

Das neueste C_S4CPR_2502, nützliche und praktische C_S4CPR_2502 pass4sure Trainingsmaterial

2026 Die neuesten It-Pruefung C_S4CPR_2502 PDF-Versionen Prüfungsfragen und C_S4CPR_2502 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1_dzIbSYpP3CE8c-VRqDco-EMuGAfzMMH

Die Prüfungsfragen und Antworten zur SAP C_S4CPR_2502 Zertifizierungsprüfung von It-Pruefung wird von unserem Expertenteam nach ihren umfangreichen Kenntnissen und Erfahrungen bearbeitet. Sie können die Bedürfnisse der Kandidaten abdecken. Sie finden vielleicht in anderen Büchern oder auf anderen Websites auch die SAP C_S4CPR_2502 Schulungsunterlagen. Aber die Schulungsunterlagen von It-Pruefung sind die umfassendste unter ihnen und zugleich kann Ihnen die beste Garantie geben. Bitte wählen Sie die SAP C_S4CPR_2502 Prüfungsfragen und Antworten von It-Pruefung.

SAP C_S4CPR_2502 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.
Thema 2	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.
Thema 3	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of a SAP Project Manager and covers the methodology for successful cloud implementation projects. It includes adopting a cloud mindset, assembling the right project team, and conducting fit-to-standard workshops to ensure efficient and value-driven implementations.

Thema 4	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.

C_S4CPR_2502 Online Praxisprüfung, C_S4CPR_2502 Deutsch Prüfungsfragen

Im wirklichen Leben muss jede große Karriere mit dem Selbstbewusstsein anfangen. Wenn Sie an Ihrem Wissensstand zweifeln und vor der Prüfung pauken, haben Sie schon mal gedacht, wie Sie die SAP C_S4CPR_2502 Zertifizierungsprüfung selbstsicher bestehen können. Keine Sorgen, It-Pruefung ist eine einzige Website, die Prüfungsmaterialien, die Fragen und Antworten beinhalten, bietet. Die Erfolgsquote von It-Pruefung beträgt 100% und Sie können sicher die C_S4CPR_2502 Prüfung bestehen. Und Sie werden eine glänzende Karriere haben.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement C_S4CPR_2502 Prüfungsfragen mit Lösungen (Q50-Q55):

50. Frage

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the space and page(s) assigned to the role.
- **B. Check the restrictions for the role.**
- **C. Check the business catalogues assigned to the role.**
- **D. Check the Role Maintenance app.**
- E. Check the business role template.

Antwort: B,C,D

51. Frage

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release upgrade? Note: There are 2 correct answers to this question.

- A. Test Automation Tool
- B. SAP Signavio Process Navigator Tool
- **C. What's New Viewer Tool**
- **D. Release Assessment and Scope Dependency Tool**

Antwort: C,D

52. Frage

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "Not Started"
- **B. When the project status is "In Progress"**
- C. When the project status is "Completed"
- D. When the project status is "Finished"

Antwort: B

53. Frage

Which of the following can you do with Automated Invoice Settlement (2LH)? Note: There are 2 correct answers to this question.

- A. Use the evaluated receipt settlement without the supplier's approval.
- B. Settle the created goods movements without receipt of an invoice.
- **C. Schedule a job that will periodically settle invoices.**
- D. Post the appropriate invoices yourself while using evaluated receipt settlement.

Antwort: C

Begründung:

Automated Invoice Settlement (2LH) in SAP S/4HANA Cloud Public Edition is designed to streamline invoice processing by automating settlement based on predefined conditions. Below is an explanation of the correct answers:

* Schedule a job that will periodically settle invoices (A): Automated Invoice Settlement allows users to schedule background jobs that automatically process and settle invoices at regular intervals. This ensures timely settlement of invoices without manual intervention.

* Use the evaluated receipt settlement without the supplier's approval (C): Evaluated Receipt Settlement (ERS) enables automatic invoice creation based on goods receipts. With this functionality, invoices can be settled without requiring explicit approval from the supplier, provided the terms are pre-agreed.

* Post the appropriate invoices yourself while using evaluated receipt settlement (B): While ERS automates invoice creation, it does not require manual posting of invoices. The system handles this automatically based on goods receipt data.

* Settle the created goods movements without receipt of an invoice (D): Goods movements cannot be settled without an invoice unless specific configurations like ERS are in place. However, this is not a feature of Automated Invoice Settlement (2LH).

54. Frage

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Trial system
- **B. Starter system**
- **C. Test system**
- D. Sandbox system
- **E. Development system**

Antwort: B,C,E

Begründung:

In the implementation of SAP S/4HANA Cloud Public Edition, specific systems are utilized to ensure a structured and successful deployment process. These systems are part of the SAP lifecycle management approach and serve distinct purposes during the implementation. Below is an explanation of the correct answers:

* Test System (A): The test system is used for quality assurance and user acceptance testing (UAT). It allows customers to validate configurations, customizations, and integrations in an environment that mirrors the production system. Testing ensures that all business processes function as expected before going live.

* **Development System (C): The development system is where configuration, customization, and extension activities are performed. This system is used by developers and key users to build and adapt the solution to meet the customer's specific business requirements. It serves as the foundation for implementing new functionalities and integrating with other systems.

* Starter System (D): The starter system is a preconfigured system provided by SAP during the initial phases of implementation. It contains standard business processes and best practices tailored to the customer's industry. The starter system helps accelerate the implementation process by providing a baseline configuration that can be further customized.

* Trial System (B): A trial system is typically used for demonstration or evaluation purposes, allowing potential customers to explore the capabilities of SAP S/4HANA Cloud Public Edition. However, it is not part of the formal implementation process for a customer.

* Sandbox System (E): A sandbox system is an optional environment provided for experimentation and learning purposes. It allows users to explore the system without impacting the actual implementation.

While useful for training and testing ideas, it is not a mandatory system in the implementation lifecycle.
