Microsoft AZ-400 Dumps Questions, Dumps AZ-400 PDF

All contents of AZ-400 training prep are made by elites in this area rather than being fudged by laymen. Let along the reasonable prices of our AZ-400 exam materials which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our AZ-400 Quiz guide. And we have free demos of our AZ-400 study braindumps for you to try before purchase.

Microsoft AZ-400 certification exam is designed for professionals who are looking to validate their skills and knowledge in designing and implementing DevOps solutions using Microsoft technologies. AZ-400 Exam is part of the Microsoft Certified: DevOps Engineer Expert certification track and is intended for individuals who have experience with both Azure and DevOps practices.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q367-Q372):

NEW QUESTION # 367

Drag and Drop Question

You are configuring the settings of a new Git repository in Azure Repos.

You need to ensure that pull requests in a branch meet the following criteria before they are merged:

- Committed code must compile successfully.
- Pull requests must have a Quality Gate status of Passed in SonarCloud.

Which policy type should you configure for each requirement? To answer, drag the appropriate policy types to the correct requirements. Each policy type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

<https://docs.microsoft.com/en-us/azure/devops/repos/git/branch-policies?view=azure-devops#build-validation>

NEW QUESTION # 368

How should you configure the release retention policy for the investment planning applications suite? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Scenario: By default, all releases must remain available for 30 days, except for production releases, which must be kept for 60 days.

Box 1: Set the default retention policy to 30 days

The Global default retention policy sets the default retention values for all the build pipelines. Authors of build pipelines can override these values.

Box 2: Set the stage retention policy to 60 days

You may want to retain more releases that have been deployed to specific stages.

References: <https://docs.microsoft.com/en-us/azure/devops/pipelines/policies/retention>

NEW QUESTION # 369

SIMULATION

You plan to store signed images in an Azure Container Registry instance named az4009940427acr1.

You need to modify the SKU for az4009940427acr1 to support the planned images. The solution must minimize costs.

To complete this task, sign in to the Microsoft Azure portal.

- A. 1. Open Microsoft Azure Portal, and select the Azure Container Registry instance named az4009940427acr1.
2. Under Policies, select Content Trust > Enabled > Save.
- B. 1. Open Microsoft Azure Portal, and select the Azure Container Registry instance named az4009940427acr1.
2. Under Policies, select Content Trust > Enabled > Save.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/container-registry/container-registry-content-trust>

NEW QUESTION # 370

You need to configure authentication for App1. The solution must support the planned changes.

Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

Woodgrove Bank plans to implement the following changes to the identity environment:

* Configure App1 to use a service principal.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/develop/howto-create-service-principal-portal>

NEW QUESTION # 371

You are defining release strategies for two applications as shown in the following table.

Which releasestrategy should you use for each application? To answer, drag the appropriate release strategies to the correct applications. Each release strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scrollto view content.

NOTE:Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

App1: Canary deployment

With canary deployment, you deploy a new application code in a smallpart of the production infrastructure.

Once the application is signed off for release, only a few users are routed to it. This minimizes any impact.

With no errors reported, the new version can gradually roll out to the rest of the infrastructure.

App2:Rolling deployment:

In a rolling deployment, an application's new version gradually replaces the old one. The actual deployment happens over a period of time. During that time, new and old versions will coexist without affecting functionality or user experience. This process makes it easier to roll back any new component incompatible with the old components.
