Plat-Dev-210 Pdf Exam Dump | Plat-Dev-210 Exam Discount Voucher

Our company is a professional certification exam materials provider, we have occupied in the field for years, and therefore we have abundant experiences. In addition, Plat-Dev-210 exam torrent is high quality and accuracy, for a professional team are collecting and researching the latest information for the exam. We also pass guarantee and money back guarantee for Plat-Dev-210 Exam Materials, if you fail to pass the exam, we will give you full refund, and the money will be returned to your payment account. We have online and offline service, and if you have any questions for Plat-Dev-210 exam braindumps, you can consult us.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 2	• Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.
Topic 3	• Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.
Topic 4	• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.

Salesforce Certified Omnistudio Developer Sample Questions (Q38-Q43):

NEW QUESTION # 38
Refer to the exhibit below.
What is the reason that the fields fail to display the fetched data?

- A. FirstName, LastName, and BirthDate are not placed inside the Type Ahead Block.
- B. Lookup Mode is selected in the properties of the Type Ahead Block.
- C. The typeHead key is not in the correct format.
- D. Use Data JSON is Not selected in the properties of the Type Ahead Block.

Answer: D

Explanation:
The Use Data JSON property must be selected in the properties of the Type Ahead Block in order to display the fetched data in the fields. The Lookup Mode property is used to specify the type of lookup to perform. The FirstName, LastName, and BirthDate fields can be placed inside or outside the Type Ahead Block. The typeHead key is in the correct format.

NEW QUESTION # 39
In an OmnoScript, a developer needs to configure a Disclosure element to require user input only if the user already checked a Non-Disclosure Agreement Checkbox.
How should the developer configure the conditional view to meet this requirement?

- A. Disable read only if true
- B. Set element to require if true
- C. Set element to optional if false
- D. Show element if true

Answer: B

Explanation:
Setting the element to require if true allows the developer to configure a Disclosure element to require user input only if a condition is met. In this case, the condition is that the user already checked a Non-Disclosure Agreement Checkbox. The other options are either incorrect or irrelevant for this requirement.

NEW QUESTION # 40

A developer needs to change some field labels on a FlexCard. The FlexCard is currently deployed to production. The developer that the best course of action is to version the FlexCard rather than cloning it.
Which factor would lead the developer to this decision?

- A. The new and current versions will be displayed together on the same target.
- B. Another team member is developing new actions, fields, and styling for the current version of the FlexCard.
- C. The new version of the FlexCard will be used in a new Console, and the current version of the FlexCard should remain unchanged.
- D. All instances of the FlexCard must be updated with the changes.

Answer: D

Explanation:
Versioning a FlexCard allows the developer to make changes to the FlexCard without affecting the existing instances of the FlexCard. The developer can choose to update all instances of the FlexCard with the new version or keep them as they are. This is useful when the changes are minor and do not affect the functionality or layout of the FlexCard. Cloning a FlexCard creates a copy of the FlexCard with a new name and ID. The developer can make changes to the cloned FlexCard without affecting the original FlexCard. This is useful when the changes are major and require a different configuration or design of the FlexCard1. In this case, since all instances of the FlexCard must be updated with the changes, versioning is the best course of action.

NEW QUESTION # 41

A developer is configuring an integration Procedure Action in an OmniScript. The Omniscript needs a JSON response from the Integration Procedure but does not need to wait for the response for the user to proceed.
Which feature should the developer enable?

- A. Invoke Mode Fire and Forget
- B. Invoke Mode Non-Blocking
- C. Toast Completion
- D. Use Future

Answer: A

Explanation:
The Invoke Mode Fire and Forget feature enables the OmniScript to invoke the Integration Procedure without waiting for a response. This is useful when the response is not needed for the user to proceed

NEW QUESTION # 42

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields are input: Account id and Product Id. The integration Procedure data JSON contains the following nodes:
How should the Remote Action element be configured to pass the data correctly to the method?

- A. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.
- B. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additional input:
- C. Add the following to Send JSON Path: accountId: %Accountd% ProductId% Details Products%
- D. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:

Answer: B

Explanation:
Checking the Send Only Additional Input checkbox allows the Remote Action element to send only the key
/value pairs specified in Additional input to the Apex method. The Additional input should have the same keys as the method parameters, and the values should be set to {{InputData.node}} for each node. For example, AccountId: {{InputData.AccountId}}

and ProductId: {{InputData.Details.Products}}.

NEW QUESTION # 43
......

There are great and plenty benefits after the clients pass the test.
