Latest Test Testking

We believe that if you trust our 2V0-16.25 exam simulator and we will help you obtain 2V0-16.25 certification easily. After purchasing, you can receive our 2V0-16.25 training material and download within 10 minutes. Besides, we provide one year free updates of our 2V0-16.25 learning guide for you and money back guaranteed policy so that we are sure that it will give you free-shopping experience. Now choose our 2V0-16.25 practice braindump, you will not regret.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q21-Q26):

NEW QUESTION # 21

An administrator is tasked to deploy a large-scale VDI environment on a VMware vSAN Original Storage Architecture (OSA)

cluster.

Which vSAN feature is required to achieve maximum storage space reduction in this cluster?

- A. Object space reservation.
- **B. Deduplication and Compression.**
- C. Compression only.
- D. Disable Object Checksum.

Answer: B

Explanation:

In vSAN Original Storage Architecture (OSA) cluster, the feature that provides the maximum storage space reduction is Deduplication and Compression.

* Deduplication removes duplicate blocks across the cluster.

* Compression further reduces the space used by unique blocks.

* These are applied at the disk group level and are essential in VDI environments where identical VM images consume space.

Why others are incorrect:

* A. Disable Object Checksum# Only reduces CPU overhead, not storage space.

* C. Object space reservation# Controls reserved capacity, not reduction.

* D. Compression only# Reduces space, but less than Deduplication + Compression combined.

VMware vSphere 9.0 -vSAN OSA Space Efficiency Features

VMware Docs: vSAN Deduplication and Compression

NEW QUESTION # 22

Which action allows a Content Library in VMware vSphere Foundation (VVF) to be accessed by other VMware vCenter Server instances?

- A. Store the library on a shared NFS datastore.
- B. Enable automatic synchronization.
- C. Store the library on a vSAN datastore.
- **D. Publish the Content Library.**

Answer: D

Explanation:

To allow a Content Library in vSphere Foundation to be accessed by other vCenter Server instances, it must be published.

* Once published, other vCenters can subscribe to the library.

* Synchronization ensures subscribed vCenters receive updated templates and ISOs.

Other options:

* A. Automatic synchronization# Works only for subscribers, not for publishing.

* B. Store on vSAN datastore# Storage choice does not enable multi-vCenter access.

* C. Store on NFS datastore# Similar, datastore type does not matter.

NEW QUESTION # 23

An organization requires a centralized platform to monitor the performance, health, and capacity of their entire VMware vSphere Foundation (VVF) environment.

Which two components would provide this capability? (Choose two.)

- **A. VCF Operations for Networks**
- B. vSphere Supervisor
- C. VCF Operations for Logs
- **D. VCF Operations**

Answer: A,D

Explanation:

The requirement is for a centralized platform to monitor performance, health, and capacity across the entire VMware vSphere Foundation (VVF) environment.

- * VCF Operations
- * Provides end-to-end performance monitoring, capacity management, and health analytics across vCenter, ESXi, vSAN, and NSX.
- * Includes FinOps and Capacity Planning, performance diagnostics, and AI-driven troubleshooting for faster remediation.
- * This is the primary component for monitoring the entire VCF environment.
- * VCF Operations for Networks
- * Extends observability to network operations by monitoring NSX health, VPCs, and network flows.
- * Provides traffic summaries, alerts, and network capacity metrics.
- * Integrated with VCF Operations to ensure a complete platform-wide view of health and performance.
- * Why not the others?
- * VCF Operations for Logs# Focused on log management, troubleshooting, and diagnostics (not holistic performance/capacity monitoring).
- * vSphere Supervisor# Provides Kubernetes namespace and workload management, not centralized performance/capacity monitoring.

NEW QUESTION # 24

An administrator is preparing to deploy VMware vSphere Foundation using the VMware Cloud Foundation (VCF) Installer wizard. During host onboarding, it is discovered that the VMware ESX hosts each have different root passwords. Which deployment method must be used to continue the installation?

- A. Use the deployment wizard and enter credentials per host manually.
- B. Set the password to expire on all ESX hosts.
- C. Proceed with the wizard and override host credentials during staging.
- **D. Use a JSON specification file to define per-host credentials.**

Answer: D

Explanation:

When deploying VMware vSphere Foundation using the VCF Installer wizard, host onboarding requires consistent access credentials.

- * If ESX hosts have different root passwords, the wizard cannot proceed using a single credential.
- * In this case, administrators must use a JSON specification file to define per-host credentials, ensuring each host can be onboarded successfully.
- * The JSON specification allows defining host-specific parameters (IP, hostname, root password, networking, etc.).

Other options are incorrect:

- * A. Proceed with wizard and override host credentials during staging# Not supported.
- * B. Use deployment wizard and enter credentials per host manually# Wizard requires uniform credentials.
- * C. Set password to expire on all ESX hosts# Irrelevant to deployment and would cause failures.

NEW QUESTION # 25

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Fleet Management
- B. VCF Operations
- C. VCF Automation
- **D. vSphere Client**

Answer: D

Explanation:

To deploy the VCF Operations for Logs OVA appliance:

- * The vSphere Client is used to deploy the OVA and OVF templates directly into a vCenter environment.
- * After deployment, the appliance can be configured and integrated with VCF.

Other options:

- * A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
- * C. VCF Automation# Provides automation workflows, not appliance deployment.
- * D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.

NEW QUESTION # 26

.....

The most interesting thing about the learning platform is not the number of questions, not the price, but the accurate analysis of each year's exam questions. Our 2V0-16.25 guide dump through the analysis of each subject research, found that there are a lot of hidden rules worth exploring, this is very necessary, at the same time, our 2V0-16.25 training materials have a super dream team of experts, so you can strictly control the proposition trend every year. In the annual examination questions, our 2V0-16.25 study questions have the corresponding rules to summarize, and can accurately predict this year's test hot spot and the proposition direction. This allows the user to prepare for the test full of confidence.
