

HP HPE7-A03 Exam Dumps - Right Preparation Method [2026]

BTW, DOWNLOAD part of VerifiedDumps HPE7-A03 dumps from Cloud Storage: <https://drive.google.com/open?id=1y0bXvGQ2JMBxPKPgipcZG-rzVp36-xr>

We have three versions for your practice according to your study habit. The pdf version is for you to print the HPE7-A03 Dump pdf out and you can share your HPE7-A03 exam dumps with your friends and classmates. The test engine version enables you feeling the atmosphere of formal test because it is a simulation of real test. The soft version is same as the test engine but it allows you to practice your Aruba Certified Professional real dumps in any electronic equipment.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Topic 2	<ul style="list-style-type: none">Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Topic 3	<ul style="list-style-type: none">Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 4	<ul style="list-style-type: none">Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.

Authentic HPE7-A03 Exam Hub - HPE7-A03 Training Kit

By contrasting with other products in the industry, our HPE7-A03 test guide really has a higher pass rate, which has been verified by many users. As long as you use our HPE7-A03 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. HPE7-A03 learning guide hopes to progress together with you and work together for their own future. The high passing rate of HPE7-A03 exam training also requires your efforts. If you choose HPE7-A03 test guide, I believe we can together contribute to this high pass rate.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q13-

Q18):

NEW QUESTION # 13

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada. They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores. The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDF's located on floors one and two. The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

Based on the scenario, where would you look to add additional items to the BOM to aid the company goals? (Select three.)

- A. Finance Team
- B. Marketing
- C. Security Team/CISO
- D. Customer Experience Officer
- E. Sales Management
- F. Building Facilities

Answer: A,B,F

Explanation:

In addressing the company's goals and the challenges presented in the scenario, adding items to the Bill of Materials (BOM) that would involve the Building Facilities team could include infrastructure upgrades like improved cabling (moving from Cat5 to a higher category) or enhancements to support the new wireless and VoIP systems. For the Marketing team, technologies that could enable better interaction with customers, such as location-based services or analytics tools, would be beneficial. These could help in understanding customer behavior within the stores and tailoring marketing efforts accordingly. Finally, input from the Finance Team would be essential in ensuring that the solutions chosen fit within the budget constraints and offer a good return on investment, especially considering the company's desire for a solution that could last 7+ years and support their growth plans.

NEW QUESTION # 14

What possible issue with the core switch selection do you see in regards to the customers' requirements?

- A. The core switch will not support the 10GbE downlinks to the cabins and technical rooms.
- B. The core switch will not support the 25GbE downlinks to the distribution switches.
- C. The core switch will not have enough ports for VSX links.
- D. The core switch will have a lot of unused ports.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* Customer Requirement Recap (cruise line scenario):

* Each ship has two core switches in the MDF.

- * Each core connects to up to 10 distribution switches in IDFs.
- * Uplinks between core and distribution are 25 GbE SMF links.
- * Cabins/technical rooms connect to distribution switches via 10 GbE uplinks.
- * Only 8 uplinks per core switch are required to meet the design.
- * Issue Identified:
 - * The selected core switch platform provides dozens of 25/40/100 GbE ports, far exceeding what is needed for this environment.
 - * With only 8 ports in use per core, that leaves ~40 unused ports.
 - * This creates a cost inefficiency - the customer is paying for hardware capacity that will remain idle.
- * Why the Correct Answer is B:
 - * The main "issue" is not about lack of capability (uplinks and VSX are supported).
 - * The issue is about overprovisioning - the core switch selection results in a large number of unused ports, which is against the CIO's requirement to limit unused capacity and avoid waste.
- * Why Not the Other Options:
 - * A. Core will not support 25 GbE downlinks # Incorrect. The selected core switches do support 25 GbE uplinks.
 - * C. Not enough ports for VSX links # Incorrect. Core switches only require a few ports for VSX interconnect, which is easily supported.
 - * D. Core will not support 10 GbE downlinks to cabins # Incorrect. Core switches don't connect directly to cabins; those connections terminate at the distribution layer.

Aruba Design Guide Reference:

- * Aruba ESP Campus Design Principles: Switch sizing should consider right-sizing the port count to avoid excessive unused capacity.
- * Aruba Validated Solution Guides: Core switches should be selected for performance, scalability, and efficiency - not overspec'd beyond realistic need.

Final Justification:

The issue with the customer's core switch selection is not about functionality, but about efficiency. Only 8 uplinks per core are needed, leaving ~40 ports unused - which contradicts the CIO's goal of minimizing unused ports.

NEW QUESTION # 15

What should be Included in an Executive Summary? (Place the correct Items into the list at the right Order is no: Important Not all cottons will be used)

Answer:

Explanation:

Explanation:

For an Executive Summary, typically the following items should be included:

- * Brief Summary
- * Contact Information
- * High-Level Design
- * Purpose of the Document
- * Recommendations
- * Scope
- * Target Audience

NEW QUESTION # 16

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced. XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital Is located In New York City
- Dila Health Center Is located in City A
- Mount Health Center is located In City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus,

branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance reporting.

- Seamless integration across wired, wireless. WAN, S0-8branch. IoT

* Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.

- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)

- Security options Including WPA3. 802.1X with Radius secure authentication

- Identify and authenticate every wireless and wired device

- End-to-end role-based security

- Seamless mobility across the hospital for medical teams, patients, and visitors

- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site

- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs

- Fully redundant branch solution with dynamic path selection to the hospital XYZ Regional Hospital is looking for an NAC solution to address its security challenges-Requirements:

- fully redundant NAC solution for management and authentication

- wireless and wired authentication for the main hospital will be handled locally The IT director of XYZ Regional Hospital is interested in a solution for nurse workstation tracking. What solution would meet the customer's requirements? (Select three.)

- **A. Aruba User Experience Insight**
- B. Airwave
- **C. Asset Tracking Subscription**
- D. Aruba Tags Configuration App
- **E. Map Subscription**
- F. Client insight

Answer: A,C,E

Explanation:

For nurse workstation tracking, Aruba User Experience Insight can provide insights into how applications and network services are performing, which can help in understanding user experiences across the hospital network. The Asset Tracking Subscription is a crucial component for keeping track of physical assets such as nurse workstations. The Map Subscription would complement the asset tracking by providing detailed maps of the hospital's interior, enabling precise location tracking of the workstations. These solutions together would allow the hospital to effectively track and manage their resources, ensuring that nurses can find workstations quickly and efficiently, which is essential in a fast-paced medical environment.

NEW QUESTION # 17

What is the difference between OM4 and OM5 cabling? (Select two)

- **A. OM5 supports Multiplexing operating in the 850 to 950 nm range, while OM4 does not**
- **B. OM5 is approved as wide Band Multimode Fiber (WBMMF), while OM4 is not.**
- C. OM5 supports speeds up to 100 Gbps, while OM4 does not.
- D. OM4 supports distances up to 100 m while OM5 supports distances up to 150 m using 100 GBps transceivers.

Answer: A,B

Explanation:

OM5 supports Multiplexing operating in the 850 to 950 nm range, while OM4 does not.

OM5 is designed to support multiple wavelengths in the 850 to 950 nm range, enabling it to utilize techniques like SWDM (Short Wavelength Division Multiplexing) for higher data rates over longer distances.

OM5 is approved as Wide Band Multimode Fiber (WBMMF), while OM4 is not.

OM5 is recognized as Wide Band Multimode Fiber, which allows for better performance and flexibility in supporting multiple wavelengths compared to traditional OM4.

NEW QUESTION # 18
