High-quality VMware - 2V0-16.25 Questions Exam
You can learn 2V0-16.25 quiz torrent skills and theory at your own pace, and you will save more time and energy that you can complete other thing. We also provide every candidate who wants to get certification with free Demo to check our materials. No other 2V0-16.25 study materials or study dumps can bring you the knowledge and preparation that you will get from the 2V0-16.25 Study Materials available only from ITPassLeader. Not only will you be able to pass any 2V0-16.25 test, but will gets higher score, if you choose our 2V0-16.25 study materials.

Some candidates have doubt about our one-year free updates and one year service assist for buyers who purchase ITPassLeader 2V0-16.25 valid exam bootcamp files. Please rest assured. We have been engaging in offering IT certificate exams materials many years and we pursue long-term development. We provide the warm and 24-hours online service for every buyer who has any question about our 2V0-16.25 Valid Exam Bootcamp files. If we release new version for the 2V0-16.25 exam files, we will notify buyers via email for free downloading.

2V0-16.25 Valid Exam Vce Free, 2V0-16.25 Reliable Test Syllabus

ITPassLeader VMware 2V0-16.25 exam training materials are provided in PDF format and software format. It contains VMware 2V0-16.25 exam questions and answers. These issues are perfect, Which can help you to be successful in the VMware 2V0-16.25 Exam. ITPassLeader VMware 2V0-16.25 exam comprehensively covers all syllabus and complex issues. The ITPassLeader VMware 2V0-16.25 exam questions and answers is the real exam challenges, and help you change your mindset.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q19-Q24):

NEW QUESTION # 19
An administrator has been tasked with creating a custom alert for an object in VMware Cloud Foundation (VCF) Operations. When creating the alert, the administrator completes the following:
* A new symptom definition.

* A new alert definition.
* Select the Object type.
What additional step must the administrator take to complete the stated objective and ensure the alert is triggered?

- A. Create an instance of the Rest Notification Plugin.
- B. Create a new Payload Template.
- C. Enable the alert in an Active Policy.
- D. Create and enable a super metric for read latency in the Active Policy.

Answer: C

Explanation:
When creating a custom alert in VCF Operations, the final required step is:
* Enable the alert in an Active Policy, so it applies to the target objects.
Without policy activation, the alert exists but will never trigger.
Other options:
* A. Super metric# Only required if monitoring a custom metric, not for standard alerts.
* B. REST Notification Plugin# Used for outbound integration, not triggering alerts.
* C. Payload Template# Used in notifications, not in core alert configuration.
References:
VMware Cloud Foundation 9.0 -Custom Alerts and Policies
VMware Docs: Alert Definitions in vRealize Operations

NEW QUESTION # 20
An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.
Which view type is appropriate to display such information?

- A. Trend
- B. Distribution
- C. Table
- D. Text

Answer: A

Explanation:
In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.
* Trend views display data over time, showing both past and predicted future behavior.
* This makes them ideal for capacity planning, performance forecasting, and demand analysis.
* Table (A)# Shows raw values but lacks predictive visualization.
* Distribution (B)# Useful for comparing values across objects but not for time-based or forecasted trends.
* Text (C)# Displays static values or metrics, not historical/forecasting data.
References:
VMware Cloud Foundation 9.0 Operations Guide -Creating Views (Trend, Distribution, Table, Text) VMware Docs: vRealize Operations - Creating Views

NEW QUESTION # 21
An administrator is tasked with importing a vSphere Lifecycle Manager image and applying it to a cluster containing six hosts, with two of the hosts in maintenance mode. The administrator uses the vSphere Client, navigates to the cluster, and edits the remediation settings to enable Parallel Remediation and clicks the Remediate All button to execute the remediation process.
What is the expected result of this remediation process?

- A. The image is remediated on the hosts in maintenance mode in parallel. The hosts not in maintenance mode are not remediated.
- B. The image is remediated on the four hosts not in maintenance mode, in sequence. The hosts in maintenance mode are not remediated.
- C. The image is remediated on the hosts in maintenance mode in parallel, and when completed the hosts not in maintenance mode are remediated in parallel.

- D. The image is remediated on the four hosts not in maintenance mode, in parallel. The hosts in maintenance mode are not remediated.

Answer: A

Explanation:
When using vSphere Lifecycle Manager (vLCM) with Parallel Remediation enabled, the following rules apply:
* Parallel remediation only applies to ESXi hosts that are already in Maintenance Mode.
* vLCM does not put hosts into Maintenance Mode automatically in this mode.
* Similarly, it does not exit Maintenance Mode automatically after remediation.
* Hosts not in Maintenance Mode are skipped.
* If Parallel Remediation is activated, vLCM remediates only those hosts that are already in Maintenance Mode.
* Any hosts that are not in Maintenance Mode remain untouched.
* Remediation happens in parallel for all eligible hosts.
* In this case, two of the six hosts are in Maintenance Mode. Those two hosts will be remediated in parallel.
* The remaining four hosts (not in Maintenance Mode) will not be remediated at all.
Why the other options are incorrect:
* A. Four hosts not in maintenance mode are remediated in parallel##Incorrect. Hosts must already be in Maintenance Mode to be remediated.
* B. Hosts in maintenance mode first, then non-maintenance hosts##Incorrect. Non-maintenance mode hosts are skipped, not remediated after.
* C. Four hosts remediated sequentially, others skipped##Incorrect. Parallel Remediation does not touch non-maintenance mode hosts.
* D. Hosts in maintenance mode remediated in parallel; others skipped##Correct and matches VMware documentation.
References:
VMware vSphere 9.0 Documentation - Parallel Remediation for Lifecycle Manager Images VMware vSphere 9.0 Documentation - Parallel remediation applies only to ESX hosts already in maintenance mode

NEW QUESTION # 22

A network failure of a host occurred in a VMware vSphere Foundation (VVF) vSphere cluster. None of the virtual machines (VMs) restarted on unaffected hosts and the VMs were unreachable until the problem was corrected.
vSphere HA and DRS are enabled, and all tests when powering off a host were successful.
What is the cause of this behavior?

- A. Host Isolation Response is disabled in vSphere HA.
- B. vSphere DRS has not been enabled on the cluster.
- C. vSphere HA has not been enabled on the cluster.
- D. The VMs have "should run on" host affinity rule applied.

Answer: A

Explanation:
In this scenario, a network failure occurred on a host, and VMs on that host did not restart on other hosts, even though HA and DRS were enabled.
* This indicates that vSphere HA detected an isolation event (the host lost network connectivity) but took no action, because the Host Isolation Response was disabled.
* Normally, with Host Isolation Response set to "Power Off and Restart VMs," HA restarts affected VMs on surviving hosts.
* Since powering off a host manually triggers a restart correctly, the failure here was specific to isolation behavior.
Other options:
* B. Affinity rule "should run on"# Would still allow HA restart elsewhere if isolation occurred.
* C. DRS not enabled# DRS only balances load; HA is responsible for restarts.
* D. HA not enabled# Contradicts the scenario (HA was enabled).
References:
VMware vSphere 9.0 - HA Isolation Response Settings
VMware KB 1002117 - Understanding Isolation Response in vSphere HA

NEW QUESTION # 23

An administrator is tasked to implement a new iSCSI storage for a new cluster.
The following information was provided to the administrator:

* iSCSI storage controller IPs are all in the same subnet.
* Multipathing should be used.
* Storage supports Asymmetric Logical Unit Access (ALUA).
* Should be configured for high performance.
Which are the four required steps to configure this on an ESX host? (Choose four.)

- A. Set Path Selection Policy (PSP) to Round Robin (RR).
- B. Set Path Selection Policy (PSP) to Most Recently Used (MRU).
- C. Configure 1 vSwitch with 2 Uplinks.
- D. Add NVMe over TCP software adapter.
- E. Add iSCSI software adapter.
- F. Configure 2 vSwitch with 1 Uplink.
- G. Configure two bound VMkernel ports.
- H. Configure two unbound VMkernel ports.

Answer: A,C,E,G

Explanation:
ForiSCSI multipathing with ALUAandhigh performancein ESXi:
* 1 vSwitch with 2 Uplinks# Standard design for redundancy and multipathing. (B)
* Add iSCSI software adapter# Required to connect to storage. (E)
* Configure two bound VMkernel ports# Ensures multipathing (one per uplink). (G)
* Set PSP to Round Robin (RR)# Optimizes I/O balancing across multiple paths. (F) Other options:
* A. 2 vSwitches with 1 Uplink each# Not recommended, complicates multipathing.
* C. NVMe over TCP# Not relevant, storage is iSCSI.
* D. MRU policy# Legacy, not high performance.
* H. Unbound VMkernel ports# Used for software iSCSI port binding, but "bound" VMkernel ports are required for multipathing.
References:
VMware vSphere 9.0 -iSCSI Configuration with Multipathing

NEW QUESTION # 24
......

If you are worried about that if you fail to pass the exam and will waste your money, if you choose us, there is no need for you to worry about this. We ensure that if you fail to pass your exam by using 2V0-16.25 exam materials of us, we will give you full refund, and no other questions will be asked. Besides, we offer you free update for one year, that is to say, there is no need for you to spend extra money on updating. The update version for 2V0-16.25 Exam Braindumps will be sent to you automatically. You just need to check your mail and change your learning methods in accordance with new changes.

2V0-16.25 Valid Exam Vce Free: https://www.itpassleader.com/VMware/2V0-16.25-dumps-pass-exam.html

You can get high grades by using these dumps with money back guarantee on 2V0-16.25 dumps PDF, VMware 2V0-16.25 Questions Exam They are unsuspecting experts who you can count on, The content of our 2V0-16.25 question torrent is easy to master and simplify the important information, The 2V0-16.25 Valid Exam Vce Free - VMware vSphere Foundation 9.0 Administrator exam is 365 days updates and true, These 2V0-16.25 questions are compiled under the guidance of thousands of professionals from around the world.

I think the future of design is much more international, The cost of the 2V0-16.25 Exam Dumps is reasonable & affordable, and the discount is available regularly.

You can get high grades by using these dumps with money back guarantee on 2V0-16.25 dumps PDF, They are unsuspecting experts who you can count on, The content of our 2V0-16.25 question torrent is easy to master and simplify the important information.
