## 100% ISO-IEC-27001-Foundation Accuracy | Real ISO-IEC-27001-Foundation Exam Answers

When new changes or knowledge are updated, our experts add additive content into our ISO-IEC-27001-Foundation latest material. They have always been in a trend of advancement. Admittedly, our ISO-IEC-27001-Foundation real questions are your

best choice. We also estimate the following trend of exam questions may appear in the next exam according to syllabus. So they are the newest and also the most trustworthy ISO-IEC-27001-Foundation Exam Prep to obtain.

## APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- B. Information security compliance will increase stakeholder trust in the organization
- C. Information security controls are tailored to suit the organization's specific circumstances
- D. Information security risks are assessed and the probability and/or impact reduced

**Answer: A**

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed." Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

### NEW QUESTION # 43

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Competence
- B. Nonconformity and corrective action
- C. Awareness
- D. Communication

**Answer: C**

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also to contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

### NEW QUESTION # 44

What is required to be reported by the Information security event reporting control?

- A. Observed or suspected events
- B. Information disclosure
- C. Unauthorized access
- D. Asset disposal

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A, control 6.8 (Information security event reporting) specifies:

"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers "observed or suspected events." Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.

Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).

Therefore, the verified correct answer is D: Observed or suspected events.

#### NEW QUESTION # 45

Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Auditors who audit each area of operation
- B. ISO/IEC 27001 practitioners within the organization
- C. Management responsible for each area of operation
- **D. Top management of the organization**

**Answer: D**

Explanation:

Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

#### NEW QUESTION # 46

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- **A. Hold up-to-date records on training, skills, experience and qualifications**
- B. Ensure that the controls for compliance with legal and contractual requirements are implemented
- C. Ensure all personnel are trained to ISO/IEC 27001 Foundation level
- D. Identify products which could be used in the organization to improve ISMS performance and effectiveness

**Answer: A**

Explanation:

Clause 7.2 (Competence) requires the organization to:

\* "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"

\* "ensure that these persons are competent on the basis of appropriate education, training, or experience;"

\* "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation-level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.

#### NEW QUESTION # 47

.....

Prepared by experts and approved by experienced professionals, our ISO-IEC-27001-Foundation exam torrent is well-designed high quality products and they are revised and updated based on changes in syllabus and the latest developments in theory and practice. With the guidance of our ISO-IEC-27001-Foundation Guide Torrent, you can make progress by a variety of self-learning

and self-assessing features to test learning outcomes. And as the high pass rate of our ISO-IEC-27001-Foundation exam questions is 99% to 100%, you will be bound to pass the ISO-IEC-27001-Foundation exam with ease.
