## C\_SIGVT\_2506최신큩버전 시험대비자료, C\_SIGVT\_2506유효한 인증시험 덱프

다년간 IT업계에 종사하신 전문가들이 자신의 노하우와 경험으로 제작한 SAP C\_SIGVT\_2506덱프는 C\_SIGVT\_2506 실제 기출문제를 기반으로 한 자료로서 C\_SIGVT\_2506시험문제의 모든 범위와 유형을 포함하고 있어 높은 적응율을 자랑하고 있습니다.덱프구매후 불합격 받으시면 구매일로부터 60일내 주문은 덱프비용을 환불해드립니다.IT 자격증 취득은 ExamPassdump덱프가 정답입니다.

### SAP C\_SIGVT\_2506 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"><li>Monitoring Transformation Progress using SAP Cloud ALM: This section of the exam measures the capabilities of Cloud ALM Specialists and covers the use of SAP Cloud ALM to track project progress and operational performance. It explains how Cloud ALM supports implementation tasks, monitors system health, and provides visibility into key milestones. Candidates learn how to use the platform to support continuous governance and ensure transformation activities remain on track.</li></ul>
주제 2	<ul style="list-style-type: none"><li>Using LeanIX for Enterprise Architecture Validation: This section of the exam measures the abilities of Enterprise Architects and focuses on using LeanIX to validate architecture landscapes. It includes understanding how LeanIX maps applications, data, and business capabilities to support modernization efforts. The domain emphasizes validating architecture readiness and ensuring that the existing IT landscape aligns with transformation goals.</li></ul>

주제 3	<ul style="list-style-type: none"> <li>Exploring SAP Cloud Strategy: This section of the exam measures the skills of Cloud Strategy Analysts and focuses on SAP overall cloud vision, deployment models, and strategic direction. It includes understanding the value of cloud adoption, SAP portfolio of cloud solutions, and how organizations benefit from modern cloud architectures. The section validates foundational knowledge of SAP cloud ecosystem and its relevance to transformation.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Exploring the SAP Business Transformation Methodology: This section of the exam measures the skills of Transformation Consultants and introduces SAP structured methodology for guiding organizations through transformation programs. It covers the stages, principles, and frameworks used to support business evolution, ensuring candidates understand how SAP's methodology enables structured planning, execution, and adoption across transformation lifecycles.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>Validating Business Processes with SAP Signavio: This section of the exam measures the skills of Business Process Analysts and covers the use of SAP Signavio to evaluate, analyze, and validate business processes during transformation projects. It focuses on understanding how process insights support decision-making and how Signavio helps identify gaps between current operations and desired outcomes. The section ensures candidates can apply Signavio tools to support business process optimization.</li> </ul>

## 최신 SAP Certified Associate C\_SIGVT\_2506 무료 샘플문제 (Q12-Q17):

### 질문 # 12

Which of the following are dimensions of the clean core concept?

(3 correct answers)

- A. Processes
- B. Operations
- C. Configurations
- D. Applications
- E. Integrations

정답: A,C,E

### 설명:

The clean core concept is fundamental to SAP's cloud strategy and governs how organizations should structure their ERP systems to remain flexible, upgradeable, and stable. One key dimension is Configurations

, which must follow SAP-recommended patterns and avoid unnecessary customizations that compromise upgradeability.

Configurations define how the system behaves, and keeping them standardized ensures that the core can remain clean.

A second dimension is Integrations. Clean core principles emphasize using SAP-approved integration patterns, APIs, and event-driven models rather than modifying the underlying system. By handling extensions and integrations through platforms like SAP Business Technology Platform, organizations avoid invasive changes that would otherwise jeopardize upgrades or system stability.

A third dimension is Processes, referring to the ability to adopt SAP's standard end-to-end processes wherever possible. Aligning with SAP best practices minimizes the need for enhancements in the core system and ensures compatibility with future innovations.

Applications and operations are not part of the formal clean core dimensions; rather, they are broader parts of the overall IT landscape. The clean core dimensions focus specifically on system configuration, integration behavior, and business process alignment—ensuring that SAP systems remain cloud-ready and agile.

### 질문 # 13

What are the benefits offered by SAP Cloud ALM for businesses?

(3 correct answers)

- A. It supports only cloud implementation scenarios
- B. It is available to all customers with Enterprise Support Agreement or cloud contract
- C. It reduces TCO of the solution landscape
- D. It supports process mining with plug & gain
- E. It is instantly available for use as a subscription service

정답: B,C,E

**설명:**

SAP Cloud ALM provides multiple operational and implementation benefits to businesses undergoing transformation. First, it is available to all customers who hold an SAP Enterprise Support Agreement or cloud subscription. This means there are no additional licensing fees, making Cloud ALM a highly accessible lifecycle management platform. Its broad availability encourages consistent adoption across organizations of all sizes.

Second, SAP Cloud ALM is instantly available as a cloud-native subscription service. There is no installation or infrastructure setup required. Customers can begin using Cloud ALM almost immediately after provisioning, accelerating project kickoff and reducing administrative overhead.

Third, one of its major benefits is that it reduces total cost of ownership (TCO) by minimizing on-premise infrastructure requirements and providing standardized, automated tools for monitoring, implementation, testing, and operations. This reduces the need for multiple separate ALM systems and allows customers to centralize lifecycle activities.

Option A is incorrect because process mining with Plug & Gain is a Signavio capability. Option D is incorrect because Cloud ALM supports both cloud and hybrid/on-premise scenarios through integration monitoring and operational support. Therefore, the correct benefits are B, C, and E.

**질문 # 14**

What are the phases of a business transformation process?

- A. Analyze, plan, execute, monitor
- **B. Discover, prepare, explore, realize, deploy, run**
- C. Discover, plan, analyze, design, implement, operate
- D. Discover, plan, execute, deploy, evaluate, run

**정답: B**

**설명:**

These six phases-Discover, Prepare, Explore, Realize, Deploy, and Run-represent the standard SAP Activate-based structure used in transformation projects. Each phase has specific deliverables: discovery focuses on identifying value and readiness; prepare sets the foundation; explore validates fit-to-standard processes; realize configures and tests the solution; deploy transitions the system into production; and run focuses on operations and continuous improvement. This phased approach provides consistency across transformation initiatives.

**질문 # 15**

Which approach combines the Greenfield and Brownfield strategies?

- A. Side-by-Side Migration
- **B. Selective Data Transition**
- C. Cloud-Native Apps
- D. Hybrid Cloud

**정답: B**

**질문 # 16**

Which of the following are strategies used in the Design phase to enable effective business process transformation with SAP Signavio? Note: There are 3 correct answers to this question.

- A. Collaborating with IT
- **B. Involving the stakeholders**
- **C. Value discovery**
- D. Process Performance benchmarking
- **E. Using best practice content**

**정답: B,C,E**

**질문 # 17**
