

Providing You High Pass-Rate New C_S4CPB_2602 Exam Camp with 100% Passing Guarantee

Almost everyone is trying to get the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) (C_S4CPB_2602) certification to update their CV or get the desired job. Every student faces just one problem and that is not finding updated study material. Applicants are always confused about where to buy real SAP C_S4CPB_2602 Dumps Questions and prepare for the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) (C_S4CPB_2602) exam in less time. Nowadays everyone is interested in getting the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) (C_S4CPB_2602) certificate because it has multiple benefits for SAP career.

Our company has spent more than 10 years on compiling C_S4CPB_2602 study materials for the exam in this field, and now we are delighted to be here to share our C_S4CPB_2602 learnign guide with all of the candidates for the exam in this field. There are so many striking points of our C_S4CPB_2602 Preparation exam. If you want to have a better understanding of our C_S4CPB_2602 exam braindumps, just come and have a try!

>> New C_S4CPB_2602 Exam Camp <<

100% Pass 2026 SAP C_S4CPB_2602: Valid New SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Exam Camp

BraindumpsPrep offers actual SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Exam Questions that make your success possible on the first try. BraindumpsPrep has helped many customers gain high scores. Before purchasing, you can download and try any C_S4CPB_2602 Exam Questions format. SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) C_S4CPB_2602 with excellect pass rate.

SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Sample Questions (Q18-Q23):

NEW QUESTION # 18

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Check the documentation for the Bank migration object and assign the additional business role required to ensure you can migrate bank data into the system.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to check the Bank migration object documentation and assign the additional business role needed so you can successfully migrate bank data into SAP S/4HANA Cloud Public Edition.

The additional business role required is:

Business Role Template: SAP_BR_MD_SPECIALIST_BNK

Business Role Description: Master Data Specialist - Bank Data

SAP documents that the app Manage Banks - Master Data is assigned to the business role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK) in business catalog Bank - Maintenance (SAP_CA_BC_BNK_PC). That is the role needed for bank master data maintenance and is the missing authorization when the migration cockpit can load data but cannot create banks in the target system.

Business Scenario Explanation

In the previous migration steps, you already assigned the role:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

That role gives access to the migration cockpit itself, meaning you can:

create migration projects,

select migration objects,

upload CSV files,

validate data,

transfer data to staging tables,

and execute migration runs.

However, for the Bank migration object, SAP also requires the authorization to create bank master data in the target system. If that authorization is missing, the migration can still reach the execution stage, but then fail with an authorization message such as:

You are not authorized to create bank data for country/region US

That is why the additional role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK) must be assigned.

Important Notes

Always replace ##### with the last 6 digits of your group number in later migration steps.

The role to add here is in addition to the migration cockpit role.

Save the user after assigning the role.

Refresh the session after assignment so the new authorization is loaded.

Required Additional Role

Step 1: Review the migration object documentation

Open the Bank migration object in the migration project and review the documentation or role requirement note.

Explanation:

The task explicitly asks you to check the documentation for the Bank migration object and assign the additional role required for migration. SAP's official documentation for bank maintenance shows that bank master maintenance is tied to the role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK).

Step 2: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to your user.

Step 3: Search for your own user

In Maintain Business Users:

Enter your own user ID in the search field.

Click Go.

Explanation:

You must assign the additional role to your own user because you are the one executing the migration.

Step 4: Open your user record

From the search results:

Click your user entry.

Open the business user detail page.

Explanation:

This opens the maintenance screen where assigned business roles can be changed.

Step 5: Switch to Edit mode

On the user detail page:

Click Edit

Explanation:

Edit mode is required before the assigned business roles list can be updated.

Step 6: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is where you assign the additional bank master data role.

Step 7: Click Add

In the assigned business roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup is used to search for standard SAP business roles.

Step 8: Search for the additional bank role

In the Add Business Roles popup, search for either:

SAP_BR_MD_SPECIALIST_BNK

or

Master Data Specialist - Bank Data

Then select the matching role.

Explanation:

SAP documents that the app Manage Banks - Master Data belongs to the role Master Data Specialist - Bank Data (SAP_BR_MD_SPECIALIST_BNK). That is the role needed for bank creation/maintenance authorization.

Step 9: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 10: Save the business user

Back on the business user page:

Click Save

Explanation:

This finalizes the new role assignment.

Step 11: Confirm both migration-related roles are assigned

After saving, verify that your user now has both:

BR_CONFIG_EXPERT_DATA_MIG

SAP_BR_MD_SPECIALIST_BNK

Explanation:

These two roles cover different parts of the scenario:

BR_CONFIG_EXPERT_DATA_MIG → migration cockpit access

SAP_BR_MD_SPECIALIST_BNK → bank master data creation/maintenance authorization

Step 12: Refresh your session After saving:

Refresh the browser completely, or

Sign out and sign in again

Explanation:

SAP role assignments may not become active in the current session immediately. A refresh or new login ensures the authorization is reloaded.

Step 13: Return to the migration project

Go back to:

Migrate Your Data

open your project:

Bank Data #####

open migration object:

Bank

Explanation:

Now that the additional bank role is assigned, the system should allow you to migrate bank master data successfully.

Expected Result

After this task is completed successfully:

your user still has the migration role BR_CONFIG_EXPERT_DATA_MIG,

your user also has the additional bank role SAP_BR_MD_SPECIALIST_BNK,

the authorization error for creating bank data should no longer occur,

the Bank migration can proceed successfully.

Screenshots for This Task

Screenshot 1: Assigned Business Roles list including the migration role Use the screenshot from your run where the business user already shows:

Configuration Expert - Data Migration

This screenshot can be used to explain the starting point before the additional role is assigned.

What this screenshot proves

It shows that the migration role alone was not enough for the bank creation authorization.

Screenshot 2: Migration error message

Use the screenshot from your run that shows the message:

You are not authorized to create bank data for country/region US

This is the key evidence that an additional bank master data role was required.

What this screenshot proves

It proves the migration cockpit role was present, but bank maintenance authorization was still missing.

Official SAP Documentation Basis

SAP's official documentation states that the Manage Banks - Master Data app is assigned to:

Master Data Specialist - Bank Data

SAP_BR_MD_SPECIALIST_BNK

within catalog:

Bank - Maintenance

SAP_CA_BC_BNK_PC

This is the basis for the additional role assignment required in this task.

NEW QUESTION # 19

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a Launchpad Space and Page with the information below.

□

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z_EMPLOYEES_ALL_#####

The page values shown in the task are:

Page Title: General

Page Description: General

□

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z_ALL_EMP_#####

Space Description: General

Space Title: General

Page ID: Z_ALL_EMP_#####

Page Title: General

Page Description: General

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z_EMPLOYEES_ALL_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z_ALL_EMP_#####

Space Description: General

Space Title: General

Page ID: Z_ALL_EMP_#####

Page Title: General

Page Description: General

□

NEW QUESTION # 20

SIMULATION

Create a Custom Business Role with Restrictions

Business Scenario:

You are building a custom business role with restrictions to ensure the end users assigned the role have only the minimum level of access necessary to complete their core job tasks. The end users are project managers based in the United States. They should only be able to create projects, edit projects, and access projects that are occurring in the United States. They should not be able to staff any resources outside of the United States. Write, Read, and Value Help access should be restricted to only the United States for all relevant fields.

Prerequisites:

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note: Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Use the template for the business role Project Manager - Professional Services (SAP_BR_PROJECT_MANAGER_PROF) to create a new business role with the following information:

□

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom business role for project managers in the United States by using the standard SAP template role Project Manager - Professional Services and then restricting the role so users only have the minimum access needed for their job.

The template role used is:

Template Business Role ID: SAP_BR_PROJECT_MANAGER_PROF

Template Business Role Description: Project Manager - Professional Services The new custom role must be created with exact values defined in the task.

Business Scenario Explanation

In this simulation, you are building a restricted custom role for project managers who work only in the United States.

The goal is to ensure that these end users:

can create and edit projects,

can access only projects occurring in the United States,

cannot work with projects or staffing outside the US,

have only the minimum level of authorization needed.

This is done in two major parts:

Create a new custom business role from the standard SAP template

Restrict the role values so only US-related data is allowed

Important Notes

Always replace ##### with the last 6 digits of your group number.

Every value must be entered exactly as shown.

Even one missing space or incorrect character can cause the simulation validation to fail.

You must also create and assign a launchpad space as part of the custom role creation.

Required Values for Role Creation

Use the following values exactly as shown in the task image.

Parameter

Value

New Business Role ID

BR_PROJECT_MANAGER_PROF_US_#####

New Business Role Description

Project Manager - Professional Services - US - #####

Option for Launchpad Spaces

Create and Assign Spaces Based on Space Templates

New Space ID

ZBR_PROJECT_MANAGER_PROF_US_#####

Activate IAM Apps

Yes (check the box)

Example

If your suffix is 000457, the values become:

BR_PROJECT_MANAGER_PROF_US_000457

Project Manager - Professional Services - US - 000457

ZBR_PROJECT_MANAGER_PROF_US_000457

Detailed Step-by-Step Procedure

Part 1: Open the standard template role

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to maintain standard and custom business roles.

Because this task requires creating a custom role from an existing template, this is the correct starting app.

Step 2: Search for the template role

Inside Maintain Business Roles:

In the search/filter area, search for:

SAP_BR_PROJECT_MANAGER_PROF

or

Project Manager - Professional Services

Open the standard SAP template role.

Explanation:

You must start from the standard template role because the task explicitly says to use the template for:

Project Manager - Professional Services

SAP_BR_PROJECT_MANAGER_PROF

Part 2: Create the custom role from the template

Step 3: Click "Create Derived Business Role"

On the template role page:

Click:

Create Derived Business Role

Explanation:

This function creates a customer-specific copy based on the standard SAP business role template.

It preserves the delivered role content but allows you to define your own role ID, description, restrictions, and launchpad space.

Step 4: Enter the custom role information

In the creation popup, enter the values exactly as follows:

Template = SAP_BR_PROJECT_MANAGER_PROF

New Business Role ID = BR_PROJECT_MANAGER_PROF_US_#####

New Business Role Description = Project Manager - Professional Services - US - ##### Option for Launchpad Spaces = Create

and Assign Spaces Based on Space Templates New Space ID = ZBR_PROJECT_MANAGER_PROF_US_##### Activate

IAM Apps = checked Explanation:

These values define the new custom project manager role that will later be restricted to US-only access.

The space option is important because the task expects the role to include its own launchpad space.

Step 5: Confirm creation

Click OK

Explanation:

SAP now creates the custom role derived from the template and assigns the new launchpad space at the same time.

Part 3: Verify the newly created custom role

Step 6: Review the new custom role

After creation, SAP opens the new custom role.

Verify:

Business Role ID = BR_PROJECT_MANAGER_PROF_US_#####

Business Role Description = Project Manager - Professional Services - US - ##### Business Role Template ID =

SAP_BR_PROJECT_MANAGER_PROF Explanation:

This confirms the derived role was created correctly from the right SAP template.

Part 4: Maintain role restrictions

Step 7: Open "Maintain Restrictions"

On the custom role page:

Click:

Maintain Restrictions

Explanation:

This is the most important part of the task.

You are not only creating a role - you are also limiting the role so it only allows US-related values.

Step 8: Understand the rule for restriction maintenance

The PDF/task logic is:

Fields explicitly listed in the restriction table → keep them Restricted and enter the required values All other fields not listed in the task table → set them to Not Maintained Explanation:

This is essential.

If extra fields remain restricted or blank, the role may not validate correctly.

The safest approach is:

only maintain the required fields,

mark all unrelated fields as Not Maintained.

Part 5: Enter the required US restrictions

From your exercise run, the maintained values included restrictions such as:

Keep these kinds of fields restricted with US/1710 values where required Examples from your run:

Bank Country/Region Key

Read, Value Help = US

Value Help = US

Company Code

use 1710 only where the task table explicitly requires it

Purchasing Organization

use 1710 where required

Valuation Area

use 1710 where required

Explanation:

These are the exact business restrictions that make the role usable only for the intended geography and business scope.

Step 9: Set unrelated restriction fields to "Not Maintained"

For every field not included in the task's restriction list, choose:

Not Maintained

Examples from your screenshots included fields like:

Accounting Principle

Authorization Group for Business Partners

Billing Type

These should be Not Maintained unless they are explicitly listed in the task's required restriction table.

Explanation:

This removes unnecessary access and matches the task wording that all other fields should be set to Not Maintained.

Step 10: Save the restrictions

After all required values are entered and unrelated fields are marked Not Maintained:

Click Save

Explanation:

This saves the restriction profile of the role.

If you do not save here, the role will remain incomplete or in draft.

Part 6: Verify launchpad space and page creation

Step 11: Go to Launchpad Spaces

In the custom role:

Open the tab:

Launchpad Spaces

Verify that the assigned space exists:

ZBR_PROJECT_MANAGER_PROF_US_#####

Explanation:

Because you selected Create and Assign Spaces Based on Space Templates, SAP should have created and assigned the launchpad space automatically.

Step 12: Verify the created space

Open the assigned space and confirm:

the custom space exists,

it is customer-managed,

the pages are assigned correctly.

Explanation:

This proves that the new business role has its own launchpad structure as required by the task.

Expected Result

After this task is completed successfully:

a new custom role exists based on SAP_BR_PROJECT_MANAGER_PROF,

the role uses the exact required ID and description,

the role has a custom launchpad space,

IAM apps are activated,

restrictions are maintained for US-only access,

all irrelevant fields are set to Not Maintained,

the role is saved successfully.

NEW QUESTION # 21

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Assign the Configuration Expert - Data Migration (BR_CONFIG_EXPERT_DATA_MIG) business role to your user and save.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the Configuration Expert - Data Migration business role to your own user so that you can use the migration cockpit and perform the bank data migration scenario using staging tables.

The required business role is:

Business Role ID: BR_CONFIG_EXPERT_DATA_MIG

Business Role Description: Configuration Expert - Data Migration

Business Scenario Explanation

In this scenario, you are responsible for migrating bank data into SAP S/4HANA Cloud Public Edition.

Because only a few banks need to be loaded, the chosen migration method is:

Migrate Data Using Staging Tables

Before you can use migration apps such as Migrate Your Data, your user must have the correct migration authorization.

That is why this task requires assigning the business role:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Without this role, you may not be able to:

create migration projects,

open migration objects,

upload staging-table files,
validate and transfer data,
execute mapping tasks,
or run the migration itself.

Important Notes

Always replace ##### with the last 6 digits of your group number in later migration tasks.

Use the exact role ID required by the task:

BR_CONFIG_EXPERT_DATA_MIG

Save the user after role assignment.

Make sure the user is not left only in draft status.

Required Role

Field

Value

Business Role ID

BR_CONFIG_EXPERT_DATA_MIG

Business Role Description

Configuration Expert - Data Migration

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to business users.

Since the task asks to assign a role to your own user, this is the correct starting point.

Step 2: Search for your own user

Inside Maintain Business Users:

In the search/filter area, enter your own user ID.

Click Go.

Explanation:

You must assign the migration role to your own user because you are the one who will execute the migration tasks.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the business user details page.

Explanation:

This opens the screen where assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Edit mode is necessary before the Assigned Business Roles list can be changed.

Step 5: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is the section where the new business role will be assigned.

Step 6: Click Add

In the Assigned Business Roles area:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign standard SAP business roles.

Step 7: Search for the migration role

In the Add Business Roles popup:

In the role search field, enter:

BR_CONFIG_EXPERT_DATA_MIG

Click Go

Select:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Explanation:

This is the exact role required for the bank migration scenario.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the migration role to your user in draft mode.

Step 9: Save the user

Back on the business user page:

Click Save

Explanation:

This finalizes the assignment.

Without saving, the role will not be available for use in the migration tasks.

Step 10: Verify the role assignment

After saving, confirm that your assigned roles list includes:

Configuration Expert - Data Migration

BR_CONFIG_EXPERT_DATA_MIG

Explanation:

This verifies that your user is now authorized to work with migration projects and staging-table migration.

Expected Result

After this task is completed successfully:

your user has the role BR_CONFIG_EXPERT_DATA_MIG,

the role assignment is saved,

your user can proceed with the bank migration project tasks,

migration-related apps are available to your user.

NEW QUESTION # 22

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business role to your user and save. Then refresh the browser and navigate home to verify the new Launchpad Space and tiles are visible.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the newly created custom all-employee business role to your own business user, save the assignment, refresh the browser, and then verify that the new Launchpad Space and its tiles are visible on the homepage.

This is the final verification step for the all-employee role and launchpad setup.

Business Scenario Explanation

In the previous tasks, you created and configured:

a new custom business role for all employees,

the required business catalogs,

a custom launchpad space,

a custom launchpad page,
and the employee self-service tiles:
Manage My Timesheet
Concur Travel Expense

However, even if all of that is configured correctly, you still will not see the new page and tiles on your homepage until the custom role is assigned to your own business user.

This task connects the configuration to your user and verifies the final end-user result.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact business role ID.

Save the user after adding the role.

Refresh the browser after saving.

Then navigate back to Home and confirm the space/page/tiles are visible.

Required Business Role

Assign the custom all-employee role created earlier:

Business Role ID: Z_EMPLOYEES_ALL_#####

Business Role Description: All Employee Role #####

Example

If your suffix is 000013, the role is:

Z_EMPLOYEES_ALL_000013

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to users.

The launchpad space and tiles will only become visible after the custom role is assigned to your own user.

Step 2: Search for your own business user

In Maintain Business Users:

Enter your own user name or business user ID in the search field.

Click Go.

Explanation:

You must assign the role to your own user because you are the one who will verify the launchpad result on the homepage.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the user details page.

Explanation:

This opens the maintenance page where assigned business roles can be reviewed and changed.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Without edit mode, the role assignment list is display-only.

Step 5: Open the "Assigned Business Roles" tab

Inside the user record:

Click:

Assigned Business Roles

Explanation:

This tab contains the list of all business roles currently assigned to your user and is the correct place to add the all-employee role.

Step 6: Click Add

In the Assigned Business Roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign the custom all-employee role.

Step 7: Search for the custom all-employee role

In the Add Business Roles popup:

In the business role search field, enter:

Z_EMPLOYEES_ALL_#####

Click Go

Select the role:

Z_EMPLOYEES_ALL_#####

All Employee Role #####

Example

If your suffix is 000013, search for:

Z_EMPLOYEES_ALL_000013

Explanation:

This is the custom role created in the earlier launchpad/employee-role tasks.

It contains the launchpad space, catalogs, and page content that must now become visible to your user.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 9: Save the business user

Back on the business user page:

Click Save

Explanation:

This is a mandatory step.

Without saving, the role assignment is not finalized, and the new launchpad content will not appear for your user.

Step 10: Confirm the role assignment

After saving, verify that your assigned roles list includes:

Z_EMPLOYEES_ALL_#####

All Employee Role #####

Explanation:

This confirms that the role is now officially assigned to your user.

Step 11: Refresh the browser

After saving:

Refresh the browser completely

Explanation:

SAP launchpad content is often cached in the current session.

A browser refresh ensures the newly assigned role content is loaded.

Step 12: Navigate back to Home

After refreshing:

Return to Home

Explanation:

The role's launchpad space and page must be verified from the end-user homepage, not only from configuration apps.

Step 13: Open the page / launchpad tab

On the homepage, look for the custom page/tab that contains the employee content.

In your run, the visible page was:

General

Explanation:

The launchpad page created earlier was titled General, so that is the page you should open to verify the result.

Step 14: Verify the section title

On the page, confirm that you can see the section:

Self-Services

Explanation:

This was the section title created in the earlier page-content maintenance task.

Step 15: Verify the tiles

Under the Self-Services section, confirm that both tiles are visible:

Concur Travel Expense

Manage My Timesheet

Explanation:

These are the two required employee self-service tiles added to the page in the previous task.

Seeing both of them confirms that:

the catalogs were assigned correctly,

the launchpad page was maintained correctly,

the business role was assigned correctly,
and the browser refresh loaded the new content successfully.

Expected Result

After completing this task successfully:
your own user has the custom business role assigned,
the role is saved successfully,
after browser refresh the launchpad updates,
the homepage shows the new launchpad page,
the Self-Services section is visible,
and the tiles Concur Travel Expense and Manage My Timesheet are visible.

NEW QUESTION # 23

.....

We provide our customers with the most reliable learning materials about C_S4CPB_2602 certification exam and the guarantee of pass. We assist you to prepare the key knowledge points of C_S4CPB_2602 actual test and obtain the up-to-dated exam answers. All C_S4CPB_2602 Test Questions offered by us are tested and selected by our senior experts in IT field, which only need little time to focus on the practice and the preparation.

New C_S4CPB_2602 Exam Dumps: https://www.briandumpsprep.com/C_S4CPB_2602-prep-exam-braindumps.html

100% pass by our C_S4CPB_2602 training pdf is our guarantee, As you can see, only you are ready to spend time on memorizing the correct questions and answers of the C_S4CPB_2602 study guide can you pass the SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) exam easily, SAP New C_S4CPB_2602 Exam Camp Most people are dreaming of becoming such great businessmen, According to the recent survey, the pass rate of our customers after using New C_S4CPB_2602 Exam Dumps - SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) exam study materials in the course of the preparation for the test has reached as high as 100%-----the highest rate in this field as you can see.

Use compatible character encodings on both sides of file or network I/O, Configure local storage using partitions and logical volumes, 100% pass by our C_S4CPB_2602 Training Pdf is our guarantee.

Free Updates the SAP C_S4CPB_2602 Exam for 365 Days to Keep You Ahead
