Our Palo Alto Networks XSIAM Analyst study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit XSIAM-Analyst exam questions. It points to the exam heart to solve your difficulty. With a minimum number of questions and answers of XSIAM-Analyst Test Guide to the most important message, to make every user can easily efficient learning, not to increase their extra burden, finally to let the XSIAM-Analyst exam questions help users quickly to pass the exam.

## Palo Alto Networks XSIAM-Analyst Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Threat Intelligence Management and ASM: This section of the exam measures the skills of Threat Intelligence Analysts and focuses on handling and analyzing threat indicators and attack surface management (ASM). It includes importing and managing indicators, validating reputations and verdicts, creating prevention and detection rules, and monitoring asset inventories. Candidates are expected to use the Attack Surface Threat Response Center to identify and remediate threats effectively.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Endpoint Security Management: This section of the exam measures the skills of Endpoint Security Administrators and focuses on validating endpoint configurations and monitoring activities. It includes managing endpoint profiles and policies, verifying agent status, and responding to endpoint alerts through live terminals, isolation, malware scans, and file retrieval processes.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Incident Handling and Response: This section of the exam measures the skills of Incident Response Analysts and covers managing the complete lifecycle of incidents. It involves explaining the incident creation process, reviewing and investigating evidence through forensics and identity threat detection, analyzing and responding to security events, and applying automated responses. The section also focuses on interpreting incident context data, differentiating between alert grouping and data stitching, and hunting for potential IOCs.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Automation and Playbooks: This section of the exam measures the skills of SOAR Engineers and focuses on leveraging automation within XSIAM. It includes using playbooks for automated incident response, identifying playbook components like tasks, sub-playbooks, and error handling, and understanding the purpose of the playground environment for testing and debugging automated workflows.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>Alerting and Detection Processes: This section of the exam measures the skills of Security Analysts and focuses on recognizing and managing different types of analytic alerts in the Palo Alto Networks XSIAM platform. It includes alert prioritization, scoring, and incident domain handling. Candidates must demonstrate understanding of configuring custom prioritizations, identifying alert sources like correlations and XDR indicators, and taking corresponding actions to ensure accurate threat detection.</li> </ul>

## Exam Dumps XSIAM-Analyst Free - XSIAM-Analyst Valid Test Question

The best news is that during the whole year after purchasing, you will get the latest version of our XSIAM-Analyst exam prep study materials for free, since as soon as we have compiled a new version of the study materials, our company will send the latest one of our study materials to your email immediately. The experts in our company are always keeping a close eye on even the slightest change in the field. Therefore, we can assure that you will miss nothing needed for the XSIAM-Analyst Exam. What's more, the latest version of our study materials will be a good way for you to broaden your horizons as well as improve your skills.

### Palo Alto Networks XSIAM Analyst Sample Questions (Q11-Q16):

#### NEW QUESTION # 11

What is the primary benefit of using playbooks in Cortex XSIAM for incident response?

Response:

- A. To automate repetitive analyst tasks and responses
- B. To score alerts manually
- C. To create static alert profiles
- D. To manually document investigation steps

**Answer: A**

#### NEW QUESTION # 12

Which type of alert in Cortex XSIAM is primarily based on endpoint telemetry and behavior?

- A. IOC
- B. XDR Agent
- C. BIOC
- D. Correlation

**Answer: C**

#### NEW QUESTION # 13

For a critical incident, Cortex XSIAM suggests several playbooks which should have been executed automatically.

Why were the playbooks not executed?

- A. Playbook classifier was not configured for the alert type.
- B. Misconfiguration of the connector instance has occurred.
- C. Installation of the appropriate content pack was not completed.
- D. Playbook loggers were not configured for those alerts.

**Answer: C**

Explanation:

The correct answer is C - Installation of the appropriate content pack was not completed.

If the relevant playbooks are not executed automatically-even though Cortex XSIAM suggests them-it is often due to the required content pack not being installed. Playbooks and their dependencies are delivered through content packs, and unless the content pack is fully installed and enabled, those playbooks cannot run automatically.

"Playbooks may not execute if the required content pack is not installed or enabled in Cortex XSIAM." Document Reference: XSIAM Analyst ILT Lab Guide.pdf Page: Page 38 (Automation and Playbooks section)

#### NEW QUESTION # 14

With regard to Attack Surface Rules, how often are external scans updated?

- A. Daily
- B. Monthly
- C. Hourly
- D. Weekly

**Answer: A**

Explanation:

The correct answer is B - Daily.

In Cortex XSIAM's Attack Surface Management (ASM), external scans and associated attack surface rules are refreshed and updated on a daily basis. Daily updates ensure that security analysts are provided with timely and relevant insights regarding exposed assets and potential vulnerabilities that could impact the organization's security posture.

"External scans for Attack Surface Rules are updated daily to ensure the latest and most relevant security visibility." Document Reference: XSIAM Analyst ILT Lab Guide.pdf Exact Page: Page 41 (Attack Surface Management Section)

#### NEW QUESTION # 15

Which dataset should an analyst search when looking for Palo Alto Networks NGFW logs?

- A. dataset = pan\_dss\_raw
- B. dataset = ngfw\_threat\_panw\_raw
- C. dataset = panw\_ngfw\_traffic\_raw
- D. dataset = ngfw\*

**Answer: C**

Explanation:

Palo Alto Networks NGFW (firewall) logs are ingested into the panw\_ngfw\_traffic\_raw dataset in XSIAM. Querying this dataset returns the raw firewall log records you need.

#### NEW QUESTION # 16

.....

Nowadays, it is widely believed that getting a certificate is quite important for some jobs. XSIAM-Analyst Exam Braindumps contain the main knowledge of the exam, and it will help you pass the exam. XSIAM-Analyst exam dumps not only have the quality, but also have the quantity, and it's enough for you to practice. What's more, we respect the private information of the buyers, your personal information such as the name or email address will be protected well.
